Associate countries and regions with online stores in Commerce headquarters

Countries and regions are associated with online stores (also known as online channels) in Commerce headquarters. When you associate a country or region with an online store, you indicate that customers who reside in that country or region should view the site that is mapped to that online store. You can associate multiple countries and regions with an online store as you require.

To associate countries or regions with an online store, follow these steps.

? Go to Retail and Commerce > Channels > Online stores, or search for "online stores" in the search box.

? Open the online channel that you want to associate countries or regions with.

? On the Countries/Regions FastTab, select Add, and then, in the Country/region field, select the country or region.

? Repeat these steps for any other countries or regions that you want to associate with the online channel.

Box 2: Set up geo detection

The geo detection and redirection feature in Dynamics 365 Commerce lets you detect your customers' geographic locations and then use that information to recommend the site that is most appropriate for the country or region where each customer lives.

**Answer: A**

#### Explanation:

Toolkit Overview: RSAT Integration Testing

RSAT (regression suite automation tool) will get a new improvement where our RSAT tool should be able to support an end-to-end integration scenario. It will allow run sessions for third-party applications that run before or after Finance and Supply Chain Management is run. Essentially, you will be able to trigger an integration in some portal and then verify the outcomes in Finance and Supply Chain Management. It's the same as if you were doing with the C# NUnit framework and selenium WebDrivers, although, in this case, you likely won't require coding. The main idea is to be able to do integration scenario testing and be able to do that without developer help. Since development can be expensive it's not something that customers really aim to do. We will get this feature in general availability and in public preview within the next few months, so stay tuned and follow the latest Microsoft improvements so you don't miss out!
