NEW QUESTION 20

- (Exam Topic 3)

You have a Microsoft Teams Phone deployment that contains common area phones located in a public lobby. You need to enable Advanced calling features on all the common area phones.

What should you configure from the Microsoft Teams admin center?

- A. a customization policy
- B. a configuration profile
- C. a calling policy
- D. a policy package

Answer: B

Explanation:

Set up common area phones for Microsoft Teams Set policies for common area phones

Use policies to control which features are available to users on common area phones. Set up Advanced calling on common area phones (optional)

By default, the basic calling experience will be on the common area phone's home screen, but you can turn on an advanced calling experience.

To use these advanced calling features on supported Teams phone device models, you can turn on the Advanced calling toggle in the Teams admin center or on your Teams phone device that is signed into your Teams Shared Devices account.

Turning on advanced calling capabilities requires you to purchase hardware models that can support all required capabilities.

* 1. Turn on Advanced calling in Teams admin center

* 2. Sign into the Teams admin center with a Microsoft 365 admin account.

* 3. From the left-side menu, navigate to Teams devices > Phones > and select the Configuration profiles tab.

* 4. From the list, select the configuration profile assigned to your common area phone.

* 5. Under the Calling settings section, find the Advanced calling toggle.

* 6. Turn on the toggle.

* 7. At the bottom of the page, select the Save button. Incorrect:

Not C: Calling policies

Use calling policies to enable private calls, using call forwarding, or simultaneous ring on common area phones.

Note: A common area phone is typically placed in an area like a lobby or another area that is available to many people to make a call: a reception area, lobby, or conference phone. Common area phones are signed in with accounts tied to a Microsoft Teams Shared Devices license.

You verify that Modern authentication is enabled in Teams Rooms. What prevents you from signing in?

- A. The Microsoft Authenticates app is not configured for the Teams Rooms account
- B. The Teams Rooms account is not licensed for Microsoft intune.
- C. Teams Rooms must be domain joined first.
- D. MFA is unsupported In reams Rooms.

Answer: D

NEW QUESTION 39

- (Exam Topic 3)

You have a Teams Phone deployment that uses Direct Routing on a single Session Border Controller (SBC). Users report that outbound PSTN calls are failing, but inbound PSTN calls are successful. When you review the SBC logs, you discover that Microsoft is responding to SIP option requests, but is NOT sending SIP option requests. What is the cause of the issue?

- A. The online PSTN gateway is disabled.
- B. An SBC certificate is expired.
- C. An external DNS entry is missing from the FQDN of the SBC.
- D. The phone numbers of the users are defined by running the New-csTeamsUnassignedNuirtoer Treatment cmdlet.

Answer: A

Explanation:

Issues that affect outbound direct routing calls

You might experience various issues when you use Direct Routing to make outbound calls from a Microsoft Teams client to a Session Border Controller (SBC).

These issues include the following:

An incorrect caller ID is displayed to the call recipient. A connection to the SBC is not established.

Some users in a tenant are unable to make calls. No users in a tenant are able to make calls.

No users are able to make calls

If none of the users are able to make calls, the calls are probably not reaching the SBC. Check for one of the following causes.

Cause 1

Teams has a disabled gateway. Resolution 1

Use the Microsoft Teams admin center to make sure that the gateway that's used by Teams is available and enabled.

When the users are at a specific corporate site, you need to prevent the users from adding video during calls. Solution: You run New-CsTeamsNetworkRoamingPolicy and set the -AllowiPvideo parameter to \$False. Does

this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 61

- (Exam Topic 3)

You create a network region Region1 in Microsoft Teams.

You are adding a network site to Region1. The site has a 1.5-Mb connection. You need to ensure that all users at the site have a good voice experience. What should you do?

- A. Create and assign a Teams Network Roaming Policy that has IP video disabled.
- B. Assign the Region1 users a meeting policy that has a media bit rate of 1,500 Kbps.
- C. Run the Microsoft 365 network connectivity test tool.

NEW QUESTION 63

- (Exam Topic 3)

You are deploying Teams Rooms to a Windows device.

You need to prevent meeting attendees from using room remote in the Teams mobile app. What should you configure in the Microsoft Teams admin center?

- A. Supported meeting mode
- B. Coordinated Meetings
- C. Front row experience
- D. Bluetooth beaconing

Answer: D

Explanation:

Manage a Microsoft Teams Rooms console settings remotely with an XML configuration file

This article discusses remote management of the default settings used by a Microsoft Teams Rooms device. It discusses how to create a master settings file and links to discussions of how to place them as needed on Teams Rooms.

It is possible for you to change default settings of Teams Rooms by updating a master XML file and sending copies to the remote Teams Rooms devices.

Create an XML configuration file

Any text editor can be used to create a settings file. The XML Elements table explains the elements shown in this sample SkypeSettings.xml (required file name) configuration file.

```
<SkypeSettings>
<AutoScreenShare>1</AutoScreenShare>
<HideMeetingName>1</HideMeetingName>
<AutoExitMeetingEnabled>true</AutoExitMeetingEnabled>
<AudioRenderDefaultDeviceVolume>70</AudioRenderDefaultDeviceVolume>
* Details omitted*
```

```
<AllowRoomRemoteEnabled>true</AllowRoomRemoteEnabled>
```

 Incorrect:

Not B: If you have one or more Microsoft Teams Rooms on Windows devices or Surface Hubs in a meeting room, you can set up Coordinated Meetings.

Coordinated Meetings lets you set up your Teams Rooms on Windows devices and Surface Hubs so that when you join a meeting on one device, the other devices in the room are also joined to the same meeting. You can configure your cameras, speakers, and microphones so that the ones that give participants the best experience are enabled while others are disabled. This avoids the dreaded echo and feedback noise participants can experience when adding multiple devices to a meeting.

Not C: Front Row layout in Teams Rooms— Additional functionality with the Front Row experience, a layout for hybrid meetings that enables users to see remote attendees at eye level and on dual screens. Users can see Chat in the right panel and participants with raised hands on the left panel. And, Meeting Chat is added in the Gallery, Large Gallery, and Together Mode layouts.

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses configuration profiles to manage Microsoft Teams-certified IP phones. The Standard configuration profile is applied to the IP phones.

The help desk receives reports that several user phones fail to lock automatically after the timeout period. You need to verify whether the configuration profile is applied to the problematic phones.

Solution: From Teams Devices in the Microsoft Teams admin center, you select Phones select the Configuration profiles tab, select the Standard Phone Policy, and select Assigned devices.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 72

- (Exam Topic 3)

You have a Microsoft Teams Phone deployment.

You need to configure users to include a toll free phone number as part of their meeting invites. Which type of policy should you configure?

- A. voice routing
- B. audio conferencing
- C. customization
- D. meeting

Answer: B

Explanation:

Initial assignment of phone numbers that are included in the meeting invites for users

The phone numbers included in the meeting invites of users enabled for Audio Conferencing are defined in the TeamsAudioConferencingPolicy that's assigned to users. When a TeamsAudioConferencingPolicy is assigned to a user, all toll and toll-free phone numbers added in the policy are included in meeting invites for users who have that policy. If a user is assigned a TeamsAudioConferencingPolicy and there aren't any toll or toll-free phone numbers added to the policy, then in that case the phone numbers that appear in the meeting invites of these users are defined by the default conferencing toll phone number and the default conferencing toll-free phone number in each individual user's settings.

NEW QUESTION 80

- (Exam Topic 3)

Your company plans to use Microsoft Teams for collaboration and communication. You need to deploy Microsoft Surface Hub devices to Teams meeting rooms.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Deploy the provisioning package to Surface Hub

Install Windows Configuration Designer

Run the `Enable-CsMeetingRoom` cmdlet

Install the Windows Installation Assistant

Use the Provision Surface Hub devices wizard

Configure a Teams update policy

Save the provisioning package to a USB device

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Install Windows Configuration Designer
Step 2: Use the Provision Surface Hub devices wizard Create provisioning packages for Surface Hub
Provisioning packages allow you to automate deployment of key features, helping deliver a consistent experience across all Surface Hubs in your organization. Using Windows Configuration Designer (WCD) on a separate PC, you can complete the following tasks:
Enroll in Active Directory or Azure Active Directory Create a device administrator account
Add applications and certificates Configure proxy settings
Configure Configuration Service Provider (CSP) settings
Overview
On a separate PC running Windows 10 or Windows 11, install Windows Configuration Designer from the Microsoft Store.
Select Provision Surface Hub devices to configure common settings using a wizard. Or select Advanced provisioning to view and configure all possible settings.
Create the provisioning package and save it to a USB drive.
Deploy the package to your Surface Hub during first-run setup, or through the Settings app. Step 3: Save the provisioning package to a USB device
Step 4: Deploy the provisioning package to Surface Hub Reference:

Moderate Q&A:

Start and stop the live event:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Organizer Invite attendees
Live Event Roles and Responsibilities
Event organizers can invite others to the event and grant them one of two roles: Producer or Presenter. Both roles have different access and responsibilities for the Live Event. You can have multiple producers and presenters (up to 250, though only the last 10 who have spoken will appear in the producer view list).
Box 2: Presenter Moderate Q&A Presenter Capabilities
Please see Microsoft's documentation for additional details on presenter capabilities.
Share video, your screen, or other content that the producer can then send to the Live Event

Sharing of computer audio in a Live Event is current only support on the Windows client of MS Teams. Mute other presenters

Chat with other producers and presenters Moderate Q&A

Manage the event recording and reports Box 3: Producer

Start and stop the live event Producers

Producers have access and control over nearly all settings and details for an event. However, especially in larger Live Events, a producer tends to have the more supportive role of managing which video feeds, shared screens, or other content is presented in the event.

Consider limiting the number of producers for your event. Not only is the producer interface more complex than the presenter's, but having more producers than needed can make coordination more difficult.

Producer Capabilities

Please see Microsoft's documentation for additional details on producer capabilities.

Select video feeds or other content shared by presenters or producers and send them to the event Mute presenters or producers individually or collectively

Chat with other producers and presenters Start and end the Live Event
