About ExamBible

[Your Partner of IT Exam](#)

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

Adrian is the project manager of the NHP Project. In her project there are several work packages that deal with electrical wiring. Rather than to manage the risk internally she has decided to hire a vendor to complete all work packages that deal with the electrical wiring. By removing the risk internally to a licensed electrician Adrian feels more comfortable with project team being safe. What type of risk response has Adrian used in this example?

- A. Avoidance
- B. Mitigation
- C. Acceptance
- D. Transference

Answer: D

NEW QUESTION 2

You work as a project manager for BlueWell Inc. You are involved with the project team on the different risk issues in your project. You are using the applications of IRGC model to facilitate the understanding and managing the rising of the overall risks that have impacts on the economy and society. One of your team member wants to know that what is the need to use the IRGC. What will be your reply?

- A. IRGC addresses questions such as the understanding of the secondary impacts of a risk.
- B. IRGC models aim at building robust, integrative inter-disciplinary governance models for emerging and existing risks.
- C. IRGC addresses the development of resilience and the capacity of organizations and people to face unavoidable risks.
- D. IRGC is both a concept and a tool.

Answer: B

NEW QUESTION 3

You are the project manager of the GHY Project for your company. You need to complete a project management process that will be on the lookout for new risks, changing risks, and risks that are now outdated. Which project management process is responsible for these actions?

- A. Risk planning
- B. Risk identification
- C. Risk monitoring and controlling
- D. Risk analysis

Answer: C

NEW QUESTION 4

Lisa is the project manager of the FKN project for her organization. She is working with Sam, the CIO, to discuss a discount the vendor has offered the project based on the amount of materials that is ordered. Lisa and Sam review the offer and agree that while their project may qualify for the discounted materials the savings is nominal and they would not necessarily pursue the savings. Lisa documents this positive risk response in the risk register. What risk response is this?

- A. Enhance
- B. Transference
- C. Share
- D. Acceptance

Answer: D

NEW QUESTION 5

Jeff works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following are the inputs to the identify risks process that Jeff will use to accomplish the task? Each correct answer represents a complete solution. Choose all that apply.

- A. Scope baseline
- B. Activity cost estimates
- C. Risk register
- D. Risk management plan

Answer: ABD

NEW QUESTION 6

Joan is the project manager of the BTT project for her company. She has worked with her project to create risk responses for both positive and negative risk events within the project. As a result of this process Joan needs to update the project document updates. She has updated the assumptions log as a result of the findings and risk responses, but what other documentation will need to be updated as an output of risk response planning?

- A. Scope statement
- B. Lessons learned
- C. Risk Breakdown Structure
- D. Technical documentation

Answer: D

NEW QUESTION 7

_____ analysis is a statistical concept that calculates the average outcome when the future includes scenarios that may or may not happen.

- A. Expert judgment
- B. Expected monetary value

- C. Sensitivity
- D. Modeling and simulation

Answer: B

NEW QUESTION 8

You are the project manager for GHY Project and are working to create a risk response for a negative risk. You and the project team have identified the risk that the project may not complete on time, as required by the management, due to the creation of the user guide for the software you're creating. You have elected to hire an external writer in order to satisfy the requirements and to alleviate the risk event. What type of risk response have you elected to use in this instance?

- A. Avoidance
- B. Exploiting
- C. Transference
- D. Sharing

Answer: C

NEW QUESTION 9

The only output of the perform qualitative risk analysis are risk register updates. When the project manager updates the risk register he will need to include several pieces of information including all of the following except for which one?

- A. Trends in qualitative risk analysis
- B. Risk probability-impact matrix
- C. Watchlist of low-priority risks
- D. Risks grouped by categories

Answer: B

NEW QUESTION 10

Virginia is the project manager for her organization. She has hired a subject matter expert to interview the project stakeholders on certain identified risks within the project. The subject matter expert will assess the risk event with what specific goal in mind?

- A. To determine the level of probability and impact for each risk event
- B. To determine the bias of the risk event based on each person interviewed
- C. To determine the probability and cost of the risk event
- D. To determine the validity of each risk event

Answer: A

NEW QUESTION 10

Stephen is the project manager of the GBB project. He has worked with two subject matter experts and his project team to complete the risk assessment technique. There are approximately 47 risks that have a low probability and a low impact on the project. Which of the following answers best describes what Stephen should do with these risk events?

- A. The low probability and low impact risks should be added to a watchlist for future monitoring.
- B. Because they are low probability and low impact, the risks can be dismissed.
- C. The low probability and low impact risks should be added to the risk register.
- D. Because they are low probability and low impact, Stephen should accept the risks.

Answer: A

NEW QUESTION 15

You are a risk auditor for your company. You are reviewing the contract types a project manager has used in her project. Of the following, which contract type has the most risk for the project manager as a buyer?

- A. Cost plus percentage of costs
- B. Time and material
- C. Cost plus incentive fee
- D. Fixed-price, incentive fee

Answer: A

NEW QUESTION 16

Diana is the project manager of the QPS project for her company. In this project Diana and the project team have identified a pure risk. Diana and the project team decided, along with the key stakeholders, to remove the pure risk from the project by changing the project plan altogether. What is a pure risk?

- A. It is a risk event that is generated due to errors or omission in the project work.
- B. It is a risk event that is created by a risk response.
- C. It is a risk event that only has a negative side, such as loss of life or limb.
- D. It is a risk event that cannot be avoided because of the order of the work.

Answer: C

NEW QUESTION 18

You are the project manager of the GHG project for your company. You have identified the project risks, completed qualitative and quantitative analysis, and created risk responses. You also need to document how and when risk audits will be performed in the project. Where will you define the frequency of risk audits?

- A. Risk response plan
- B. Quality management plan
- C. Risk management plan
- D. Schedule management plan

Answer: C

NEW QUESTION 23

You are the project manager for your organization and you are working with Thomas, a project team member. You and Thomas have been working on a specific risk response for a probable risk event in the project. Thomas is empowered with a risk response and will control all aspects of the identified risk response in which a particular risk event will happen within the project. What title, in regard to risk, is bestowed on Thomas?

- A. Risk expeditor
- B. Risk owner
- C. Risk team leader
- D. Risk coordinator

Answer: B

NEW QUESTION 27

Which of the following components ensures that risks are examined for all new proposed change requests in the change control system?

- A. Risk monitoring and control
- B. Scope change control
- C. Integrated change control
- D. Configuration management

Answer: C

NEW QUESTION 29

Gary is the project manager of his organization. He is managing a project that is similar to a project his organization completed recently. Gary has decided that he will use the information from the past project to help him and the project team to identify the risks that may be present in the project. Management agrees that this checklist approach is ideal and will save time in the project. Which of the following statement is most accurate about the limitations of the checklist analysis approach for Gary?

- A. The checklist analysis approach is fast but it is impossible to build an exhaustive checklist.
- B. The checklist analysis approach saves time, but can cost more.
- C. The checklist analysis approach only uses qualitative analysis.
- D. The checklist is also known as top down risk assessment.

Answer: A

NEW QUESTION 30

You work as a project manager for BlueWell Inc. You are working with Nancy, the COO of your company, on several risks within the project. Nancy understands that through qualitative analysis you have identified 80 risks that have a low probability and low impact as the project is currently planned. Nancy's concern, however, is that the impact and probability of these risk events may change as conditions within the project may change. She would like to know where will you document and record these 80 risks that have low probability and low impact for future reference. What should you tell Nancy?

- A. Risks with low probability and low impact are recorded in a watchlist for future monitoring.
- B. All risks, regardless of their assessed impact and probability, are recorded in the risk log.
- C. Risk identification is an iterative process so any changes to the low probability and low impact risks will be reassessed throughout the project life cycle.
- D. All risks are recorded in the risk management plan.

Answer: A

NEW QUESTION 32

Mike is the project manager of the NNP Project for his organization. He is working with his project team to plan the risk responses for the NNP Project. Mike would like the project team to work together on establishing risk thresholds in the project. What is the purpose of a risk threshold?

- A. It helps to identify those risks for which specific responses are needed.
- B. It is a limit of the funds that can be assigned to risk events.
- C. It is a warning sign that a risk event is going to happen.
- D. It is a study of the organization's risk tolerance.

Answer: A

NEW QUESTION 35

Consider a project with a budget at completion of \$1,345,000 and it is supposed to be completed by today, but it is only 80 percent complete. This project has spent \$1,250,000 to reach this point of completion. What is the schedule variance for this project?

- A. -\$217,500
- B. 20 percent
- C. -\$174,000
- D. -\$269,000

Answer: D

NEW QUESTION 40

You are the project manager for Genpact Inc. You have established quarterly risk management meetings. Which of the following is not a component of a risk management meeting?

- A. Assessing the overall status of risks in the project
- B. Review of risk responses
- C. Assessment or risk
- D. The availability of the individual

Answer: D

NEW QUESTION 45

Mark works as a project manager of the NNH project. In this project, he has created a contingency response that the cost performance index should be less than 0.91. The NNH project has a budget at completion of \$950,000 and is 43 percent complete - though the project should be 50 percent complete. The project has spent \$470,897 to reach the 43 percent complete milestone. What is the project's cost performance index?

- A. 0.95
- B. 0.80
- C. 0.87
- D. 0.91

Answer: C

NEW QUESTION 46

You work as the project manager for Bluewell Inc. You are working on NGQQ Project you're your company. You have completed the risk analysis processes for the risk events. You and the project team have created risk responses for most of the identified project risks. Which of the following risk response planning techniques will you use to shift the impact of a threat to a third party, together with the responses?

- A. Risk acceptance
- B. Risk avoidance
- C. Risk transference
- D. Risk mitigation

Answer: C

NEW QUESTION 47

Fred is the project manager of the CPS project. He is working with his project team to prioritize the identified risks within the CPS project. He and the team are prioritizing risks for further analysis or action by assessing and combining the risks probability of occurrence and impact. What process is Fred completing?

- A. Risk identification
- B. Perform qualitative analysis
- C. Perform quantitative analysis
- D. Risk Breakdown Structure creation

Answer: B

NEW QUESTION 50

David is the project manager of the NKL Project for his organization. He has been asked to create a proposal for a construction project for a client. David realizes that there are several requirements within the SOW and RFP provided by the client that would eliminate his company from bidding on the construction project. David proposed to management that his organization create a partnership with a competitor so that together they could bid on the construction project and qualify for the customer's requirements. What risk response is David proposing to management?

- A. Exploiting
- B. Teaming agreement
- C. Transference
- D. Sharing

Answer: D

NEW QUESTION 51

Fill in the blank with an appropriate phrase.

_____ are activities that are dangerous to complete and manage such as construction, electrical work, or manufacturing.

- A. Pure risks

Answer: A

NEW QUESTION 53

The Identify Risk process determines the risks that affect the project and document their characteristics. Why should the project team members be involved in the Identify Risk process?

- A. They are the individuals that will need a sense of ownership and responsibility for the risk events.
- B. They are the individuals that will have the best responses for identified risks events within the project.

- C. They are the individuals that are most affected by the risk events.
- D. They are the individuals that will most likely cause and respond to the risk events.

Answer: A

NEW QUESTION 56

Your project has several risks that may cause serious financial impact should they happen. You have studied the risk events and made some potential risk responses for the risk events but management wants you to do more. They'd like for you to create some type of a chart that identified the risk probability and impact with a financial amount for each risk event. What is the likely outcome of creating this type of chart?

- A. Risk response
- B. Quantitative analysis
- C. Contingency reserve
- D. Risk response plan

Answer: C

NEW QUESTION 57

You are the project manager for your organization. You are working with your project team to complete the qualitative risk analysis process. The first tool and technique you are using requires that you assess the probability and what other characteristic of each identified risk in the project?

- A. Impact
- B. Risk owner
- C. Cost
- D. Risk category

Answer: A

NEW QUESTION 60

Which of the following statements describe the purpose of an Issue Log? Each correct answer represents a complete solution. Choose all that apply.

- A. It analyzes the impact that the issue is having on the project.
- B. It tracks the actions taken to resolve the issue.
- C. It tracks the outcome of the actions taken.
- D. It addresses the risks that could affect the project.

Answer: ABC

NEW QUESTION 62

Melody is the project manager for her organization. She has created a risk response to conduct more tests on the software her project is creating. The identified risk that prompted this response was that the software is mission-critical and must be flawless before it can be put into product. What type of a risk response has Melody used in this scenario?

- A. Mitigation
- B. Enhance
- C. Transference
- D. Avoidance

Answer: A

NEW QUESTION 66

In addition to monitoring and controlling the project risks for their status and information the risk monitoring and controlling process accomplishes four key things for a project. Which one of the following is NOT a determination that is made by the risk monitoring and controlling process?

- A. Determines if the project assumptions are still valid
- B. Determines if the risk management policies and procedures are being followed
- C. Determines if the risk contingency reserves should be modified to be in alignment with the current risk assessment
- D. Determines if the project constraints are still valid

Answer: D

NEW QUESTION 67

Lamont is the project manager of a project that has recently finished the final project deliverables. The project customer has signed off on the project deliverable and Lamont has a few administrative closure activities to complete. In the project, there were several large risks that could have wrecked the project but Lamont and his project team found some creative methods to resolve the risks without affecting the project costs or project end date. What should Lamont do with the risk responses he identified during the project's monitoring and controlling process?

- A. Include the risk response in the project risk management plan.
- B. Include the responses in the project management plan.
- C. Nothin
- D. The risk responses are included in the project's risk register already.
- E. Include the risk responses in the organization's lessons learned database.

Answer: D

NEW QUESTION 71

Fred is the project manager of a large project in his organization. Fred needs to begin planning the risk management plan with the project team and key stakeholders. Which plan risk management process tool and technique should Fred use to plan risk management?

- A. Variance and trend analysis
- B. Information gathering techniques
- C. Planning meetings and analysis
- D. Data gathering and representation techniques

Answer: C

NEW QUESTION 74

There are seven risk responses, a project manager can use to address risk events. Which one of the following is a risk response that is appropriate for positive or negative risk events depending on the scenario in the project?

- A. Avoidance
- B. Acceptance
- C. Sharing
- D. Transference

Answer: B

NEW QUESTION 79

You are project manager for ABD project. You, with your team, are working on the following activities:

Probabilistic analysis of a project.

Probability of achieving cost and time objectives. Trends in Qualitative Risk Analysis results.

On which of the following processes are you working on?

- A. Plan Risk Management
- B. Perform Quantitative Risk Analysis
- C. Perform Qualitative Risk Analysis
- D. Identify Risks

Answer: B

NEW QUESTION 80

You are the project manager of the HJK Project for your organization. You and the project team have created risk responses for many of the risk events in the project. Where should you document the proposed responses and the current status of all identified risks?

- A. Stakeholder management strategy
- B. Risk management plan
- C. Risk register
- D. Lessons learned documentation

Answer: C

NEW QUESTION 82

Della works as a project manager for Tech Perfect Inc. She is studying the documentation of planning of a project. The documentation states that there are twenty-eight stakeholders with the project. What will be the number of communication channels for the project?

- A. 378
- B. 300
- C. 28
- D. 250

Answer: A

NEW QUESTION 87

Tom is the project manager of the GGG project for his company. He is working with the project team on the Perform Qualitative Risk Analysis process. Tom is having the project team to review the project scope statement as an input to the qualitative risk analysis process. Why?

- A. The project scope statement must be understood to see the project requirements and the inherent risks of the project.
- B. The project scope statement will reveal the type of project as either a recurrent or first- of-its-kind project.
- C. The project scope identifies the risks associated with project constraints.
- D. The project scope statement must be reviewed to understand the quality requirements and the risks associated with the demand for quality.

Answer: B

NEW QUESTION 88

Rachel is the project manager of the KJH Project for her company. She needs a method to create a quick and simple approach to risk identification to communicate the project risk with the stakeholders. Which one of the following approaches to risk identification should Rachel choose to provide a quick and simple listing of the project risks?

- A. Delphi Technique
- B. Checklist analysis
- C. Assumptions analysis

D. Brainstorming

Answer: B

NEW QUESTION 93

You are the project manager of the GGG project. You have completed the risk identification process for the initial phases of your project. As you begin to document the risk events in the risk register what additional information can you associate with the identified risk events?

- A. Risk potential responses
- B. Risk schedule
- C. Risk owner
- D. Risk cost

Answer: A

NEW QUESTION 94

You work as a project manager for SoftTech Inc. You are working with the project stakeholders to begin the qualitative risk analysis process. You will need all of the following as inputs to the qualitative risk analysis process except for which one?

- A. Stakeholder register
- B. Project scope statement
- C. Risk management plan
- D. Risk register

Answer: A

NEW QUESTION 95

Which of the following are parts of SWOT Analysis? Each correct answer represents a complete solution. Choose all that apply.

- A. Opportunities
- B. Tools
- C. Weaknesses
- D. Threats
- E. Strengths
- F. Optimism

Answer: ACDE

NEW QUESTION 96

Sammy is the project manager for her organization. She would like to rate each risk based on its probability and affect on time, cost, and scope. Harry, a project team member, has never done this before and thinks Sammy is wrong to attempt this approach. Harry says that an accumulative risk score should be created, not three separate risk scores. Who is correct in this scenario?

- A. Harry is correct, because the risk probability and impact considers all objectives of the project.
- B. Harry is correct, the risk probability and impact matrix is the only approach to risk assessment.
- C. Sammy is correct, because organizations can create risk scores for each objective of the project.
- D. Sammy is correct, because she is the project manager.

Answer: C

NEW QUESTION 101

You are working with the project stakeholders to analyze and prioritize their requirements for the project. One of the project requirements is to achieve a high-level of customer satisfaction for the project deliverable. What is the danger in this project requirement?

- A. Achieving customer satisfaction is an assumption and should be documented in the project scope.
- B. Achieving customer satisfaction is a subjective requirement and entails a high level of risk of being successfully accomplished.
- C. Achieving customer satisfaction is a risk as the project manager cannot control how satisfied the customer will be with the project deliverables.
- D. Achieving customer satisfaction should always map to the quality requirements for the project.

Answer: B

NEW QUESTION 103

Which of the following processes involves choosing the alternative strategies, executing a contingency or fallback plan, taking corrective action, and modifying the project management plan?

- A. Monitor and Control risk
- B. Configuration Management
- C. Integrated Change control
- D. Scope Change control

Answer: A

NEW QUESTION 106

There are five outputs of the risk monitoring and controlling process. Which one of the following is NOT an output of the process?

- A. Organizational process assets updates
- B. Risk register updates
- C. Vendor contracts
- D. Change requests

Answer: C

NEW QUESTION 111

Harry is a project manager of a software development project. In the early stages of planning, he and the stakeholders operated with the belief that the software they were developing would work with their organization's current computer operating system. Now that the project team has started developing the software it has become apparent that the software will not work with nearly half of the organization's computer operating systems. The incorrect belief Harry had in the software compatibility is an example of what in project management?

- A. Issue
- B. Assumption
- C. Risk
- D. Constraint

Answer: B

NEW QUESTION 116

You work as a project manager for BlueWell Inc. You have to communicate the causes of risk events to the stakeholders. Which risk diagramming technique you will use to communicate the causes of risk events to project stakeholders?

- A. Project network diagrams
- B. Process flow charts
- C. Ishikawa diagrams
- D. Influence diagrams

Answer: C

NEW QUESTION 118

Which of the following risk responses delineates that the project plan will not be changed to deal with the risk?

- A. Exploitation
- B. Transference
- C. Acceptance
- D. Mitigation

Answer: C

NEW QUESTION 122

Eric is the project manager of the MTC project for his company. In this project a vendor has offered Eric a sizeable discount on all hardware if his order total for the project is more than \$125,000. Right now, Eric is likely to spend \$118,000 with vendor. If Eric spends \$7,000 his cost savings for the project will be \$12,500, but he cannot purchase hardware if he cannot implement the hardware immediately due to organizational policies. Eric consults with Amy and Allen, other project managers in the organization, and asks if she needs any hardware for their projects. Both Amy and Allen need hardware and they agree to purchase the hardware through Eric's relationship with the vendor. What positive risk response has happened in this instance?

- A. Sharing
- B. Exploiting
- C. Transference
- D. Enhancing

Answer: A

NEW QUESTION 125

Ruth is the project manager of ISFH project for her company. This project is forty percent complete and it appears that some risk events are going to happen in the project that will have an adverse affect on the project. Ruth creates a change request regarding the risks. Is this a valid response?

- A. No, change requests should not address risks, only risk response strategies should be issued.
- B. No, change requests should not address pending risks, but only scope changes.
- C. Yes, change requests can be recommended for corrective actions for contingency plans.
- D. Yes, change requests can ask for additional funds to pay for the risk impact.

Answer: C

NEW QUESTION 130

Shelly is the project manager of the BUF project for her company. In this project Shelly needs to establish some rules to reduce the influence of risk bias during the qualitative risk analysis process. What method can Shelly take to best reduce the influence of risk bias?

- A. Group stakeholders according to positive and negative stakeholders and then complete the risk analysis
- B. Determine the risk root cause rather than the person identifying the risk events
- C. Establish risk boundaries
- D. Establish definitions of the level of probability and impact of risk event

Answer: D

NEW QUESTION 133

You are the project manager of the HQQ Project for your company. You are working with your project stakeholders to discuss the risks in the project that can adversely affect the project objectives. You are discussing the possibilities of causes for an identified risk event in your project. Your stakeholder is confused on the difference between causes and risk events. Which of the following is NOT an example of a cause for a project risk?

- A. Limited team members to complete the project work
- B. Quality assurance programs within the company
- C. Work permit requirements
- D. Schedule constraints on the project

Answer: B

NEW QUESTION 137

Examine the figure given below.

What will be the expected monetary value of Risk C?

- A. -\$113,750
- B. \$175,000 if the risk event actually happens
- C. -\$175,000
- D. -\$27,000

Answer: D

NEW QUESTION 141

Your project spans the entire organization. You would like to assess the risk of the project but are worried that some of the managers involved in the project could affect the outcome of any risk identification meeting. Your worry is based on the fact that some employees would not want to publicly identify risk events that could make their supervisors look bad. You would like a method that would allow participants to anonymously identify risk events. What risk identification method could you use?

- A. Delphi technique
- B. Isolated pilot groups
- C. SWOT analysis
- D. Root cause analysis

Answer: A

NEW QUESTION 144

You are the project manager of the HJU project for your company. This project will last for 18 months and has a project budget of \$567,000. Robert, one of your stakeholders, has introduced a scope change request that will likely have an impact on the project costs and schedule. Robert assures you that he will pay for the extra time and costs associated with the risk event. You tell Robert that the change request may affect more areas of the project than just time and cost and that you are worried about the additional risks the change request will bring. What project management component is responsible for evaluating a change request and its impact on all of the project management knowledge areas?

- A. Project change control system
- B. Integrated change control
- C. Risk analysis
- D. Configuration management

Answer: B

NEW QUESTION 147

You are the project manager of the GHG project. You are preparing for the quantitative risk analysis process. You are using organizational process assets to help you complete the quantitative risk analysis process. Which one of the following is NOT a valid reason to utilize organizational process assets as a part of the quantitative risk analysis process?

- A. You will use organizational process assets for risk databases that may be available from industry sources.
- B. You will use organizational process assets for studies of similar projects by risk specialists.
- C. You will use organizational process assets to determine costs of all risks events within the current project.
- D. You will use organizational process assets for information from prior similar projects.

Answer: C

NEW QUESTION 151

Your organization has named you the project manager of the JKN Project. This project has a BAC of \$1,500,000 and it is expected to last 18 months. Management has agreed that if the schedule baseline has a variance of more than five percent then you will need to crash the project. What happens when the project manager crashes a project?

- A. Project risks will increase.
- B. The project will take longer to complete, but risks will diminish.
- C. Project costs will increase.
- D. The amount of hours a resource can be used will diminish.

Answer: C

NEW QUESTION 153

Your project team has identified a project risk that must be responded to. The risk has been recorded in the risk register and the project team has been discussing

potential risk responses for the risk event. The event is not likely to happen for several months but the probability of the event is high. Which one of the following is a valid response to the identified risk event?

- A. Corrective action
- B. Risk audit
- C. Technical performance measurement
- D. Earned value management

Answer: A

NEW QUESTION 156

There are four inputs to the Monitoring and Controlling Project Risks process. Which one of the following will NOT help you, the project manager, to prepare for risk monitoring and controlling?

- A. Work Performance Information
- B. Project management plan
- C. Risk register
- D. Change requests

Answer: D

NEW QUESTION 157

Which of the following diagrams displays sensitivity analysis data?

- A. Fishbone
- B. Influence
- C. Tornado
- D. Cause and effect

Answer: C

NEW QUESTION 162

You work as a project manager for TechSoft Inc. You, the project team, and the key project stakeholders have completed a round of quantitative risk analysis. You now need to update the risk register with your findings so that you can communicate the risk results to the project stakeholders - including management. You will need to update all of the following information except for which one?

- A. Probabilistic analysis of the project
- B. Probability of achieving cost and time objectives
- C. Risk distributions within the project schedule
- D. Trends in quantitative risk analysis

Answer: C

NEW QUESTION 166

You are the project manager of the HJK project for your organization. You and the project team have created risk responses for many of the risk events in the project. A teaming agreement is an example of what risk response?

- A. Transference
- B. Acceptance
- C. Mitigation
- D. Sharing

Answer: D

NEW QUESTION 170

Consider the risk probability-impact matrix in the figure given below:

If Risk B happens in this project, how much will be left in the contingency reserve?

- A. \$193,500
- B. -\$334,500
- C. It depends on the total budget of the project.
- D. \$148,300

Answer: A

NEW QUESTION 171

A high-profile, high-priority project within your organization is being created. Management wants you to pay special attention to the project risks and do all that you can to ensure that all of the risks are identified early in the project. Management has to ensure that this project succeeds. Management's risk aversion in this project is associated with what term?

- A. Quantitative risk analysis
- B. Risk conscience
- C. Risk mitigation
- D. Utility function

Answer: D

NEW QUESTION 174

Your project is an agricultural-based project that deals with plant irrigation systems. You have discovered a byproduct in your project that your organization could use to make a profit. If your organization seizes this opportunity it would be an example of what risk response?

- A. Enhancing
- B. Opportunistic
- C. Positive
- D. Exploiting

Answer: D

NEW QUESTION 179

You are the project manager of QSL project for your organization. You are working with your project team and several key stakeholders to create a diagram that shows how various elements of a system interrelate and the mechanism of causation within the system. What diagramming technique are you using as a part of the risk identification process?

- A. Predecessor and successor diagramming
- B. System or process flowcharts
- C. Cause and effect diagrams
- D. Influence diagrams

Answer: B

NEW QUESTION 180

You are the project manager for your organization. You have determined that an activity is too dangerous to complete internally so you hire licensed contractor to complete the work.

The contractor, however, may not complete the assigned work on time which could cause delays in subsequent work beginning. This is an example of what type of risk event?

- A. Internal
- B. Secondary risk
- C. Pure risk
- D. Transference

Answer: B

NEW QUESTION 185

There are seven risks responses that a project manager can choose from. Which risk response is appropriate for both positive and negative risk events?

- A. Acceptance
- B. Sharing
- C. Transference
- D. Mitigation

Answer: A

NEW QUESTION 189

John works as a project manager for ABD project. He and his team, are working on the following activities:

Relative ranking or priority list of project risks
Watchlists of low priority risk

Trends in Qualitative Risk Analysis results

On which of the following processes is John working on?

- A. Perform Qualitative Risk Analysis
- B. Plan Risk Management
- C. Plan Risk Responses
- D. Perform Quantitative Risk Analysis

Answer: A

NEW QUESTION 190

You are working with your project stakeholders to identify risks within the JKP Project. You want to use an approach to engage the stakeholders to increase the breadth of the identified risks by including internally generated risk. Which risk identification approach is most suited for this goal?

- A. Delphi Technique
- B. SWOT analysis
- C. Assumptions analysis
- D. Brainstorming

Answer: B

NEW QUESTION 193

Risks with low ratings of probability and impact are included on a for future monitoring.

- A. Risk alarm
- B. Watchlist
- C. Observation list
- D. Risk register

Answer: B

NEW QUESTION 198

You are the project manager of the NHK Project. Management wants to know how often your risk identification process will occur during the project. Considering that your project is scheduled to last one year and involves five distinct phases, how often should risk identification take place?

- A. Monthly
- B. Once per project life cycle phase
- C. Quarterly
- D. Vary depending on the situations within the project

Answer: D

NEW QUESTION 200

Which of the following processes looks at the complex web of actors, rules, conventions, processes, and mechanisms concerned with how relevant risk information is collected, analyzed and communicated, and how management decisions are taken?

- A. Risk Communication
- B. IRGC
- C. Risk Response Planning
- D. Risk Governance

Answer: D

NEW QUESTION 203

You are the project manager of the NNH project. In this project you have created a contingency response that the cost performance index should be less than 0.93. The NNH project has a budget at completion of \$945,000 and is 45 percent complete - though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's cost performance index?

- A. 1.06
- B. 0.92
- C. -\$30,647
- D. 0.93

Answer: D

NEW QUESTION 206

Which of the following processes must be repeated after Plan Risk Responses, as well as part of the Monitor and Control Risks, to determine if the overall project risk has been satisfactorily decreased?

- A. Risk Limitation
- B. Perform Qualitative Risk Analysis
- C. Identify Risk
- D. Perform Quantitative Risk Analysis

Answer: D

NEW QUESTION 211

You are the project manager of a large, high-profile project in your organization. You have realized that politics within your company may affect the true identification of risk events within the project. You decide that you'd like to use a method to identify risk events through an anonymous process. Which one of the following risk events will allow you to collect and distribute risk information without the stakeholders knowing what other stakeholders are communicating about the project risk events?

- A. Surveys
- B. Monte Carlo Technique
- C. Checklist analysis
- D. Delphi Technique

Answer: D

NEW QUESTION 212

You are the project manager of the NGQQ Project for your company. To help you communicate project status to your stakeholders, you are going to create a stakeholder register. All of the following information should be included in the stakeholder register except for which one?

- A. Assessment information of the stakeholders' major requirements, expectations, and potential influence
- B. Stakeholder classification of their role in the project
- C. Identification information for each stakeholder
- D. Stakeholder management strategy

Answer: D

NEW QUESTION 213

You are the project manager of the GGH Project in your company. Your company is structured as a functional organization and you report to the functional manager that you are ready to move onto the quantitative risk analysis process. What things will you need as inputs for the quantitative risk analysis of the project in this scenario?

- A. You will need the risk register, risk management plan, permission from the functional manager, and any relevant organizational process assets.
- B. You will need the risk register, risk management plan, cost management plan, schedule management plan, and any relevant organizational process assets.
- C. You will need the risk register, risk management plan, outputs of qualitative risk analysis, and any relevant organizational process assets.
- D. Quantitative risk analysis does not happen through the project manager in a functional structure.

Answer: B

NEW QUESTION 215

You are the project manager for the ABC organization. Your current project has 75 internal stakeholders and 245 external stakeholders. Many of the risks within your project will only affect the internal stakeholders, but several of the identified risk events will affect the external stakeholders. Management would like to know the total number of communication channels in the project. How many communication channels exist in this project?

- A. 245
- B. 51,040
- C. 102,080
- D. 320

Answer: B

NEW QUESTION 218

You work as the project manager for Bluewell Inc. Your project has several risks that will affect several stakeholder requirements. Which project management plan will define who will be available to share information on the project risks?

- A. Risk Management Plan
- B. Stakeholder management strategy
- C. Resource Management Plan
- D. Communications Management Plan

Answer: D

NEW QUESTION 220

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Increased understanding or quantification of the system
- B. Estimating the average outcome
- C. Model development
- D. Decision making or the development of recommendations for decision makers

Answer: ACD

NEW QUESTION 222

Nancy is the project manager of the NHH project. She and the project team have identified a significant risk in the project during the qualitative risk analysis process. Bob is familiar with the technology that the risk is affecting and proposes to Nancy a solution to the risk event. Nancy tells Bob that she has noted his response, but the risk really needs to pass through the quantitative risk analysis process before creating responses. Bob disagrees and ensures Nancy that his response is most appropriate for the identified risk. Who is correct in this scenario?

- A. Bob is correct
- B. Bob is familiar with the technology and the risk event so his response should be implemented.
- C. Bob is correct
- D. Not all risk events have to pass the quantitative risk analysis process to develop effective risk responses.
- E. Nancy is correct
- F. All risks of significant probability and impact should pass the quantitative risk analysis process before risk responses are created.
- G. Nancy is correct
- H. Because Nancy is the project manager she can determine the correct procedures for risk analysis and risk response
- I. In addition, she has noted the risk response that Bob recommends.

Answer: B

NEW QUESTION 227

You are the project manager of the NHQ Project for your company. You have completed qualitative and quantitative analysis of your identified project risks and you would now like to find an approach to increase project opportunities and to reduce threats within the project. What project management process would best help you?

- A. Monitor and control project risks
- B. Create a risk governance approach
- C. Create the project risk register
- D. Plan risk responses

Answer: D

NEW QUESTION 232

You are the project manager of the NNH Project. In this project you have created a contingency response that the schedule performance index should be less than 0.93. The NHH Project has a budget at completion of \$945,000 and is 45 percent complete though the project should be 49 percent complete. The project has spent \$455,897 to reach the 45 percent complete milestone. What is the project's schedule performance index?

- A. -\$37,800
- B. 0.93
- C. 0.92
- D. 1.06

Answer: C

NEW QUESTION 234

You are the project manager of the GYH project for your organization. Management has asked you to begin identifying risks and to use an information gathering technique. Which one of the following risk identification approaches is an information gathering technique?

- A. Root cause analysis
- B. Assumptions analysis
- C. SWOT analysis
- D. Documentation reviews

Answer: A

NEW QUESTION 239

You are the project manager of a large construction project. This project will last for 18 months and will cost \$750,000 to complete. You are working with your project team, experts, and stakeholders to identify risks within the project before the project work begins.

Management wants to know why you have scheduled so many risk identification meetings throughout the project rather than just initially during the project planning. What is the best reason for the duplicate risk identification sessions?

- A. The iterative meetings allow the project manager and the risk identification participants to identify newly discovered risk events throughout the project.
- B. The iterative meetings allow all stakeholders to participate in the risk identification processes throughout the project phases.
- C. The iterative meetings allow the project manager to discuss the risk events which have passed the project and which did not happen.
- D. The iterative meetings allow the project manager to communicate pending risks events during project execution.

Answer: A

NEW QUESTION 244

John is the project manager of the NHQ Project for his company. His project has 75 stakeholders, some of which are external to the organization. John needs to make certain that he communicates about risk in the most appropriate method for the external stakeholders. Which project management plan will be the best guide for John to communicate to the external stakeholders?

- A. Risk Response Plan
- B. Risk Management Plan
- C. Communications Management Plan
- D. Project Management Plan

Answer: C

NEW QUESTION 245

Pete works as a project manager for BlueWell Inc. The Management has told him that he must implement an agreed-upon contingency response if the cost performance index in his project is less than 0.90. Consider that Pete's project has a budget at completion of \$275,000. His project is 65 percent complete and he has spent \$175,000 to date. However, Pete is scheduled to be 78 percent complete. What is the cost performance index for this project to determine if the contingency response should happen?

- A. 1.02
- B. 0.96
- C. 0.90
- D. 0.89

Answer: A

NEW QUESTION 249

Marsha is the project manager of the NHQ Project. There's a risk that her project team has identified, which could cause the project to be late by more than a month. Marsha does not want this risk event to happen so she devises extra project activities to ensure that the risk event will not happen. The extra steps, however, will cost the project an additional \$10,000. What type of risk response is this approach?

- A. Enhancing
- B. Exploiting
- C. Mitigation
- D. Transference

Answer: C

NEW QUESTION 253

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Estimating the average outcome
- B. Model development
- C. Decision making or the development of recommendations for decision makers
- D. Increased understanding or quantification of the system

Answer: BCD

NEW QUESTION 257

You are the project manager for your organization. You are working with your key stakeholders in the qualitative risk analysis process. You understand that there is certain bias towards the risk events in the project that you need to address, manage, and ideally reduce. What solution does the PMBOK recommend to reduce the influence of bias during qualitative risk analysis?

- A. Establish the definitions of the levels of probability and impact
- B. Provide iterations of risk analysis for true reflection of a risk probability and impact
- C. Isolate the stakeholders by project phases to determine their risk bias
- D. Involve all stakeholders to vote on the probability and impact of the risk events

Answer: A

NEW QUESTION 259

Bill is the project manager for a project that will last six months and has a budget of \$580,000. In this project a high-risk has been identified with the new materials the project will be using. Bill would like to assign one person, Beth, to be responsible to monitor this risk. Bill assigns Beth the authority to respond to the risk event if it appears in the risk events that is likely to happen. In addition, Bill hires a consultant to work with Beth on this area of the project. In this instance, who is the risk response owner?

- A. Bill, because he is the project manager
- B. Beth, because she has the authority to respond to the risk event
- C. Beth and the consultant are the risk owners
- D. The consultant working with Beth, because this is transference

Answer: B

NEW QUESTION 263

Amy is the project manager for her company. In her current project the organization has a very low tolerance for risk events that will affect the project schedule. Management has asked Amy to consider the affect of all the risks on the project schedule. What approach can Amy take to create a bias against risks that will affect the schedule of the project?

- A. She can create an overall project rating scheme to reflect the bias towards risks that affect the project schedule.
- B. She can filter all risks based on their affect on schedule versus other project objectives.
- C. She can have the project team pad their time estimates to alleviate delays in the project schedule.
- D. She can shift risk-laden activities that affect the project schedule from the critical path as much as possible.

Answer: A

NEW QUESTION 266

Your organization, as part of its enterprise environmental factors, has established risk governance to be implemented in each project. Part of this governance is the reassessment of risks within each project. How much detail and repetition in approach for risks to be reassessed for probability and impact?

- A. Each risk reassessment should go into the same depth as the original risk assessment activity.
- B. The probability and impact of risk event should determine the level of reassessment throughout the project lifecycle.
- C. The amount of detail of repetition that is appropriate depends on how the project progresses relative to its objectives.
- D. The level of detail and reassessment should reflect the priority of the project.

Answer: C

NEW QUESTION 269

There are seven risk responses for any project. Which one of the following is a valid risk response for a negative risk event?

- A. Enhance
- B. Exploit
- C. Acceptance
- D. Share

Answer: C

NEW QUESTION 273

Frank is the project manager of the NHL Project for his company and he is starting the risk identification process for the project. Frank needs to ensure that the correct stakeholders are interviewed as part of risk identification. What document will help Frank to communicate and solicit inputs of the project stakeholders during risk identification?

- A. Project charter
- B. Risk register
- C. Requirements management plan
- D. Stakeholder register

Answer: D

NEW QUESTION 274

You work as the project manager for Bluewell Inc. There has been a delay in your project work that is adversely affecting the project schedule. You decide, with your stakeholders' approval, to fast track the project work to get the project done faster. When you fast track the project, what is likely to increase?

- A. Risks
- B. Costs
- C. Quality control concerns
- D. Human resource needs

Answer: A

NEW QUESTION 275

You are the project manager of the CUL project in your organization. You and the project team are assessing the risk events and creating a probability and impact matrix for the identified risks. Which one of the following statements best describes the requirements for the data type used in qualitative risk analysis?

- A. A qualitative risk analysis requires fast and simple data to complete the analysis.
- B. A qualitative risk analysis requires accurate and unbiased data if it is to be credible.
- C. A qualitative risk analysis encourages biased data to reveal risk tolerances.
- D. A qualitative risk analysis required unbiased stakeholders with biased risk tolerances.

Answer: B

NEW QUESTION 278

You work as a project manager for TechSoft Inc. You are working with the project stakeholders on the qualitative risk analysis process in your project. You have used all the tools to the qualitative risk analysis process in your project. Which of the following techniques is NOT used as a tool in qualitative risk analysis process?

- A. Risk Urgency Assessment
- B. Risk Categorization
- C. Risk Reassessment
- D. Risk Data Quality Assessment

Answer: C

NEW QUESTION 281

You are the project manager of the NKJ Project for your company. The project's success or failure will have a significant impact on your organization's profitability for the coming year. Management has asked you to identify the risk events and communicate the event's probability and impact as early as possible in the project. Management wants to avoid risk events and needs to analyze the cost-benefits of each risk event in this project. What term is assigned to the low-level of stakeholder tolerance in this project?

- A. Mitigation-ready project management
- B. Risk utility function
- C. Risk avoidance
- D. Risk-reward mentality

Answer: B

NEW QUESTION 282

You are the project manager for a construction project. The project involves casting of a column in a very narrow space. Because of lack of space, casting it is highly dangerous. High technical skill will be required for casting that column. You decide to hire a local expert team for casting that column. Which of the following types of risk response are you following?

- A. Acceptance
- B. Avoidance
- C. Mitigation
- D. Transference

Answer: D

NEW QUESTION 286

Fill in the blank with an appropriate phrase. The _____ is the risk or danger of an action or an event, a method or a (technical) process that still conceives these dangers even if all theoretically possible safety measures would be applied.

- A. residual risk

Answer: A

NEW QUESTION 288

Adrian is a project manager for a new project using a technology that has recently been released and there's relatively little information about the technology. Initial testing of the technology makes the use of it look promising, but there's still uncertainty as to the longevity and reliability of the technology. Adrian wants to consider the technology factors a risk for her project. Where should she document the risks associated with this technology so she can track the risk status and responses?

- A. Project scope statement
- B. Risk register
- C. Project charter
- D. Risk low-level watch list

Answer: B

NEW QUESTION 290

Donna is the project manager of the QSD Project and she believes Risk Event D in the following figure is likely to happen. If this event does happen, how much will Donna have left in the risk contingency reserve if none of the other risk events have happened?

- A. \$35,000
- B. \$41,700
- C. \$14,000
- D. \$6,700

Answer: D

NEW QUESTION 291

You are the project manager of RTF project for your organization. You are working with your project team and several key stakeholders to create a diagram that shows causal factors for an effect to be solved. What diagramming technique are you using as a part of the risk identification process?

- A. Cause and effect diagrams
- B. System or process flow charts
- C. Predecessor and successor diagramming
- D. Influence diagrams

Answer: A

NEW QUESTION 294

Gary is the project manager for his organization. He is working with the project stakeholders on the project requirements and how risks may affect their project. One of the stakeholders is confused about what constitutes risks in the project. Which of the following is the most accurate definition of a project risk?

- A. It is an uncertain event that can affect the project costs.
- B. It is an uncertain event or condition within the project execution.
- C. It is an uncertain event that can affect at least one project objective.
- D. It is an unknown event that can affect the project scope.

Answer: C

NEW QUESTION 298

You are the project manager of the NGH project for your organization. You want to create a cause-and-effect diagram to help discover the root causes of the risks within the project. Harold, the CIO, recommends that you create an Ishikawa diagram instead. What is an Ishikawa diagram?

- A. It is a graphical representation of situations showing causal influences.
- B. It is the same thing as a root cause diagram.
- C. It shows how various elements of a system interrelate.
- D. It diagrams the risks according to the work breakdown structure including resources.

Answer: B

NEW QUESTION 299

Who is responsible for the stakeholder expectations management in a high-profile, high-risk project?

- A. Project risk assessment officer
- B. Project management office
- C. Project sponsor
- D. Project manager

Answer: D

NEW QUESTION 302

You are completing the qualitative risk analysis process with your project team and are relying on the risk management plan to help you determine the budget, schedule for risk management, and risk categories. You discover that the risk categories have not been created. When should the risk categories have been created?

- A. Create work breakdown structure process
- B. Plan risk management process
- C. Risk identification process
- D. Define scope process

Answer: B

NEW QUESTION 304

Henry is the project manager of the QBG Project for his company. This project has a budget of \$4,576,900 and is expected to last 18 months to complete. The CIO, a stakeholder in the project, has introduced a scope change request for additional deliverables as part of the project work. What component of the change control system would review the proposed changes' impact on the features and functions of the project's product?

- A. Scope change control system
- B. Cost change control system
- C. Configuration management system
- D. Integrated change control

Answer:

C

NEW QUESTION 307

Harold is the project manager of a large project in his organization. He has been actively communicating and working with the project stakeholders. One of the outputs of the manage stakeholder expectations process can actually create new risk events for Harold's project. Which output of the manage stakeholder expectations process can create risks?

- A. Project document updates
- B. Change requests
- C. Organizational process assets updates
- D. Project management plan updates

Answer: B

NEW QUESTION 308

You are the project manager of the GHY project for your organization. You are working with your project team to begin identifying risks for the project. As part of your preparation for identifying the risks within the project you will need eleven inputs for the process. Which one of the following is NOT an input to the risk identification process?

- A. Quality management plan
- B. Cost management plan
- C. Stakeholder register
- D. Procurement management plan

Answer: D

NEW QUESTION 311

Mary is the project manager for the BLB project. She has instructed the project team to assemble, to review the risks. She has included the schedule management plan as an input for the quantitative risk analysis process. Why is the schedule management plan needed for quantitative risk analysis?

- A. Mary will schedule when the identified risks are likely to happen and affect the project schedule.
- B. Mary will utilize the schedule controls and the nature of the schedule for the quantitative analysis of the schedule.
- C. Mary will use the schedule management plan to schedule the risk identification meetings throughout the remaining project.
- D. Mary will utilize the schedule controls to determine how risks may be allowed to change the project schedule.

Answer: B

NEW QUESTION 316

You are the project manager of the NHQ project for your company. You are working with your project team to complete a risk audit. A recent issue that your project team responded to, and management approved, was to increase the project schedule because there was risk surrounding the installation time of a new material. Your logic was that with the expanded schedule there would be time to complete the installation without affecting downstream project activities. What type of risk response is being audited in this scenario?

- A. Parkinson's Law
- B. Mitigation
- C. Avoidance
- D. Lag Time

Answer: C

NEW QUESTION 319

Sam is the project manager of a construction project in south Florida. This area of the United States is prone to hurricanes during certain parts of the year. As part of the project plan Sam and the project team acknowledge the possibility of hurricanes and the damage the hurricane could have on the project's deliverables, the schedule of the project, and the overall cost of the project. Once Sam and the project stakeholders acknowledge the risk of the hurricane they go on planning the project as if the risk is not likely to happen. What type of risk response is Sam using?

- A. Active acceptance
- B. Passive acceptance
- C. Avoidance
- D. Mitigation

Answer: B

NEW QUESTION 320

What project management plan is most likely to direct the quantitative risk analysis process for a project in a matrix environment?

- A. Risk analysis plan
- B. Staffing management plan
- C. Human resource management plan
- D. Risk management plan

Answer: D

NEW QUESTION 324

You work as the project manager for BlueWell Inc. You are monitoring the project performance. You want to make a decision to change the project plan to eliminate a risk in order to protect the project objectives. Which of the following strategies will you use to tackle the risk?

- A. Risk mitigation
- B. Risk avoidance
- C. Risk acceptance
- D. Risk transference

Answer: B

NEW QUESTION 326

A project manager must have certain interpersonal skills to communicate with stakeholders and manage their expectations of the project work. Which of the following interpersonal skills has been identified as one of the biggest reasons for project success or failure?

- A. Motivation
- B. Communication
- C. Influencing
- D. Political and cultural awareness

Answer: B
