

Scrum

Exam Questions PSM-II

Professional Scrum Master II

NEW QUESTION 1

Who can prematurely cancel a Sprint?

- A. The Development Team
- B. The Product Owner
- C. The Stakeholders
- D. The Scrum Master

Answer: B

Explanation:

Only the Product Owner can determine when items being worked on are obsolete.

NEW QUESTION 2

Which role would know the most about the progress toward a business objective or a release, and be able to explain clearly the alternatives?

- A. The Product Owner
- B. The Release Manager
- C. The Development Team
- D. The Scrum Master

Answer: A

NEW QUESTION 3

Which of the following statements are true about the Scrum Master role?

- A. The Scrum Master assigns the tasks to Development Team members and ensures they are completed within the committed timebox.
- B. The Scrum Master helps those outside the Scrum Team understand which interactions are helpful and teaches the Development Team to keep the Scrum meetings within the timebox.
- C. The Scrum Master is responsible for updating the Scrum board and ensuring team members avoid conflicts.
- D. At the Sprint Review, the Scrum Master demonstrates the completed Increment and answers any QUESTION NO:s from the stakeholders.

Answer: B

Explanation:

The Scrum Master is responsible not only for coaching the Scrum Team but also the organization.

NEW QUESTION 4

What would be typical Scrum Master activities during the Sprint?

- A. Monitor the progress of the Development Team and assigning tasks.
- B. Remove impediments and facilitating inspection and adaptation opportunities as requested or needed.
- C. Avoiding conflicts and escalating to the line managers if conflicts occur.

Answer: B

NEW QUESTION 5

Peter, a Project Manager, has raised concerns about your Scrum Team's productivity and progress towards the objectives. Which is the best way to respond to Peter's concerns?

- A. Share the Product Backlog, the projections towards the release dates and ensure that Peter has access.
- B. Show the Profit & Loss (P&L) report.
- C. Share the current impediments.
- D. Share the last stakeholder status report prepared by the Scrum Master.

Answer: A

Explanation:

One of the key pillars that support the empirical process control is Transparency. Transparency will help manage stakeholder expectations and allow the teams to effectively adapt if and when needed.

NEW QUESTION 6

Which role is responsible for determining when it is most appropriate to update the Sprint Backlog?

- A. The Product Owner
- B. The Development Team
- C. The Scrum Team
- D. The Scrum Master

Answer: B

Explanation:

The Development Team is responsible for tracking the remaining work of the Sprint.

NEW QUESTION 7

A Scrum Master is not only a servant-leader to the Scrum Team and organization, it's also considered a management position. Which three activities describe what a Scrum Master manages as reflected by the Scrum Guide? (Choose three.)

- A. Reporting on the performance of the Sprint.
- B. The way Scrum is understood and enacted within the organization.
- C. Managing the capacity and utilization of each Development Team member.
- D. Managing the process in which Scrum is applied.
- E. Managing the Product Backlog items and work in the Sprint Backlog.
- F. Removing organizational impediments that limits the team's progress and productivity.

Answer: BDF

Explanation:

The Scrum Master must understand the principles and values behind agility as well as the Scrum theory. He/she also must act in ways that reflects the values of Scrum and creates an environment for others to also embrace those values. He/she is responsible for ensuring the team's process stays within the boundaries of the Scrum framework as well as helping and supporting the team with continuous improvement.

NEW QUESTION 8

During the Sprint, the Development Team realizes they might not be able to finish all of the items in the Sprint Backlog. What should happen?

- A. Product Backlog items are either 'done' or 'not done.' This helps with transparency, reduces complexity and allows for improved empiricism.
- B. Continue Sprinting until the work is complete and redefine a new Sprint time-box based on the results of the current Sprint.
- C. The Sprint length holds and the Development Team continuously learns what is actually possible to do within the time-box.

Answer: C

NEW QUESTION 9

As a Scrum Master, you observe that the Product Owner is not collaborating with the Development Team effectively. What action would you take?

- A. Send the Product Owner to training.
- B. Nominate a proxy Product Owner.
- C. Act as the go-between.
- D. Coach the Product Owner.

Answer: D

Explanation:

A Scrum Master coaches those inside and outside the team on the values of Scrum and incremental delivery.

NEW QUESTION 10

How should multiple Scrum Teams, working from the same Product Backlog, select the Product Backlog items their teams plan to work on?

- A. The Product Owner will present the work and the Development Teams will select the items they will work on.
- B. The Product Owner creates separate Product Backlogs for each Development Team.
- C. Each Scrum Team would select an equal number of items.
- D. The Product Owner assigns the work to each team.
- E. The Scrum Team with the highest productivity will select the items first.

Answer: A

Explanation:

The ones doing the work are the best ones to decide what they can do and how to do it.

NEW QUESTION 10

A Scrum Master teaches those who are interested in the Development Team's progress that progress in Scrum comes from inspecting an Increment at the Sprint Review.

- A. True
- B. False

Answer: A

Explanation:

Working software is the primary measure of progress.

NEW QUESTION 13

What would be the main benefits of self-organization?

- A. Increased rule compliance, self-accountability, commitment.
- B. Increased rule compliance, self-accountability, output.
- C. Increased capacity, accuracy of estimates, output.
- D. Increased creativity, self-accountability, commitment.

Answer: D

Explanation:

Self-organized teams allow teams to creatively solve difficult problems, be accountable for the work they do, and commit to each other and the goals of the team.

NEW QUESTION 15

Scrum promotes self-organization.

Which of these statements would NOT support self-organizing?

- A. The Development Team deciding what work to do in a Sprint.
- B. Removing the need for documentation.
- C. Being a lightweight framework.
- D. Removing titles for Development Team members.

Answer: B

NEW QUESTION 16

Which of the following are time-boxed events in Scrum?

- A. Sprint Planning
- B. Daily Scrum
- C. Sprint Review
- D. Sprint Retrospective
- E. All of the above

Answer: E

NEW QUESTION 18

Stakeholders are only allowed to meet with the Scrum Team at Sprint Review.

- A. True
- B. False

Answer: B

Explanation:

Getting feedback from Stakeholders is a crucial activity in Scrum. Working with stakeholders frequently ensures the team to focus on the right things to build. Although it is required to have Stakeholders at Sprint Review, they can also engage with the Scrum Team during Product Backlog Refinement, Sprint Planning or during the Sprint if the Scrum Team requires it.

NEW QUESTION 20

How should a Scrum Master coordinate the work when more than one Scrum Team is working on one product?

- A. Teach them that it's their responsibility to coordinate with the other teams to integrate and create a shippable product Increment at the end of every Sprint.
- B. Identify and manage the dependencies between Scrum Teams.
- C. Have the Product Owner work with the tech leads of each team to parse the Product Backlog and minimize overlap in User Stories.
- D. Merge the teams and work from a single Sprint Backlog.

Answer: A

Explanation:

One of the benefits of self-organized teams is the ability to decide how best to work together to produce a shippable Increment.

NEW QUESTION 25

Your organization requires all Increments to pass user acceptance testing (UAT) before it is allowed to be released to production.

Is it a good idea to postpone UAT until the end of the project to prevent the Development Team from being disrupted during the Sprints?

- A. No, because the state of the Product Increment won't be transparent and the feedback loop would be too long.
- B. It depends on the team's Definition of Done.
- C. Yes, because the Development Team is a self-organizing team and should not be disrupted during development.
- D. Yes, because UAT is done in a hardening Sprint before the release Sprint.

Answer: A

Explanation:

The purpose of each Sprint is to deliver Increments of potentially releasable functionality that adhere to the Scrum Team's current definition of "Done". At the end of a Sprint, the new Increment must be "Done", which means it must be in useable condition and meet the Scrum Team's definition of "Done". An increment is a body of inspectable, done work that supports empiricism at the end of the Sprint. If UAT is a part of the team or organizational standard, then any delay in this activity will reduce transparency and increase risk.

NEW QUESTION 27

At the eighth Sprint Review, the stakeholders are upset that the product being built is not what they expected and will incur additional costs that was not planned for.

What may have led to this?

- A. The Scrum Master has not been reporting on the progress of the Scrum Team
- B. The Product Owner has not been managing the Development Team's tasks effectively
- C. The Development Team has not been improving their velocity.

- D. The Scrum Master has not ensured that the project is transparent
- E. The Product Owner has not made the stakeholders aware of the progress of the project
- F. The stakeholders have not been attending the Sprint Reviews.
- G. The Scrum Master has not been attending the Daily Standup
- H. The Product Owner has not been using the Gantt chart correctly
- I. The Stakeholders have not been invited to the Sprint Retrospectives.

Answer: B

Explanation:

Scrum requires significant aspects of the process to be visible to those responsible for the outcome. This includes transparency with internal and external stakeholders.

NEW QUESTION 32

Customer satisfaction should be measured:

- A. Annually
- B. Quarterly
- C. Daily
- D. Frequently

Answer: D

Explanation:

Frequent enough to ensure the team is building the right thing at the right time but not so frequent it hinders the team from the work.

NEW QUESTION 35

An organization is planning to form five new Scrum Teams to work on building a single product. A few of the future team members ask the Scrum Master who will coordinate the work between the different Scrum Teams.

What action should the Scrum Master take?

- A. Visit the five Development Teams daily to ensure alignment and that all Sprint Backlogs remain synchronized.
- B. Teach them that it is their responsibility to form the teams such that each team will have the necessary skills, knowledge, and competencies to create an integrated Increment by the end of every Sprint.
- C. Advise the teams to minimize dependencies by working on separate development branches and integrate at the end of four Sprint cycles.
- D. At the end of Sprint Planning, collect all Sprint tasks and create a consolidated plan for the entire Sprint.
- E. Teach the Product Owner to work with the technical leads on ordering Product Backlog in a way to avoid too much technical and development overlap during a Sprint.

Answer: B

Explanation:

Development Teams are structured and empowered by the organization to organize and manage their own work. This includes deciding how to form teams when multiple teams are needed. The resulting synergy optimizes the Development Team's overall efficiency and effectiveness. They are self-organizing. No one (not even the Scrum Master) tells the Development Team how to turn Product Backlog into Increments of potentially releasable functionality.

NEW QUESTION 40

Your organization has formed a new Scrum Team and has assigned you as the Scrum Master. In what ways would you help the team start?

- A. Ensure the Scrum Team members have compatible personalities, have the tech leads clarify the expectations and responsibilities of each role, and propose a performance rewards system.
- B. Have the Scrum Team members introduce their background experience with each other, ask the Product Owner to discuss the product and answer questions, and ensure the team understands the need for a Definition of "Done."

Answer: B

Explanation:

Scrum Teams should have all of the competencies and skills to do the work in the Product Backlog which includes understanding the goals and history of the product and ensuring that they all know what "done" means.

NEW QUESTION 41

Steven is a Scrum Master asked to assist in creating five new Scrum Teams that will be working to build a highly anticipated product. He talks with them about the importance of being able to integrate their Increments by the end of their Sprints. This includes the first Sprints. The product is very important to both the end users and the organization.

Of the choices raised by future team members, what would Steven encourage?

- A. Each Scrum Team delivers Increments in its own code branch
- B. After UAT is performed at the Sprint Review, the code branch is isolated until enough Increments are considered acceptable
- C. All code branches will then be merged during the release phase.
- D. Each Scrum Team delivers functionality at the end of each Sprint
- E. New Product Backlog items will then be added to the next Sprint Backlog to integrate their functionality with the other teams to create a unified Increment.
- F. All Scrum Teams agree on a mutual understanding of 'done' that defines all work necessary to deliver a potentially shippable Increment that includes all previous Increments delivered for the product.
- G. Wait until enough of the infrastructure and architecture is in place before starting the first Sprint
- H. This will increase the success of delivering integrated Increments in Sprint 1.

Answer: C

Explanation:

When a Product Backlog item or an Increment is described as “Done”, everyone must understand what “Done” means. If there are multiple Scrum Teams working on the system or product release, the Development Teams on all the Scrum Teams must mutually define the definition of “Done” to have a shared understanding of what it means for work to be complete, to ensure transparency. Each Increment is additive to all prior Increments and thoroughly tested, ensuring that all Increments work together.

NEW QUESTION 42

The director of engineering in your organization always stresses the importance of meeting deadlines in order for the engineering department to be seen as a reliable source for the product management department. The director has calculated that the team's velocity needs to increase an additional 15% to meet the commitment he made to management for the release date of the product.

He asks Steven, the team's Scrum Master, to increase his team's velocity. Which would be the best two responses for Steven to take? (Choose two.)

- A. He explains how a team uses the velocity of a Sprint primarily to forecast work for the next Sprint, not to perfectly predict future productivity
- B. He refers the director to the Product Owner for all information concerning the progress of development.
- C. He informs the director of organizational impediments he is aware of that prevent the team from being more productive
- D. He suggests collaborating with him on how to remove these impediments.
- E. He educates his director how it is part of a team's self-organization to improve velocity
- F. He invites the director to the next Sprint Retrospective to brainstorm on how they can improve.
- G. He helps the director understand that it typically takes a few Sprints for a team to gradually increase the velocity up to the level expected
- H. Meanwhile he presents this to the team as a challenge and a company goal, leaving it however up to them to figure out exactly how to achieve this.
- I. He tells the director that this is not his responsibility in Scrum
- J. He tells the director to work with the Product Owner to check whether the estimates on the Product Backlog are being respected during implementation.

Answer: AB

Explanation:

The Scrum Master serves the organization by helping employees and stakeholders understand and enact Scrum and empirical product development and causing change that increases the productivity of the Scrum Team.

NEW QUESTION 47

Steven is a Scrum Master on a new Scrum Team.

What would be the best way for him to determine if the Product Owner is interacting enough with the Development Team during a Sprint?

- A. Check whether the Product Owner is actively engaged at the Daily Scrums.
- B. Check whether the Increment presented at the Sprint Review meets the Product Owner's expectations.
- C. See whether the Product Owner has provided enough information at the Sprint Planning to make his/her presence optional during the Sprint
- D. The level of autonomy within Development Team can be the result of having the right presence from the Product Owner.
- E. The Product Owner must always be present with the Development Team
- F. Unavailability of the Product Owner is prohibited in Scrum.

Answer: C

Explanation:

Outcomes of the Scrum Team are affected by the Product Owner's participation and availability. During a Sprint he/she is responsible for answering questions from the Development Team about items in the current Sprint and optimizing the value of the work the Development Team does.

NEW QUESTION 48

An organization has just hired you as a new Scrum Master to help them transition their teams from their current traditional process to Scrum. The teams are currently structured to specialize in a single function. This is also known as component teams where a team would only address a single layer (i.e. design, frontend, backend, database, testing, etc.). You've introduced the concept of cross-functional teams where all the skills needed to produce business functionality, from end to end, are inside of a single team.

What should you keep in mind when transitioning from siloed teams to cross-functional teams? (Choose two.)

- A. It is easier to compare the performance between cross-functional teams in order to identify to which teams to assign tasks and which teams need additional coaching.
- B. Newly formed teams will need time to stabilize before reaching their peak performance
- C. During the initial stages of forming, performance will suffer and productivity may be low, although even then delivery of business value is still likely to increase.
- D. Without feature teams, you cannot do Scrum
- E. Postpone Scrum adoption until the teams are reorganized in feature teams.
- F. People from the different layers and components will need time to become accustomed to working and delivering unified functionality together as one Scrum Team thus productivity may suffer.

Answer: BD

Explanation:

Forming a team takes time, and members often go through recognizable stages as they change from being a collection of strangers to a united group with common goals. Bruce Tuckman's Forming, Storming, Norming, and Performing model describes these stages. When you understand it, you can help your new team become effective more quickly.

NEW QUESTION 50

You have been hired as a Scrum Master for a company that has been doing business for over fifty years. In order to stay competitive, they have started an initiative to digitize their legacy systems. The company has several Scrum Teams working on different components that will be integrated to a single back office platform.

Your team is responsible for building the back office platform and integrating all other components. The Scrum Teams work in two week Sprints and are expected to deliver all functionality in six Sprints.

During development the requirement changes in the other components have been slowing down your team's progress. Because of these changes, your team has estimated that they will not be able to deliver all expected work within the original timeframe. The Scrum Teams working on the other components confirm that they are still on track to meet the expected delivery date. The program manager in charge of the digitization initiative is upset and angry with your team.

As a Scrum Master, what could you do to help the Product Owner?

- A. You suggest working with the program manager and the other teams on the ordering and the value of your team's open Product Backlog items to redefine the possible delivery date.
- B. You shorten your team's Sprints to be ready sooner.
- C. You remove all items from the Product Backlog for which development is forecasted to be beyond the expected date.
- D. These are likely to be low value anyhow.
- E. You suggest adding additional developers to the team in order to increase velocity and meet the original date.

Answer: A

Explanation:

The Scrum Master serves the Product Owner in several ways, including: Finding techniques for effective Product Backlog management; Helping the Scrum Team understand the need for clear and concise Product Backlog items; Understanding product planning in an empirical environment; Ensuring the Product Owner knows how to arrange the Product Backlog to maximize value.

NEW QUESTION 54

Scrum is based on which of the following?

- A. Defined process.
- B. Complex process.
- C. Empiricism.
- D. Hybrid model

Answer: C

Explanation:

Scrum addresses complex problems in complex environments and asserts that knowledge comes from experience and making decisions based on what is known. What is known can only be discovered in hindsight.

NEW QUESTION 58

When does a new Sprint begin?

- A. Immediately after the next Sprint Planning.
- B. Immediately after the end of the previous Sprint.
- C. It depends on the Product Owner.
- D. Every Monday.

Answer: B

NEW QUESTION 63

Which of the following is true about the Product Owner role?

- A. Can be shared between multiple people on a Scrum Team, Is the same as a Project Manager
- B. Is played by a committee or a team of people.
- C. Is one person
- D. Can be influenced by a committee
- E. Is accountable for ordering the Product Backlog.

Answer: B

NEW QUESTION 65

Peter, the Product Owner, has been giving positive recognition to individual Development Team members who have moved their work to 'done' during the Daily Scrum. Peter wants to ensure the team is adhering to the ideal guideline on the burndown chart. What would be two valid actions for Steven, the Scrum Master, to take? (Choose two.)

- A. Steven talks with Peter about concerns of how his behavior might impact the team members and request that he stop attending for now.
- B. Steven coaches Peter on best practices for updating the burndown chart as it provides accurate information on how well the team is performing.
- C. Nothin
- D. Steven is optional at the Daily Scrum and it is the responsibility of the team to decide how to best run it.
- E. Steven coaches the Scrum Team about the purpose of the Daily Scrum.

Answer: AD

Explanation:

The Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide. Scrum Masters do this by helping everyone understand Scrum theory, practices, rules, and values.

The Scrum Master is a servant-leader for the Scrum Team. The Scrum Master helps the Scrum Team understand which of their interactions are helpful and which aren't.

The Scrum Master helps everyone change these interactions to maximize the value created by the Scrum Team.

NEW QUESTION 66

What is a good way for a Scrum Team to ensure that security concerns are addressed and transparent?

- A. Add Security Sprints to resolve security concerns when needed.
- B. Have the Scrum Team create Product Backlog items for each concern and/or add security concerns to the definition of "Done".
- C. Create a separate backlog for security items and only work on the items when a specialist becomes available.
- D. Delegate the work to an external team.

Answer:

B

Explanation:

The Product Backlog and the Definition of “Done” are artifacts that promote transparency.

NEW QUESTION 71

By the end of the Sprint, a Product Backlog item in the Sprint Backlog does not meet the team's Definition of Done. What two things should happen with the item? (Choose two.)

- A. It will be inspected at the Sprint Review and if it is acceptable by the stakeholders then include it in the Increment.
- B. Do not include the item in the Increment for the Sprint.
- C. Split the item and add the estimation of the completed work to the current Sprint so not to impact the velocity and add the ‘undone’ work to the next Sprint.
- D. Estimate the remaining work needed to make it ‘done’ and add it to the Product Backlog for the Product Owner to decide what to do with it.

Answer: BD

Explanation:

At the end of a Sprint, the new Increment must be ‘Done’, which means it must be in useable condition and meet the Scrum Team’s definition of ‘Done’. Scrum Team members must have a shared understanding of what it means for work to be complete, to ensure transparency. This is the Definition of Done for the Scrum Team and it is used to assess when work is complete on the product Increment.

NEW QUESTION 72

Peter is a new Product Owner on a newly formed Scrum Team. Peter has projected a product completion date based on an estimated velocity of 21 completed points per Sprint. After the first 3 Sprints, the team has determined that their maximum velocity is 15 points and they are unable to create shippable increments at the end of each Sprint. What is the best way to proceed?

- A. The Sprints have failed to produce shippable Increments there for opportunities to inspect and adapt is los
- B. The Scrum Master would encourage the organization to add more team members in order toincrease the team’s capacity.
- C. The Scrum Master would coach the team on improving their estimations and commitment to completing the Sprint Backlog.
- D. Extend the Sprint in order to complete the Sprint Backlog items.
- E. Inform Peter that the projected completion date is not correc
- F. The Development team would estimate the remaining work to produce a shippable Increment and suggest making it “Done” before working on new feature
- G. Based on empirical data, Peter can adjust the completion date and decide how to continue.

Answer: D

NEW QUESTION 76

The Development Team should have all the skills and competencies needed to:

- A. Turn the Product Backlog items it selects into a potentially releasable product increment of functionality.
- B. Do all of the development work in order to handoff to the testers in the subsequent Sprint.
- C. Complete the project within the estimate as committed to the Product Owner.

Answer: A

NEW QUESTION 80

A key measure of success for the Product Owner is velocity.

- A. True

Answer: B

Explanation:

Velocity only measures the team’s average speed and does not reflect how much value is being delivered to the customers. Even when it’s considered inside the project, while it’s important, it’s not the key measure of success. The Product Owner should be focused on how much value is delivered to the customers.

NEW QUESTION 81

The Scrum Master is no longer needed when teams become self-organized.

- A. True
- B. False

Answer: B

NEW QUESTION 83

Steven, the Scrum Master, observes that one of the Development Team members is not attending the Daily Scrum. The Development Team feels this is ok as they all sit in the same area and already have constant communication throughout the day. Which is the best action for Steven to take?

- A. Start running the Daily Scrum and require all members to be in attendance.
- B. Talk to the Development Team member privately and tell him that he needs to be a team player.
- C. Ask the Development Team, what value will result from having all team members present at the Daily Scrum and what are the risks if members don't attend.
- D. The Daily Scrum is owned by the Development Team and it is their responsibility to decide which team members must participate.

Answer: C

Explanation:

The Scrum Master is responsible for ensuring that the Scrum Team understands the purpose and value of the Scrum events. Because the Daily Scrum is owned by the Development Team, it will decide how best to run the event. And if needed the Scrum Master will coach the team to ensure the decisions stay within the boundaries of the Scrum framework.

NEW QUESTION 86

Select the correct Scrum Team roles defined in Scrum.

- A. Development Team, Scrum Master, Product Owner
- B. Engineers, Business Analyst, Product Owner
- C. Stakeholders, Scrum Master, Project Manager, Product Owner
- D. Product Manager, Business Analyst, Development Team, Stakeholders

Answer: A

Explanation:

The Scrum Framework only recognizes these three roles although others may be needed to help the team build the most valuable product possible.

NEW QUESTION 91

What could be a reason for a Product Owner to delay the start of a new Sprint after the conclusion of the previous Sprint?

- A. The QA team has not finished testing the previous Increment before declaring it ready to ship.
- B. The stakeholders were disappointed with the Increment produced in the previous Sprint.
- C. There is no acceptable reason
- D. A new Sprint starts immediately after the conclusion of the previous Sprint.
- E. The Product Owner needs additional time to identify the next initiatives.
- F. There's not enough work in the Product Backlog to work on in the upcoming Sprint.

Answer: C

NEW QUESTION 94

Steven is a Scrum Master that was hired to help an organization, that is new to Scrum, understand and enact Scrum effectively. Which three activities would be acceptable? (Choose three.)

- A. Require all teams in the organization to start using Scrum as soon as possible.
- B. Arrange 1:1 coaching sessions to discuss any identified concerns Steven may have.
- C. Schedule formal trainings.
- D. Penalize any Scrum Team members who are not staying within the Scrum Framework.
- E. Educate stakeholders and clients about Scrum.
- F. Extend Retrospectives to include formal training.

Answer: BCE

Explanation:

The Scrum Master serves the organization in several ways, including: Leading and coaching the organization in its Scrum adoption; Planning Scrum implementations within the organization; Helping employees and stakeholders understand and enact Scrum and empirical product development.

NEW QUESTION 96

During the Sprint Retrospective, the team is discussing the quality issues that prevented the team from delivering a releasable Increment at the end of the Sprint. The Development Team does, however, mention that they were able to achieve a high velocity. What are the best two responses for Steven, their Scrum Master, to take? (Choose two.)

- A. Stress the value of working software over measured velocity.
- B. Agree and acknowledge the Development Team's hard work, so they will be motivated to do even more in the next Sprint.
- C. Acknowledge the hard work but remind the Development Team that they need to improve in order to do even more in the next Sprint.
- D. Facilitate a discussion on how to improve the quality to a level high enough for the Increment to be releasable, even if the measured velocity drops in the next Sprint.

Answer: AD

Explanation:

Scrum employs an iterative, incremental approach to optimize predictability and control risk. The primary objective of a Sprint (iteration) is to produce a potentially shippable product Increment. Having an Increment will allow the Scrum Team to know the right thing to do in the upcoming Sprint. Having a velocity is important but working software is the primary measure of progress.

NEW QUESTION 98

Which statement is FALSE in regards to the Sprint Goal?

- A. It is only a forecast and changes during the Sprint as more is learned.
- B. If it doesn't seem achievable, the Development Team has the courage to tell the Product Owner.
- C. The Product Owner respects the Development Team's opinion on whether they can achieve it.
- D. It helps increase focus.
- E. The Scrum Team discusses openly about alternative ways to reach it.
- F. The Development Team commits to it.

Answer: A

Explanation:

The Sprint Goal is an objective set for the Sprint that can be met through the implementation of Product Backlog. It provides guidance to the Development Team on why it is building the Increment.

NEW QUESTION 101

Doing your best and helping other Scrum Team members demonstrates which of the following?

- A. Value of Commitment
- B. Increased Revenue
- C. Increased Profit
- D. Maximizing utilization
- E. High Performance

Answer: A

Explanation:

People personally commit to achieving the goals of the Scrum Team by doing their best and helping others.

NEW QUESTION 105

Multiple Scrum Teams working from the same Product Backlog must have the same Sprint start dates.

- A. True
- B. False

Answer: B

Explanation:

Multiple Scrum Teams could have the same Sprint start dates but it is not mandatory as the importance is on being able to integrate their shippable Increments at the end of their Sprints.

NEW QUESTION 106

Over the course of several Sprints, the relationship between the Product Owner and the Development team has suffered. The Development Team is upset with the Product Owner for the constantly changing the upcoming items for the product. The Product Owner is upset with the Development Team for changing the work that needs to be done during the Sprint.

What should Steven, the Scrum Master, do?

- A. During the Sprint Retrospective, ask the Product Owner and the Development Team to address the issues. Have the Team discuss why the changes occur and what impact they have on the value of the product.
- B. The Scrum Master's responsibility is to ensure the Development Team has a stable velocity.
- C. Any changes that negatively impact the team's velocity will be rejected by the Scrum Master.
- D. Take the time between Sprints to organize a team building session to rebuild the relationship.
- E. Explain to the Development Team that the Product Owner is accountable for flow of value and needs to be followed in order to maximize the value delivered.

Answer: A

Explanation:

Conflicts are a natural occurrence and the Scrum Master coaches the Development Team on the value of resolving conflicts. Leaving conflicts unresolved can impact the Scrum values of openness and respect diminishing trust. Lower trust levels will impact the Scrum Team's effectiveness and can cause impediments in the future. It is the responsibility of the Scrum Master to remove impediments that hinder the team through conflict resolution and facilitation.

NEW QUESTION 110

Which of the following is required in Scrum?

- A. Sprint Retrospective
- B. All Development Team members answering the three QUESTION NO:s at the Daily Scrum
- C. Sprint Burndown Chart
- D. User Stories
- E. All of the above

Answer: A

NEW QUESTION 112

The Scrum values promote Development Teams be cross-functional and have all the skills needed to build a product within the team. While starting Scrum, what would be the advantages of keeping the existing component teams (e.g. design, database, backend, frontend)?

- A. Component teams would have all the skills needed to focus on their specific technical layer.
- B. Component teams generally have all the skills needed to deliver shippable Increments that add business value.
- C. Because their productivity is already predictable, they can deliver shippable Increments more quickly than a newly formed team.
- D. Because they have been working together for some time, there will be less initial disruption than a newly formed team.
- E. As they begin working, they will discover what works best and how to move towards cross-functional teams.
- F. There is less communication overhead than working in feature teams.

Answer: D

Explanation:

The ones that will be doing the work are the best ones to decide on what Development Team structures work best.

NEW QUESTION 114

Who manages the progress of work during a Sprint?

- A. The Scrum Master
- B. The Product Owner
- C. The Team Lead
- D. The Development Team

Answer: D

Explanation:

The Development Team is self-organized, thus manages and decides how to manage their own progress.

NEW QUESTION 119

Which two scenarios would best represent a self-organizing Development Team? (Choose two.)

- A. The Development Team members are strictly focused on the work within their functional role and always handing off the work to other roles in a timely matter.
- B. Management works with the Scrum Master to optimize the Development Team's progress during the Sprint.
- C. Development Team members collaboratively select and re-plan their work throughout the Sprint.
- D. The Development Team invites external people to the Sprint Planning to help them create a complete and detailed Sprint Backlog.
- E. The Development Team creates its own Sprint Backlog, reflecting all work that is part of the Definition of Done.

Answer: CE

Explanation:

A self-organized team is a team that is able to self-manage and decide how best to accomplish their work.

NEW QUESTION 122

The three pillars of empirical process control consist of:

- A. Planning, Inspection, Adaptation
- B. Inspection, Transparency, Adaptation
- C. Planning, Demonstration, Retrospective
- D. Respect For People, Kaizen, Eliminating Waste

Answer: B

Explanation:

These three pillars uphold every implementation of the empirical process control. Without them, Scrum cannot be implemented as intended.

NEW QUESTION 125

The Development Team can cancel the Sprint:

- A. When the availability of the Product Owner is less than expected.
- B. When the requirements for the work to be done become unclear or not understood.
- C. It can't
- D. Only Product Owners can cancel Sprints.
- E. When the Sprint Backlog is determined to be unachievable.
- F. When too many impediments occur.

Answer: C

NEW QUESTION 126

During a Product Backlog refinement meeting, the Product Owner introduces a business objective that will be worked on for the next several Sprints. The Product Owner envisions several key features necessary to be delivered in order to meet the business objective. As the features will be using sensitive user data it will be subjected to external security audits. These non-functional security requirements were not applicable to previous Increments.

What are two good ways the Development Team can handle these high-security concerns? (Choose two.)

- A. They should be planned in parallel Sprints so not to disrupt the Development Team during feature developmen
- B. After security concerns have been finalized, they will be applied to the work that is already completed before new feature development can continue.
- C. They should be handled in a parallel Sprint by a separate security team so that security can be resolved through application enhancements without impacting the functional development.
- D. A complete list of security-related Product Backlog items needs to be created before starting a new Sprint.
- E. During the Sprint Retrospective, the Development Team assesses how to add these expectations to their Definition of Done so every future Increment will meet these security requirement
- F. If needed they can work with external specialists to better understand the requirements.
- G. They are added to the Product Backlog and addressed throughout the next Sprints, combined with creating the business functionality in those Sprints, no matter how small the business functionality.

Answer: DE

Explanation:

In order to ensure transparency, work that must be done to the product must be visible in either the Product Backlog or the Definition of Done.

NEW QUESTION 131

Which of the following are feedback loops in Scrum?

- A. Daily Scrum, Sprint Review, and Sprint Retrospective
- B. Daily Standup, Sprint Review, and Sprint Retrospective
- C. Release Planning, Daily Scrum, and Sprint Review
- D. Grooming, Daily Status, and Sprint Review

Answer: A

NEW QUESTION 135

When multiple Scrum Teams are working from the same Product Backlog, also known as scaled Scrum, they must still work in conformance of the Scrum guide.

- A. True
- B. False

Answer: A

Explanation:

Scrum is a framework with built in flexibility to support multiple Scrum Teams working on a single product.

NEW QUESTION 136

Three Development Teams are currently building a single product and pulling work from the same Product Backlog. All three teams have identified that they will need Dan, a database specialist, to work full time in their team for the next several Sprints.

What should Steven, the Scrum Master, do to solve this potential problem?

- A. Manage the items in the Sprint Backlogs so that Dan can be utilized evenly for each team.
- B. Assign Dan to the team with the most urgent tasks first and then move him to the next team and so on until the required support is completed.
- C. Facilitate a discussion with all Development Teams on how they want to deal with this issue, and help them implement their preferred solution.
- D. Ask Dan to work with the HR department to recruit and hire additional database specialist
- E. In the meantime, have the Product Owner move items that do not depend on Dan to the top of the Product Backlog.

Answer: C

Explanation:

As a servant/leader, the Scrum Master facilitates conversations through open ended QUESTION NO:s in order to help the team members make the best possible decisions according to what is known at the time. He/she does not approve or reject team decisions but ensures the team stays within the boundaries of the Scrum framework.

NEW QUESTION 138

Which three statements best describe the purpose of having a Definition of Done? (Choose three.)

- A. It is a checklist to monitor the Development Team member's progress on a task.
- B. It provides guidance to the Development Team when they are forecasting their Sprint Backlog during the Sprint Planning.
- C. As the Development Team is doing the work, it provides guidance on the remaining work needed to create the potentially shippable Increment by the end of the Sprint.
- D. It helps the Development Team defer any pending work to subsequent Sprints.
- E. It creates transparency and provides a common understanding of the 'done' state of the Increment at the Sprint Review.
- F. It helps the Scrum Team decide how much time is needed before the Sprint can end.

Answer: BCE

Explanation:

When a Product Backlog item or an Increment is described as 'Done', everyone must understand what 'Done' means. Scrum Team members must have a shared understanding of what it means for work to be complete, to ensure transparency and is used to assess when work is complete on the product Increment. This Definition of Done provides the team guidance on what it takes to make the increment shippable.

NEW QUESTION 141

Select two ways in which Scrum uses time-boxing to promote self-organization? (Choose two.)

- A. Time-boxes ensures that the Development Team commits to completing the items in the Sprint Backlog by the end of the Sprint.
- B. Time-boxes encourage the ones closest to the problem make the best possible decisions within the time- frame given the current situation.
- C. Time-boxes can help teams plan how many additional Sprints is needed for User Acceptance testing.
- D. Time-boxes helps everybody concentrate on the same problem at the same time.

Answer: BD

Explanation:

Time-boxes help everyone focus on the work of the Sprint and personally commit to achieving the goals of the Scrum Team.

NEW QUESTION 143

What would likely happen if management only changed the organization's current terminology to fit Scrum without the proper understanding and support of Scrum as defined in the Scrum Guide?

- A. Very little change will happen as the vocabulary in Scrum is specifically defined for implementing Scrum.
- B. The organization may not realize the real benefits of Scrum as there would be no real change on the way the teams work.
- C. Organizations may feel less stressed as the behaviors would remain familiar to management.
- D. All answers apply.

Answer: D

Explanation:

The defined terminology in Scrum was selected, designed, and defined specifically for supporting the Scrum Framework. Understanding the differences between traditional methods and the Scrum Framework will help move teams in the right direction in Scrum adoption.

NEW QUESTION 148

Why is it important that there is only one Product Owner per product?

- A. The Scrum Master knows who will be his back-up whenever he is unavailable, it saves the organization time and money, and the Development Team knows who to request tasks from.
- B. It is clear who is accountable for the ultimate success of the product, the Development Team always knows who determines priorities, and it helps avoid barriers to effective communication and rapid decision-making.
- C. It isn't important as multiple Product Owners can easily share a single Product Backlog.

Answer: B

NEW QUESTION 149

What might be a valid reason for abnormally cancelling a Sprint?

- A. When the Development Team discovers it cannot meet their Sprint commitments.
- B. When the work becomes too difficult for the Development Team.
- C. When the sales department discovers features that add more value than the current work being done.
- D. When the Sprint Goal becomes obsolete.

Answer: D

NEW QUESTION 152

Individual Development Team members have been approaching Steven, the Scrum Master, to complain about Chris. Chris has the most experience on the system they are building. He often QUESTION NO:s the choices team members make in design and architecture making them feel bad.

What are two good ways for Steven to address this problem? (Choose two.)

- A. Steven observes whether this topic is raised at the Sprint Retrospective.
- B. If not, then he checks with the team on how comfortable they are with the way the design and architecture is being handled.
- C. Steven suggests facilitating a session with the full team to help resolve the issue.
- D. Steven tells the concerned members that Chris' opinions should be respected as he has the most experience and understands what is best for long term sustainability.
- E. Steven shares his concerns with Chris and the impact on the other team members and that he should be a team player.
- F. Steven takes the time between Sprints to organize a team building session to build a stronger relationship.

Answer: AB

Explanation:

Conflicts are a natural occurrence and the Scrum Master coaches the Development Team on the value of resolving conflicts. Leaving conflicts unresolved can impact the Scrum values of openness and respect diminishing trust. Lower trust levels will impact the Scrum Team's effectiveness and can cause impediments in the future. It is the responsibility of the Scrum Master to remove impediments that hinder the team through conflict resolution and facilitation.

NEW QUESTION 153

In what two ways is velocity and technical debt related? (Choose two.)

- A. They are not related because technical debt is non-functional and velocity is calculated based on end user functionality.
- B. As the Development Team is working on new Product Backlog items, they may unexpectedly run into technical debt that will result the team's velocity dropping.
- C. A Development Team can artificially increase velocity by allowing technical debt to be incurred.
- D. Adding estimates to technical debt will allow the Development Team to maintain constant velocity therefore ensuring predictability.

Answer: BC

Explanation:

Technical debt is a natural occurrence when developing complex products. It is a concept in software development that reflects the implied cost of additional rework caused by choosing an easy solution now instead of using a better approach that would take longer. And how it is managed will depend on the team AND context of the situation.

NEW QUESTION 158

The Sprint length should be:

- A. Short enough to keep the business risk acceptable to the Product Owner.
- B. Short enough to be able to synchronize the development work with other business events.
- C. No more than one month.
- D. All of these answers are correct.

Answer: D

NEW QUESTION 163

Which two behaviors would reflect Servant Leadership in a Scrum Master? (Choose two.)

- A. Facilitating Scrum Events as requested or needed.
- B. Coaching the Development Team, the Product Owner and the organization on how to work empirically.
- C. Staying away from internal Development Team interactions, maximizing their autonomy and freedom.

D. Resolving every impediment for the Development Team.

Answer: AB

Explanation:

The Scrum Master is responsible for serving the team by facilitating and removing impediments to ensure there are minimal roadblocks in the way of the team. The Scrum Master also coaches the Scrum Team and organization to ensure the benefits of Scrum is realized.

“Removing every impediment for the Development Team” may seem like the right thing to do but by doing it this way, the Dev Team’s ability to self-organize would be limited. There are some impediments that will depend solely on the Scrum Master and there will be some that require collaboration with the Dev Team. The former might be working with the finance department to renew services that the team is using. The latter might be lack of skills to make a particular item done. The Scrum Master can coach the team on finding different solutions to resolve the issue.

“Removing impediments” is good. “Removing every impediment for the Development Team” is not so good and sometimes not even possible.

NEW QUESTION 168

When does a Sprint end?

- A. When there is no work remaining in the Sprint Backlog.
- B. When the time-box expires.
- C. It depends on the Product Owner.
- D. Immediately after the conclusion of the Sprint Review.

Answer: B

NEW QUESTION 169

Scrum addresses which of the following four risks in software development? (Choose four.)

- A. The complexity and unpredictability of the requirements.
- B. The stability and complexity of the technology.
- C. The skills and working relationships of the people on the teams.
- D. The timescale of the planned work.
- E. The clear definitions of stages and gateways in the overall governance model.
- F. The definition of incentive and bonus strategies by HR for all team members.

Answer: ABCD

Explanation:

Scrum is a framework within which people can address complex adaptive problems, while productively and creatively developing, delivering, and sustaining complex products of the highest possible value. Scrum employs an iterative, incremental approach to optimize predictability and control risk.

NEW QUESTION 173

The Development Team has suggested to move the Daily Scrum to every other day instead of every day. What is the most appropriate action for the Scrum Master to take?

- A. Learn why the Development Team wants this, coach the team on why the Daily Scrum is important and work with them to improve the outcome of the Daily Scrum.
- B. Support the self-organizing team’s decision.
- C. Have the Development Team members vote on which days the Daily Scrum should occur.

Answer: A

Explanation:

The Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide. Scrum Masters do this by helping everyone understand Scrum theory, practices, rules, and values.

NEW QUESTION 176

What is management’s role in Scrum?

- A. To provide the necessary environment and support needed as defined by the Scrum Guide by providing insights and resources that help the Scrum Teams continue moving forward.
- B. Identifying and removing people that are performing poorly.
- C. Monitoring skill levels of the Development Team.
- D. Monitoring the Development Team’s velocity.

Answer: A

Explanation:

Getting the support from the business side helps facilitate the changes that fosters empiricism, self- organization, bottom-up intelligence, and intelligent release of software.

NEW QUESTION 179

Currently, your engineering department is organized in siloed teams that specialize by function (for example, design, front-end, back-end, database, and testing). What would you consider when moving away from component teams towards feature teams?

- A. You cannot begin Scrum without have feature team
- B. It is easier to measure and compare performancebetween feature team
- C. Feature teams should have an equal number of team members.
- D. Members within feature teams require compatible personalitie

- E. Feature teams should have a mix of junior and senior member
- F. Tasks are completed more quickly than component teams.
- G. Moving from component teams to feature teams could reduce, productivity in the initial stage
- H. Feature teams have less communication complexit
- I. Getting the support from the business side makes the transition easier.

Answer: C

Explanation:

The initial phase of forming a new team could cause short-term disruption as they need time to discover how to best work together. Because all the skills and competencies are inside the team the communication overhead is reduced. Having an environment that supports the Scrum values reduces complexity.

NEW QUESTION 184

A Scrum Team has been working on a product for several iterations and has an average velocity of 55 units of 'done' work per Sprint. A second team will be added to work on the same product.
What might be the impact on the original team?

- A. Their velocity is likely not affected and will remain at 55.
- B. Their velocity is likely to drop and be less than 55.
- C. Their velocity is likely to rise and be more than 55.

Answer: B

Explanation:

Similar to membership changes within a single Scrum Team, adding or removing additional Scrum Teams working on the same product will impact productivity in the short term. Adding additional teams often go through recognizable stages as they change from being a collection of strangers to a united group with common goals. Bruce Tuckman's Forming, Storming, Norming, and Performing model describes these stages.

NEW QUESTION 186

Part of the team's Definition of "Done" requires creating or updating technical documentation in order to maintain the product and/or features in the future. The team's technical writer will be on vacation during the Sprint.
What should you do?

- A. Encourage the technical writers from other teams to form a specialized team to organize and plan the work for multiple teams.
- B. The Development Team members will write it as they are still responsible for creating the documentation to make the Increment done in conformance with their Definition of "Done."
- C. Wait until the technical writer returns before continuing with related items.
- D. Complete all development work first while adding technical documentation to the Product Backlog to be done in a subsequent Sprint.

Answer: B

Explanation:

All Product Backlog items selected for the Sprint are owned by the Development Team as a whole. Although individual members may work on specific tasks, the Development Team is still accountable for doing the work to deliver a shippable Increment.

NEW QUESTION 191

Which of the following actions is appropriate for a Scrum Master at the Daily Scrum?

- A. Making sure each member has an opportunity to answer all three QUESTION NO:s.
- B. Leading the Daily Scrum.
- C. Teaching the Development Team to keep the Daily Scrum time-boxed to 15 minutes or less.
- D. Updating the Scrum board.
- E. All of the above.

Answer: C

NEW QUESTION 195

On a project where multiple Scrum Teams are working from the same Product Backlog, how should the work be distributed between teams?

- A. The Scrum Team with the highest capacity will pull items from the Product Backlog first.
- B. Each Scrum Team must have an equal amount of User Stories per Sprint.
- C. The Product Owner separates the Product Backlog items for each team.
- D. The Development Teams pull in work from a shared Product Backlog in agreement with the Product Owner and the other teams.

Answer: D

Explanation:

During Sprint Planning the number of items selected from the Product Backlog for the Sprint is solely up to the Development Team regardless of the number of Development Teams working from the same Product Backlog. Only the Development Team can assess what it can accomplish over the upcoming Sprint.

NEW QUESTION 200

What is the Development Team responsible for?

- A. Writing User Stories and ordering the Product Backlog.
- B. Reporting productivity and selecting the Sprint time-box.
- C. Organizing the work required to meet the Sprint Goal and resolving internal team conflicts.

Answer: C

NEW QUESTION 201

.....

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

PSM-II Practice Exam Features:

- * PSM-II Questions and Answers Updated Frequently
- * PSM-II Practice Questions Verified by Expert Senior Certified Staff
- * PSM-II Most Realistic Questions that Guarantee you a Pass on Your First Try
- * PSM-II Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
[Order The PSM-II Practice Test Here](#)
