Microsoft

Exam Questions PL-100

Microsoft Power Platform App Maker

NEW QUESTION 1

DRAG DROP - (Topic 4)

You are developing an app that warehouse workers will run on their phones to perform inventory counts.

You need to design the app.

Which type of control should you use? To answer, drag the appropriate control types to the correct requirements. Each control type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection presents a complete solution.

Control types

| Text box |
| Combo box |
| Slider |
| Radio |

Answer Area

Requirement	Control type
Capture decimal numbers.	
Select multiple products from a list.	
Set the status of a product.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Control types

| Text box |
| Combo box |
| Slider |
| Radio |

Answer Area

Requirement	Control type
Capture decimal numbers.	Text box
Select multiple products from a list.	Combo box
Set the status of a product.	Radio

NEW QUESTION 2

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Use a Common Data Service workflow with a PowerQuery on the data entity.

Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:

Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-

NEW QUESTION 3
HOTSPOT - (Topic 4)
You are configuring security to enable users to analyze data by using Microsoft Excel templates.
You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

You need to ensure that User1 can see the pre-configured example templates.
Which permission should you change?

Bulk Edit
Export to Excel
Read on Document Template
Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template.
Which permission should you change?

Bulk Edit
Export to Excel
Read on Document Template
Read on Personal Document Template

A. Mastered
B. Not Mastered

Answer: A

Explanation:

You need to ensure that User1 can see the pre-configured example templates.
Which permission should you change?

Bulk Edit
Export to Excel
Read on Document Template
Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template.
Which permission should you change?

Bulk Edit
Export to Excel
Read on Document Template
Read on Personal Document Template

NEW QUESTION 4
DRAG DROP - (Topic 4)
You create multiple apps as part of an unmanaged solution. You need to move the apps to another environment.
You need to pick the appropriate solution type for each requirement.
Which types of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Requirement	Solution type
Edit existing components of the solution.	Unmanaged
Add new components to the solution.	Unmanaged
Export the solution.	Managed

Box 1: Unmanaged
Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.
Box 2: Unmanaged
Box 3: Managed
Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

NEW QUESTION 5
HOTSPOT - (Topic 4)
You create a canvas app for a service company.
Using the Tree view, you navigate to the ViewServices screen. The screen contains a form named DetailForm1 that only contains Label controls. You add the People icon to the header of the ViewServices screen as shown below:
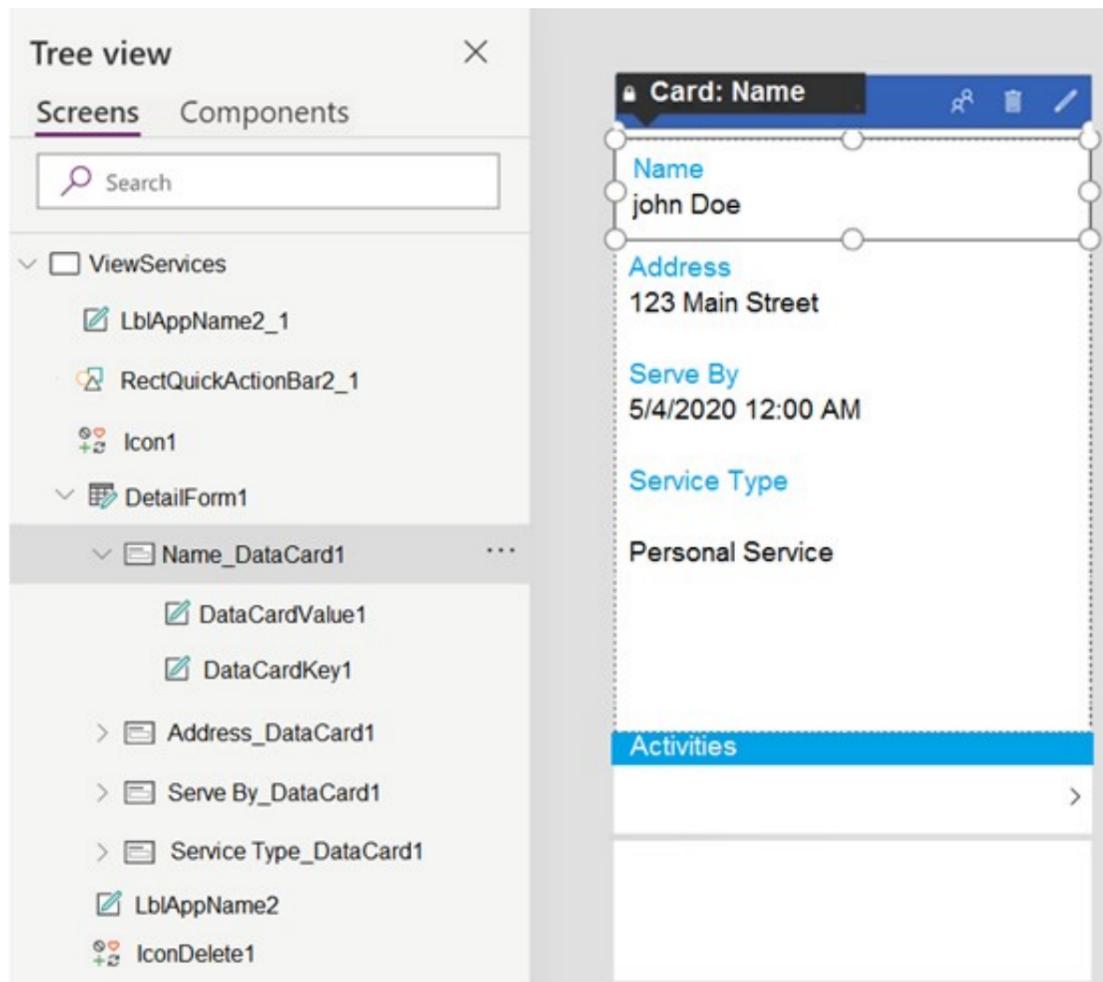

When you select the icon a new Activity form opens. You must set the value of the Name field on the new Activity form to the value of the name field from DetailForm1.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Which formula must you enter in the Name field on the Activity form to default the Name from DetailForm1?

Name_DataCard1.Default
Name_DateCardKey1.Default
Name_DataCardValue1.Default

Which action should you perform on the People icon?

In the On Select property, set the Activity form to Edit mode.
In the On Select property, set the Activity form to View mode.
Move the icon to the Activity form and set the On Select property to the Activity screen.
Move the icon to the DetailForm1 and set the On Select property to open the Activity screen.
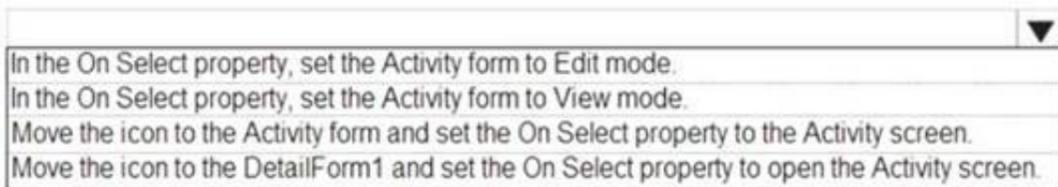

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Name_DataCardValue1.Default
Box 2: Move the icon to the Activity form and set the On Select property to the Activity screen.
The Select function simulates a select action on a control as if the user had clicked or
tapped the control. As a result, the OnSelect formula on the target control is evaluated.

NEW QUESTION 6
- (Topic 4)
You create a canvas app within a Power Platform environment.
You need to identify potential accessibility issues for the canvas app before making the app available to other users.
Which tool should you use?

A. Portal Checker
B. App Checker
C. Solution Checker

Answer: B

Explanation:
Find accessibility issues
* 1. In the upper-right corner of Power Apps Studio, select the icon for the App checker.

* 2. In the menu that appears, select Accessibility.

A list of issues appears, sorted first by severity and then by screen.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker

NEW QUESTION 7
HOTSPOT - (Topic 4)
HOTSPOT
A company is creating an app to manage project status reports.
Users will update a series of controls and click a submit button. The submit button will calculate a risk score for the project and return to the previous screen with that risk score. The risk score will be used in two different forms.
You need to create the formula on the button click. To answer, select the appropriate option in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Action	Formula component
Assign the scope for the variable.	Global variable ▼
	Collection
	Context variable
	Global variable
	Lookups
Separate the calculate action from the previous screen.	; ▼
	'
	;
	|
	-
Go to the next page.	Navigate( ) ▼
	Navigate( )
	Revert( )
	NewForm( )
	SetFocus( )

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Formula component
Assign the scope for the variable.	Global variable ▼
Separate the calculate action from the previous screen.	; ▼
Go to the next page.	Navigate( ) ▼

NEW QUESTION 8
DRAG DROP - (Topic 4)
You ate designing an app to track time off for employees. Employee data, including employee ID number, is stored in an existing data source used by other apps.
Employees must be able to look up their employee ID number and enter time-off start and end dates in the app.
You need to configure the elements of the data source.
Which data elements should you use? To answer, drag the appropriate data elements to the correct data. Each data element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Data elements		Answer Area	
Table		**Data**	**Data element**
View		Time-off dates for all employees	
Record reference		Employee ID number	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Data elements		Answer Area	
Table		**Data**	**Data element**
View		Time-off dates for all employees	Record reference
Record reference		Employee ID number	View

NEW QUESTION 9
DRAG DROP - (Topic 4)
A company has the following divisions: wholesale and retail.
The manufacturer wants to create a single Power BI report to allow users to view data from a Microsoft SQL Server database.
You need to ensure that each user sees data only for the team to which the user is assigned.
How should you secure the report?
To answer, drag the appropriate options to the correct action. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Options		Answer Area	
		Action	**Option**
Power BI Service		Create the team as a role.	Option
Power BI Desktop		Add members to the role.	Option
Common Data Service			
Power Platform Admin center			

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Power BI Desktop
You can define roles and rules within Power BI Desktop. When you publish to Power BI, it also publishes the role definitions.
To define security roles, follow these steps.
? Import data into your Power BI Desktop report, or configure a DirectQuery connection.
?F rom the Modeling tab, select Manage Roles.
? From the Manage roles window, select Create.
? Etc.
Box 2: Power BI Service
After you save your report in Power BI Report Server, you manage security and add or remove members on the server.
* 1. In Power BI Desktop, save the report to Power BI Report Server. You need to use the version of Power BI Desktop for Power BI Report Server.
* 2. In Power BI Report Service, select the ellipsis (…) next to the report.
* 3. Select Manage > Row-level security.

Properties	+ Add Member	🗑 Delete	Search…	
Data sources				
Scheduled refresh	Edit			Group or user ∧
Row-level security				
Security				
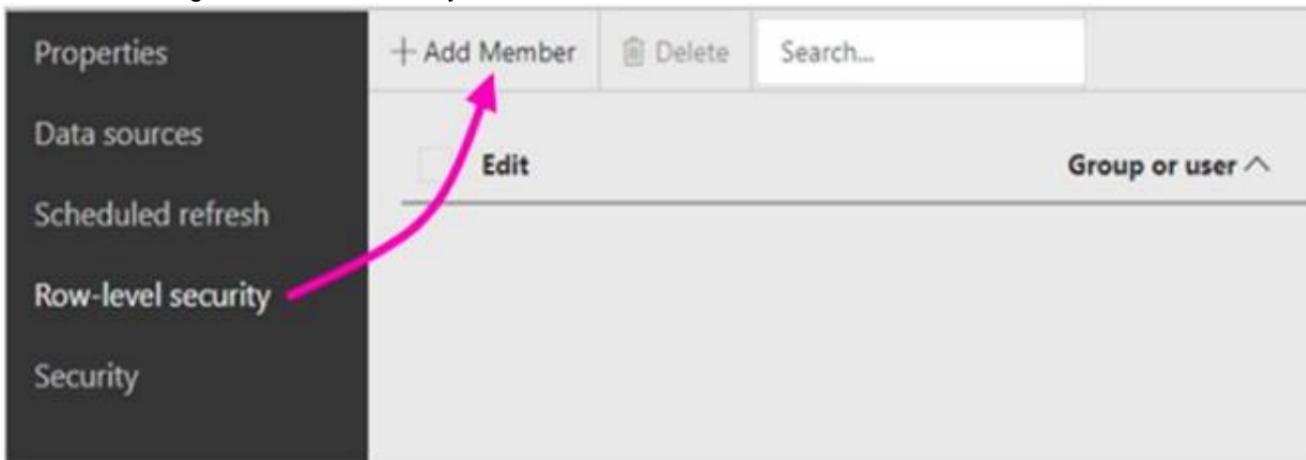

On the Row-level security page, you add members to a role you created in Power BI Desktop.

NEW QUESTION 10
- (Topic 4)
You create a canvas app for technicians at a computer store. You assign technicians cases to work on. The technicians update cases at the end of customer site visit.
The manager wants the technicians to sell warranties to the customers. If a customer agrees to purchase a warranty, technicians use the canvas app to immediately alert the sales team, and then the technician records details about the warranty into the app.
You need to create a flow to alert the sales team. Which type of trigger should you use?

A. Flow button for mobile
B. Office 365 Outlook
C. Common Data Service

Answer: A

Explanation:
Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.
Note: There are many repetitive tasks that we all wish we could run with just a tap of a button. For example, you may need to quickly email your team to remind them to join the daily team sync, or you may want to start a new Visual Studio Codespaces build of your code base after you've been notified that there are no more checkins planned for the day. Button flows allow you to accomplish these and many other tasks simply by tapping a button on your mobile device.

Reference:
https://docs.microsoft.com/en-us/power-automate/button-flow-with-user-input-tokens

NEW QUESTION 10
DRAG DROP - (Topic 4)
You are an app and report maker. You provide visualizations for two departments in an organization.
Each department requires department-specific visualizations:

Department	Requirement
Department1	Provide unstructured answers to free text survey questions.
Department2	Chart real-time data in columns that groups complaints by category, urgency, and status.

You need to create the visualizations.
Which chart type should you use? To answer, drag the appropriate chart type to the correct requirements. Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Chart types

- Multi-series
- Tag
- Stacked column

Requirement

Unstructured answers to free text survey questions.

Real-time column chart that groups complaints by category, urgency, and status.

Chart type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Tag
Box 2: Multi-series
Multi-series charts: Charts that display data with multiple series values mapped to a single category value.

NEW QUESTION 12
DRAG DROP - (Topic 4)
You have a solution that contains a Power Automate flow, an environment variable, and a
Which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Select the managed solution.
- Adjust the version number.
- Publish all changes.
- Select the unmanaged solution.

Answer Area

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Adjust the version number. Step 2: Select the managed solution.
Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.
Step 3: Publish all changes.

NEW QUESTION 13
DRAG DROP - (Topic 4)
: 186 DRAG DROP
A company uses Power Apps.
The company requites a canvas app that connects to the following sources:
• SharePoint list
• Microsoft 365 mailbox

• SOAP API
You need to select connector types.
Which connector types should you use' To answer, drag the appropriate connector types to the correct sources. Each connector type may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Connector types

Standard	Custom

Answer Area

Sources	Connector type
SharePoint list	
Microsoft 365 mailbox	
SOAP API	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Connector types

Standard	Custom

Answer Area

Sources	Connector type
SharePoint list	Standard
Microsoft 365 mailbox	Standard
SOAP API	Custom

NEW QUESTION 16
DRAG DROP - (Topic 4)
You are creating a canvas app that reads and writes to a data source.
You need to configure the app to perform create and update data operations.
Which functions should you use? To answer, drag the appropriate functions to the correct data operations. Each function may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE; Each correct selection is worth one point.

Functions

Patch
Update
AddColumns

Answer Area

Data operation	Function
Replace an entire record.	
Update specific columns.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Functions

Patch
Update
AddColumns

Answer Area

Data operation	Function
Replace an entire record.	Patch
Update specific columns.	AddColumns

NEW QUESTION 17
- (Topic 4)
You create a canvas app that connects to a Common Data Service database. Users report that they do not see any data in the app.
You need to ensure that users can view data in the app. What should you do?

A. Share the app with the users
B. Add a Power Apps license to the users
C. Assign a security role to the users
D. Publish the app

Answer: C

Explanation:
Sharing access to the data in the Common Data Service. The users need permission to access the entities the app uses. To grant them access, you will need to:
* 1. Create a security role

* 2. Assign users to the security role
Note: Common Data Service for Apps has a powerful enterprise grade security model that allows you to group users in security roles and give those roles varying levels of access to entities that some of our most
sophisticated business apps are built on.
Reference:
https://powerapps.microsoft.com/en-us/blog/sharing-a-canvas-app-built-on-top-of-common- data-service/
D18912E1457D5D1DDCBD40AB3BF70D5D

NEW QUESTION 22
- (Topic 4)
Each maker at a company has a separate Common Data Service environment. You are customizing a canvas app. You create two new entities in your environment.
You are leaving for a vacation. Another maker will continue customizing the app in your absence.
You need to transfer the work to the other maker and ensure that you can work on the updated app when you return from your vacation.
What should you export?

A. ununmanaged solution that includes all customizations
B. the default solution
C. a managed solution that includes all customizations
D. the app

Answer: A

Explanation:
Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.
Reference:
https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-

NEW QUESTION 24
HOTSPOT - (Topic 4)
You need to create a model-driven app without using code.
Which tools should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Tool
Select the forms and views that the app will use.	▼ Site Map designer Solution Explorer App designer Entity view
Design the navigation for the app.	▼ Site Map designer Dynamics 365 Admin center Microsoft Azure DevOps

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: App designer
As an app maker, you can create and edit public views by using Power Apps.
Box 2: Site Map designer
Site maps define the navigation for your app. Create a site map for your app with ease by using the tile-based site map designer.

NEW QUESTION 27
DRAG DROP - (Topic 4)
DRAG DROP
A company is creating Power Apps apps for their customer service team.
You must create a final released solution to export to their test environment that cannot be changed in the new environment.
You need to determine the types of solutions to use.
Which type of solution should you use? To answer, drag the appropriate solution types to the correct conditions. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Solution type		Answer Area	
Managed		**Condition**	**Solution type**
Unmanaged		Assign a publisher for the first time	Solution type
		Export the solution	Solution type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Unmanaged
Unmanaged solutions are used in development environments while you make changes to your application.
Box 2: Managed
Managed solutions are used to deploy to any environment that isn't a development environment for that solution.

NEW QUESTION 29
- (Topic 4)
You are an app maker. You are creating a canvas app. You do not have access to Power BI.
You need to add charts to the app.
Which three chart types can you add directly to the canvas app? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. pie
B. area
C. funnel
D. column
E. line

Answer: ADE

Explanation:
You can use line charts, pie charts, and bar charts to display your data in a canvas app. Add a bar chart to display your data:
* 1. On the Home tab, add a screen.
* 2. On the Insert tab, select Charts, and then select Column Chart.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/use-line-pie-bar-chart

NEW QUESTION 31
DRAG DROP - (Topic 4)
DRAG DROP
A commercial bakery uses an inventory system to track ingredients consumed in their production line. The workers use iPads to interact with the system and reserve the ingredients for the next batch. Data from the system is extracted as a .csv file.
You need to create a Power BI report from the extracted data by using only an iPad. Which five actions should you perform in sequence? To answer, move the appropriate
actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Select manual data.		
Log into the Power BI service.		
Install Power BI Desktop and log in.		
Select **Create**.	⊘	
Select **Use first row as headers.**	⊘	
Paste the data.		

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Actions		Answer Area
Select manual data.		Log into the Power BI service.
Log into the Power BI service.		Install Power BI Desktop and log in.
Install Power BI Desktop and log in.		Select **Create**.
Select **Create**.	⊘	Select **Use first row as headers.**
Select **Use first row as headers.**	⊘	Paste the data.
Paste the data.		

NEW QUESTION 32
- (Topic 4)
You create a canvas app.
A user is not able to determine which field currently has focus. You run App checker to identify errors.
You need to verify that the focused border thickness is set to a value greater than zero. Which section of the App checker results should you check?

A. Rules
B. Performance
C. Accessibility
D. Runtime

Answer: C

Explanation:
The Accessibility checker classifies each issue as an error, a warning, or a tip based the issue's severity.
Issues include:
? Focus isn't showing
When the FocusBorderThickness of a control is set to 0. It is good practice to ensure a proper color-contrast ratio between the focus border and the control itself so it's clearly visible.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker

NEW QUESTION 36
- (Topic 4)
A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.
A user updates the Excel file daily with updated data.
The company needs a solution that automatically displays the latest analytics.
You need to create a basic report that contains pie charts that display the most profitable channels.
You need to propose the right solution.
Solution: Microsoft Power Apps canvas app having an Excel file imported into the app and Pie chart control.
Does the solution meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 37
DRAG DROP - (Topic 4)
A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties.
You need to create a solution for the apps.
Which objects should you use? To answer, drag the appropriate objects to the correct to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Component library
Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.
By creating a component library, app makers easily share and update one or more components with other makers.
Component libraries are containers of component definitions that make it easy to: Discover and search components.
Publish updates.
Notify app makers of available component updates.
Box 2: Component
A component can receive input values and emit data if you create one or more custom properties.

NEW QUESTION 38
DRAG DROP - (Topic 4)
DRAG DROP
A company uses data from a publicly available web service. You plan to create a tabular report by using Power 81 Desktop to visualize data from the web service.
The data returned in one column is numeric and must be converted to a corresponding text
You need to create the report and make it available only to co workers.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select

Actions		Answer area
Create a connection to the web service.		
Publish to the Power BI service.		
Create a table and input the data from the web service.	>	
Perform data transformation.	<	
Create the visualization.		
Publish to AppSource.		

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Actions		Answer area
Create a connection to the web service.		Create a table and input the data from the web service.
Publish to the Power BI service.		Perform data transformation.
Create a table and input the data from the web service.	>	Create the visualization.
Perform data transformation.	<	Publish to AppSource.
Create the visualization.		
Publish to AppSource.		

NEW QUESTION 43
- (Topic 4)
A company plans to roll out several Power Apps apps to multiple business units across international operations.
The apps must be managed through an application lifecycle management (ALM) solution to provide a consistent and predictable use experience. All changes to the app must be traceable and documented in a single location. You must be able to revert to a previous version of an app. The app release cycles must be as streamlined as possible.
You need to create an application for the apps.
Which two tools should you use? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Microsoft Azure DevOps
B. Microsoft Visual Studio
C. Lifecycle Services
D. AppSource
E. Common Data Service

Answer: AD

Explanation:
A: DevOps is the combining of two historically disparate disciplines: software development
and IT operations. The primary goal of DevOps is to shorten the software development lifecycle and provide continuous integration and continuous delivery (CI/CD) with high software quality. You can use Power Apps build tools to automate common build and deployment tasks related to Power Apps if your DevOps platform is Azure DevOps.
D: Microsoft AppSource is now embedded in the Dynamics 365 home page and throughout the common navigation. It now includes a private gallery of apps available to you within your company. Select Get more apps from the home page or task pane, and navigate to the My Organization tab to see apps that are available to you.
Reference:
https://docs.microsoft.com/en-us/power-platform/alm/devops-build-tools https://docs.microsoft.com/en-us/powerapps/user/app-source

---

NEW QUESTION 45
- (Topic 4)
You design a canvas app that has multiple screens. Each screen will have multiple button controls.
The button controls must all have the same background color. You must be able to change
You need to configure the button fill property. What should you do?

A. Update the Fill property to a variable created by using the Navigate function.
B. Update the Fill property to a variable created by using the Set function.
C. Select all the buttons white holding the Ctrl key, and then change the color property.
D. Use a background image property in place of setting a color property.

Answer: A

NEW QUESTION 46
- (Topic 3)
You need to resolve the instructor's issue and ensure that the same issue does not occur again. What should you use?

A. Gallery
B. Combo box

C. Custom component
D. Choices

Answer: D

NEW QUESTION 47
DRAG DROP - (Topic 3)
You need to create the food bank notification.
Which four actions should you perform in sequence? To answer, move the appropriate

Actions	Answer area
Create a food bank topic.	
Retrieve the food bank locations.	
Authenticate the food bank user.	
Retrieve meals in food pool filtered by location.	
Filter the list of food available to the food pool.	
Prompt the user to select a location.	
Prompt the user to select meals.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Actions	Answer area
Create a food bank topic.	Retrieve meals in food pool filtered by location.
Retrieve the food bank locations.	Filter the list of food available to the food pool.
Authenticate the food bank user.	
Retrieve meals in food pool filtered by location.	Prompt the user to select a location.
Filter the list of food available to the food pool.	
Prompt the user to select a location.	Prompt the user to select meals.
Prompt the user to select meals.	

NEW QUESTION 49
DRAG DROP - (Topic 3)
You need to select a design approach for the required features.
Which app type should you use? To answer, drag the appropriate app types to the correct requirements. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

App types	Answer Area
Microsoft Power Platform portal page	**Requirement** / **App type**
Power Apps canvas app	Record student attendance start and end times.
Power Virtual Agents chatbot	Ensure that instructors can upload menus.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

App types	Answer Area
Microsoft Power Platform portal page	**Requirement** / **App type**
Power Apps canvas app	Record student attendance start and end times. — Microsoft Power Platform portal page
Power Virtual Agents chatbot	Ensure that instructors can upload menus. — Power Apps canvas app

NEW QUESTION 51
HOTSPOT - (Topic 2)
You need to implement features for the solution.
Which Power Platform component should you use for each feature? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Feature	Component
Mobile app for Sales Log workbook	▼
	Canvas app
	Model-driven app
	Power Virtual Agents chatbot
Embed KPIs for sales quotas by region	▼
	Content Pack
	Power BI Desktop
	Power BI service
Transfer of key sales information to the Job Setup entity	▼
	Power Automate
	Business process flow
	Power Virtual Agents

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Model-driven app
The Sales app must meet the following requirements:
? Provide a central location for all sales pipeline and quote information that is easily accessible and maintains all of the versions of the estimate, quote, and engineering documents.
Compared to canvas apps, model-driven apps in PowerApps are based on underlying data
— specifically, the data stored in Common Data Service (CDS).
Box 2: Power BI Desktop
You can create a KPI in Power BI Desktop.
? Open your report editor in Power BI Desktop then select a report on which you are working.
? On your right, you will see a Visualizations pane and a Fields pane.
? From the Visualizations pane, select the KPI visual.
? Etc.
Box 3: Power Automate

NEW QUESTION 52
HOTSPOT - (Topic 2)
You need to resolve the issues found during testing.
Which option should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Issue	Option
Testers see all time entries.	▼
	Hierarchical security
	Security group
	Security role
Testers are able to edit existing time entries.	▼
	Control property
	Field-level security
	Security role
Managers cannot see required information.	▼
	Access team template
	Field-level security
	Hierarchical security

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, email Description automatically generated
Box 1: Security role
Scenario: Employees must only be able to access their own time tracking records from the app.
Testers report that they can see time entries in the Time Tracker app, not just their own.
Box 2: Field-level security

Scenario: Employees must only be able to modify time records for the current and previous day.
Testers report that they can edit any existing time entries.
Box 3: Hierarchical security
You use field security tables to apply field-level security, which restricts field access to specified users and teams.

NEW QUESTION 54
HOTSPOT - (Topic 2)
You need to create the solution assets.
What should you use to create the visualizations? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Dashboard visualization	Tool
Sales	**Power BI Desktop only**
	Power BI Service only
	Power BI Desktop or Power BI Service
Manufacturing	Power BI Desktop only
	Power BI Service only
	Power BI Desktop or Power BI Service

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: PowerBI Desktop
The Sales dashboard must reside in the Sales channel and must include information about active quotes, sales pipeline, and year-to-date sales KPIs for sales quotas by region.
PowerBI Desktop to support many data source. Box 2: PowerBI Desktop or Power BI Service on
A dashboard that shows a capacity Heat map by month as well as expected sales that are
likely to close for the next month. Both support visualizations.

NEW QUESTION 59
- (Topic 2)
You need to implement the change requested by the operations manager. Which control should you use?
BF70D5D

A. Camera
B. Shape
C. Add picture
D. Image

Answer: D

Explanation:
Scenario: The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.
Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image

NEW QUESTION 61
HOTSPOT - (Topic 2)
You need to meet the requirement for the time tracking app.
Which controls should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Solution
Automatically record the duration of work when a job number is read.	Card / Rating / Slider / Timer
Read the employee's number into the app.	Barcode-scanner / Card / Image / Shape
Display a photo of an employee when the employee badge is read.	Camera / Card / Icon / Image

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Timer
A Timer control in Power Apps is a control that can determine how your app responds after a certain amount of time passes.
Box 2: Barcode scanner
The Barcode scanner control for canvas apps scans barcodes, QR codes, and data-matrix codes on an Android or iOS device.
Box 3: Image
Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.

NEW QUESTION 66
- (Topic 1)
You need to provide all app components of the application to Tailwind Traders. What should you do?

A. Package the application and flow components into a single solution for export.
B. Run the app checker and flow checker prior to publishing each component for export.
C. Export each component separately but use the same version number for each component.
D. Publish the application and flow solutions at the same time before exporting each one.

Answer: B

Explanation:
Scenario: When identifying versions of the app solution, all dependencies, entities, and user interfaces components must be identified to avoid any unintentional issues caused by reverting individual components to a previous version.
Power Apps has added components to the rule set that encourages best practices in the Power Apps Checker. You can check your canvas apps and flows that are included in solutions and then review all issues in a single, consolidated report.
Reference:
https://docs.microsoft.com/en-us/power-platform-release-plan/2019wave2/microsoft-powerapps/checker-includes-rules-canvas-apps-flows

NEW QUESTION 67
HOTSPOT - (Topic 1)
You need to create a flow for sending required emails to the regional manager.
How should you create the flow? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Option	Type
Flow type to use	Instant / Automated / Business Process / Scheduled
Trigger to start flow	HTTP Webhook / Power Apps / Common Data Service when a record is created / Office 365 Outlook Send an email

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user
interface, text, application, email Description automatically generated
Box 1: Business Process
Scenario: If a sales representative submits a status report and assigns the At Risk status to a process, the app must prompt the sales representative to enter a detailed description for the risk. This information must be emailed to the regional manager.
Business process flows provide a guide for people to get work done. They provide a streamlined user experience that leads people through the processes their organization has defined for interactions that need to be advanced to a conclusion of some kind. This user experience can be tailored so that people with different security roles can have an experience that best suits the work they do.
Box 2: Common Data Service when a record is created
The Microsoft Dataverse (Common Data Service) connector provides the following triggers to help you define when your flows start:
? When a row is created, updated, or deleted
? When an action is performed
? When a flow step is run from a business process flow

NEW QUESTION 68
- (Topic 4)
You are creating a canvas app for a company.
The app must access data from a private web service that is provided by the company. You need to set up the connector.
Which connector type should you use?

A. Custom
B. Standard
C. First-party
D. Premium

Answer: A

NEW QUESTION 72
HOTSPOT - (Topic 4)
You are creating a Power Automate flow.
You have an array that contains items with different color attributes. You plan to filter the array by using the following filter expression within the flow:
@or(equals(item()?['color'], 'red'),contains(item()?['color'],'blue')) The filter returns results only when the expression resolves to true.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
The filter expression yields a result if the array contains the color **orange**	○	○
The filter expression yields a result if the array contains the color **red**	○	○
The filter expression yields a result if the array contains the color **sky blue**	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
Box 2: Yes
The item color must be red, or item color contains blue. Box 3: Yes

NEW QUESTION 74
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app that displays a list of accounts.
Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
You add a blank screen named Screen_Accounts and add a gallery named and add another blank screen named Screen_AccountDetail.
You need to complete the app. Solution:
? Add an edit form to Screen_AccountDetail and set the Default Mode of the form to View.
? Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
? Set the data source of the form to Accounts.
? Set the Item property of the form to Selected.
? Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:
View, edit, or create an item, save the contents, and reset the controls in an Edit form control.
FormMode.View: The form is populated with an existing record but the user cannot modify the values of the fields.
This function is often invoked from the OnSelect formula of a Button or Image control.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION 79
- (Topic 4)
A company uses Microsoft Power Platform. You create a solution with components You deploy the solution in the production environment Users report issues with a process. You open the last imported solution. You need to troubleshoot the issue. What should you view?

A. Solution dependencies
B. Solution classic view
C. History

Answer: D

NEW QUESTION 80
HOTSPOT - (Topic 4)
A coworker creates a canvas app.
The canvas app contains the following formula. The formula is attached to the OnVisible property of the first screen that users see:

```
Collect(
Toolbox,
{
    Tool: "Hammer",
    Quantity: 1    .
},
{
    Tool: "Screwdriver",
    Quantity: 2
}
)
```

You are updating the canvas app.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area	Yes	No
The formula will update multiple records in a data source named Toolbox if the records exist.	○	○
A local collection is created to store data if a data source named Toolbox does not already exist.	○	○
If a collection named Toolbox exists the formula will clear any existing records before making any changes.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
Records are added, not updated.
Box 2: Yes
The Collect function adds records to a data source. Syntax: Collect(DataSource, Item, ...)
DataSource – Required. The data source that you want to add data to. If it doesn't already exist, a new collection is created.
Item(s) - Required. One or more records or tables to add to the data source.
Box 3: No
No records are cleared.

NEW QUESTION 84
DRAG DROP - (Topic 4)
A company stores sales orders in a Microsoft Excel workbook. The company stores customer data in a SQL Server database.
You must import the data into a Microsoft Dataverse instance. You need to define the mapping for the migration.
Which component should you use? To answer, drag the appropriate components to the correct data type. Each component may be used once, more than once, or

not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Table
Box 2: Data source Box 3: Column
Box 4: Row

NEW QUESTION 86
- (Topic 4)
DRAG DROP
A company uses Microsoft Power Platform in a production environment. The company is defining new business processes in a prototyping environment. You create components in both environments.
You need to package the components you create.
Which solution types should you use? To answer, drag the appropriate solution types to the connect components. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 88
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.
Development and testing must be performed using production data. Multiple testers must
be used at each testing stage.
You need to provision and configure new environments for development and testing. Solution:
? Provision a developer environment named D1 and a sandbox environment named S1.
? Copy the production environment to both D1 and S1.
? Use D1 for development and S1 for testing.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Production: This is intended to be used for permanent work in an organization. Do not use production environment for testing.
Note: Instead use two sandboxed environments: one for development and one for testing.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/environments-overview

NEW QUESTION 91
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.
Development and testing must be performed using production data. Multiple testers must be used at each testing stage.
You need to provision and configure new environments for development and testing. Solution:
? Provision sandbox environments named S1 and S2.
? Copy the production environment to both S1 and S2.
? Use S1 for development and S2 for testing.
Does the solution meet the goal?

A. Yes
B. No

Answer: A

Explanation:
A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/environments-overview

NEW QUESTION 93
HOTSPOT - (Topic 4)
You are a technical assistant for a legal services organization. The company uses SharePoint to manage documents and Microsoft Dataverse as the data store. The company has strict rules about access, permissions, and privacy.
Lawyers and paralegals use Microsoft Teams for communications and collaboration. Employees use personal devices to access legal files. You do not have access to the admin area in Microsoft Power Platform.
You need to ensure that these rules are observed consistently and managed in one place.
Which type of app should you create? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	App type
Access client billing details	▼
	Canvas app in Microsoft Teams
	Canvas app in SharePoint
	Model-driven app in SharePoint
	Model-driven app in Microsoft Teams
Log phone calls and schedule appointments with clients and the team assigned to them	▼
	Dynamics 365 App for Outlook
	Microsoft Teams calendar
	SharePoint calendar

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Model-driven app in Microsoft Teams
A user's ability to see and use apps is controlled by sharing the application with the user. Sharing of canvas apps is done directly with a user or Azure AD group but is still subject to Dataverse security roles. Sharing of model-driven apps is done via Dataverse security roles.
Box 2: Sharepoint Calendar

NEW QUESTION 95
DRAG DROP - (Topic 4)
You create the following apps for a company that provides financial guidance services: a model-driven app for financial advisers that work in the company's offices and a canvas app for remote financial advisers.
You need to create business rules for a custom counselling entity used by all financial advisers.
Who will be affected by the business rules?
To answer, drag the appropriate financial adviser types to the correct business rules. Each financial adviser type may be used once, more than once, or not at all. You may need to drag the split bat between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Financial adviser types	Answer Area	
	Business rule	**Financial adviser type**
Office-based financial advisers only	Set a field value with the scope set to Entity	Financial adviser type
Remote financial advisers only	Clear a field value with the scope set to All Forms	Financial adviser type
Office-based and remote financial advisers	Set visibility of a field with the scope set to Entity	Financial adviser type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Office-based and remote financial advisers
Model driven apps can use all actions available on business rules, however not all business rule actions are available for canvas apps at this time.
Box 2: Office-based financial advisers only
If you're building a Canvas app, you must use table as the scope (not All forms, not a specific form)
Box 3: Office-based financial advisers only
The following actions are not available on Canvas apps :
Show or hide columns Enable or disable columns
Create business recommendations based on business intelligence.

NEW QUESTION 97
- (Topic 4)
You create a new solution publisher and include a publisher prefix value.
Which two actions can you perform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. You can change contact details of a publisher after you create the publisher
B. When you change a solution publisher prefix, you can change the schema name for existing components
C. You can change the schema name of a publisher after creating the publisher
D. You can add a component from one solution to another solution that has a different publisher

Answer: AD

Explanation:
Once you introduce a publisher for a component in a managed solution, you can't change the publisher for the component.
Reference:
https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm#solution- publisher

NEW QUESTION 100
DRAG DROP - (Topic 4)
You are deploying solutions from development environments into test environments. You need to gather solution information.
What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar
between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: View the history
The solution history displays information such as solution version, solution publisher, type of operation, operation start and end time, and operation status.
Box 2: View solution layers
The see solution layers' feature allows you to view all component changes that occur due to solution changes over time. Within a solution layer, you can drill down to view specific changed and unchanged property details for a component.
The see solution layers' feature:
? Let's you see the order in which a solution changed a component.
? Let's you view all properties of a component within a specific solution, including the changes to the component.
Box 3: Show dependencies
As a result of dependency tracking the following behaviors are enforced:
? Export of a solution warns the user if there are any missing components that could cause failure when importing that solution in another system.

NEW QUESTION 104
- (Topic 4)
A company has ten sales regions. Each salesperson is assigned to one region. You create a set of five standard views that all salespeople will use.
Sales users only want to see information for their own region. Sales users must call sales
leads within a week of receiving a lead.
You need to recommend a solution for sales users.
Which two actions will you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Instruct users to create personal views that filter by region.
B. Instruct users to filter the view by region.

C. Configure the definition for each view to sort by region.
D. Configure the definition for each view to filter by region.

Answer: BD

NEW QUESTION 107
DRAG DROP - (Topic 4)
You are creating a Power Automate cloud flow.
The data in the flow must perform the following actions:
• Return the first character of a string of text.
• Convert an array to a single string. You need to manipulate the data.
Which data operations should you use? To answer, drag the appropriate data operations to the correct changes. Each data operation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 112
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app that displays a list of accounts.
Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.
You need to complete the app. Solution:
? Add an edit form to Screen_AccountDetail and set the Default Mode of the form to New
? Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
? Set the data source of the form to Accounts.
? Set the Item property of the form to Selected.
? Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
FormMode.New: the form is populated with default values and the user can modify the values of the fields. Once complete, the user can add the record to the data source.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form

NEW QUESTION 116
HOTSPOT - (Topic 4)
You create a Power Automate cloud flow that runs when a user creates a Microsoft Dataverse lead record.
The cloud flow must update a custom score column on the lead record based on other column values. The flow must perform the following activities:
• Update the Microsoft Dataverse record.
• Evaluate whether the Microsoft Dataverse record should be updated. You need to configure the flow components.
Which components should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Component
Update the Microsoft Dataverse record.	Action ▼ **Action** Trigger Function
Evaluate whether the Microsoft Dataverse record should be updated.	Condition ▼ Action **Condition** Data operation

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Component
Update the Microsoft Dataverse record.	Action ▼
Evaluate whether the Microsoft Dataverse record should be updated.	Condition ▼

NEW QUESTION 120

HOTSPOT - (Topic 4)
A production line app maker at a manufacturing company creates a canvas app that looks for available inventory in a SQL database. The production line workers use the inventory app across all work centers.
The production line workers report the following app issues from the shop floor:
? The app reports a delegation warning.
? Voice command functionality is unreliable.
You have minimal information about the issues. You are not allowed to enter the production facility.
You need to troubleshoot the issues.
How should you troubleshoot the issues? To answer, select the appropriate options in the answer area.

Issue	Action
The app reports a delegation warning.	▼ Use the LookUp function Check the number of items in the collection Check the number of dataset items
Voice command functionality is unreliable.	▼ Use the App checker/Runtime feature Use the Advanced Tools/Monitor feature Use the App checker/Accessibility feature Use Advanced Tools/Performance feature

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Check the number of items in the collection
If the data in your data source exceeds 500 records and a function can't be delegated, Power Apps might not be able to retrieve all of the data, and your app may have wrong results.
Note: Delegation is where the expressiveness of Power Apps formulas meets the need to minimize data moving over the network. In short, Power Apps will delegate the processing of data to the data source, rather than moving the data to the app for processing locally.
Box 2: Use the Advanced Tools/Monitor feature
Monitor is available by default for all canvas apps. Using Monitor, you can trace events as they occur in a canvas app during the authoring experience in Power Apps Studio, or you can use Monitor to debug the published version of a canvas app.
Example: Consider the scenario where an app has been deployed, and the initial version of the app experiences performance degradation. The app also intermittently generates errors with no clear pattern. Loading data in the app succeeds most of the time, but fails sometimes.
When you check Monitor, you see data operations as expected. However, you also see several responses that have HTTP status code 429, indicating that there have been too many requests in a specific timeframe.

NEW QUESTION 125

DRAG DROP - (Topic 4)
You are designing a canvas app.
You need to select user interface controls to include in the app.
Which control should you use? To answer, drag the appropriate controls to the correct requirements. Each control may be used once, more than once, or not at all.
You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Controls	Requirement	Control
List box	Allow users to select multiple items in a list.	
Radio	Allow users to select multiple items from a list of options by typing in a phrase.	
Combo box		
Drop-down list		

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: List box
A List Box control always shows all available choices (unlike a Drop down control) and in which the user can choose more than one item at a time (unlike a Radio control).
Box 2: Combo box
A Combo box control allows you to search for items you will select. The search is performed server-side on the SearchField property so performance is not affected by large data sources.
Single or multi-select mode is configured via the SelectMultiple property.
When searching for items to select, for each item you can choose to show a single data value, two values, or a picture and two values (Person) by modifying the Layout settings in the Data pane.

NEW QUESTION 130
- (Topic 4)
A company delivers products to multiple communities. The company creates a canvas app
connected to a Common Data Service database. The app tracks communities to see where
Drivers must enter delivery information on a form that uses an entity named Delivery. Depot staff must enter information on a pick-up form that uses an entity named Pick-up. Each form contains a community field that is based on a shared list across both forms.
You need to create the community field. Which type of field should you create?

A. local option set
B. text
C. global option set
D. text area

Answer: C

Explanation:
Can use a global option set, no need to use localized option sets.
Note: In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage – once you define its text values you can centrally managed it. Reference:
https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/

NEW QUESTION 134
HOTSPOT - (Topic 4)
A company is using Power Automate to send an email with all active projects that are at risk.
Projects that are stored in a table in Microsoft Dataverse are deemed at risk if the column for a risk score is greater than 70 or has a zero value.
The flow will loop over all the records in the Dataverse Projects table and update the risk status field based on the risk score.
You need to create a single evaluation expression to update the risk status field.
Which expression component should you use? To answer, select the appropriate options in
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Expression component
Return a true value if a value in the risk column meets one of the two conditions.	@or ▼ — @or / @and / if / equals
Return a true value if a value in the risk column is 0.	equals ▼ — @if / contains / @startsWith / equals
Return a true value if the value in the risk column is above 70.	greater ▼ — @greaterOrEquals / greater / contains / @if

A. Mastered

B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 139
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a
A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.
You need to create a visualization that displays the total amount of orders by country/region in USD.
Proposed solution: Create a model-driven chart on the country/region table that aggregates the total amount of the orders by country/region.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead use a calculated field.
Need to calculate the exchange rate in USD.
Calculated columns are calculated in real-time when they are retrieved.
Reference:
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup- attributes

NEW QUESTION 140
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable
exchange rates in a custom US dollars (USD) exchange rate table.
You need to create a visualization that displays the total amount of orders by country/region in USD.
Proposed solution:
Create a custom column that converts the order total to USD by using the relationship between order local currency and the USD exchange rate table in Power BI Desktop and display this column in a Power BI chart by country/region.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead use a calculated field.
Need to calculate the exchange rate in USD.
Calculated columns are calculated in real-time when they are retrieved. Reference:
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup- attributes

NEW QUESTION 145
- (Topic 4)
You create a canvas app that uses the following resources:
• Power Automate cloud flow
• Custom connector
• Microsoft Dataverse customization

• Connection
You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

A. Custom connector
B. Connection
C. Microsoft Dataverse customization
D. Power Automate cloud flow

Answer: D

NEW QUESTION 150
DRAG DROP - (Topic 4)
You have an existing Power Apps environment.
You need to create a Common Data Service database for the environment.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select **Create my database**
Configure currency and language settings
Configure database collation settings
Set the environment type to **Production**
Select an existing environment

Answer Area

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Select an existing environment Add a database in the admin center:
* 1. In the admin center, in the left navigation pane, select Environments.
* 2. Select the environment to which you want to add the database.
Step 2: Select Create my database
* 3. Select + Add database
Step 3: Configure currency and language settings
* 4. Enter the following, and then select Add.

Setting	Description
Language	The default language for this environment.
Currency	The base currency used for reporting.
Enable Dynamics 365 apps	Select **Yes** and make a selection to automatically deploy apps such as Dynamics 365 Sales and Dynamics 365 Customer Service.
Deploy sample apps and data	Select **Yes** to include sample apps and data. Sample data gives you something to experiment with as you learn. You must select **No** for **Enable Dynamics 365 apps** for this setting to appear.
Security group	Select a security group to restrict access to this environment.

NEW QUESTION 151
- (Topic 4)
A company has a Common Data Service custom entity that stores customer account data. You need to create a relationship between the custom entity and the Account entity. Which two tools can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Power Platform Admin center
B. Power Apps Maker portal
C. SQL Server Management Studio
D. Visual Studio Code

Answer: BC

Explanation:
There are two designers you can use to create and edit 1:N (one-to-many) or N:1 (many-to- one) relationships:
? You can create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships in Power Apps portal
? You can create and edit create and edit 1:N (one-to-many) or N:1 (many-to-one) entity relationships using solution explorer
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/create-edit-1n- relationships

NEW QUESTION 154
- (Topic 4)
A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list.
You are not able to activate the flow. You need to troubleshoot the issue.
What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. You are not assigned the Power Platform Admin role.
B. You placed all connectors into the Business group within the DLP policy.
C. You placed all connectors into the Non-Business group within the DLP policy.
D. You are not assigned the Environment Admin role.

Answer: BD

Explanation:
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention

NEW QUESTION 155
- (Topic 4)
You are creating an app for a company. You need to evaluate the default solution.
Which two behaviors should you expect from the default solution? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. You can change the prefix of the publisher of the default solution
B. If you create a Power Automate flow in a solution, the flow uses the prefix defined in thepublisherin the publisher
C. You can change the version number of the default solution

Answer: AC

Explanation:
https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/use-solutions-for-your-customizations?view=op-9-1

NEW QUESTION 158
DRAG DROP - (Topic 4)
You plan to create apps for a company.
You need to identify the Power Platform tools required.
What should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Canvas App
Box 2: Model-driven app
Model-driven app design is a component-focused approach to app development. Model- driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.
Box 3: Power Automate
Power Automate is a service that helps you create automated workflows between your favorite apps and services to synchronize files, get notifications, collect

data, and more.
Box 4: Power Virtual Agents bot
When you create bots with Power Virtual Agents, you author and edit topics.

NEW QUESTION 162
HOTSPOT - (Topic 4)
A company uses Microsoft Power Platform. The company categorizes customers into Specialty shop, Grocery store, Wholesaler, and Seasonal market groups by using a custom choice type column.
The staff uses a model-driven app with an interactive dashboard that displays all customer
You must update the app to provide the following functionality:
• Display selected customers by type in the interactive dashboard.
• Search for customers across multiple tables by postal code by entering any number of characters.
You need to configure the system.
Which configuration options should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Configuration
Display customers by type.	Enable sync with global choice. ▼ Enable the global filter. Enable the searchable property. **Enable sync with global choice.** Enable the sortable property.
Search by postal code.	Enable the searchable property. ▼ Find by setting in quick find. Filter by setting in quick find. **Enable the searchable property.** Enable the global filter on the postal code.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Configuration
Display customers by type.	Enable sync with global choice. ▼ Enable the global filter. Enable the searchable property. **Enable sync with global choice.** Enable the sortable property.
Search by postal code.	Enable the searchable property. ▼ Find by setting in quick find. Filter by setting in quick find. **Enable the searchable property.** Enable the global filter on the postal code.

NEW QUESTION 163
DRAG DROP - (Topic 4)
DRAG DROP
A company is migrating to a new Microsoft 365 tenant. You create an expense
You need to move the latest version of the canvas app and cloud flow to the new tenant. Which three actions should you perform in sequence? To answer, move the appropriate
actions from the list of actions to the answer area and arrange them in the correct order.

| Actions		Answer Area
Import the app.		
Publish all changes.	❯	⌃
Create a copy of the app in the cloud.	❮	⌄
Export the app as a package.		
Share the app with a user in the new tenant.		

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 165
- (Topic 4)
A company is using Power Virtual Agents in Microsoft Teams to expose Microsoft Dataverse data to employees.
You create a chatbot that retrieves a list of customers by postal code from a Dataverse table. The chatbot will accept requests from a user and must connect to Dataverse to retrieve the data.
You need to connect the chatbot to the Dataverse table. What should you use?

A. Table
B. Power Apps
C. Microsoft Teams
D. Power Virtual Agents
E. Power Automate

Answer: C

Explanation:
Dataverse for Teams is the "lite" version of Dataverse. It is a low-code platform designed to build relatively simple (but still powerful) apps, using a user-friendly interface and remaining within Microsoft Teams. This new update means that users now have the possibility to create Power Apps apps, Power Automate flows and Power Virtual Agents bots without leaving the Teams platform.
Reference:
https://docs.microsoft.com/en-us/learn/paths/work-power-platform-teams/
https://docs.microsoft.com/en-us/learn/modules/create-chatbot-power-virtual-agents-dataverse-teams/5-call-action-pull-data

NEW QUESTION 166
- (Topic 4)
A company uses a canvas app. The last published version of the app is version 18.
You edit the app. You save your updates and run the app. When you test the app, you discover you deleted a screen.
You need to restore the last published version of the app.
What is the version number of the app after you successfully restore it?

A. 17
B. 18
C. 18.1
D. 20

Answer: B

NEW QUESTION 168
- (Topic 4)
You create a model-driven app for a company. The app will be used to manage events that the company organizes.
The Events entity ownership type is set to User or team. Members of the marketing team are assigned the MarketingTeam security role. All privileges for the role are set to User access.
All employees must be able to view event records. Only members of the marketing team are permitted to create or edit event records. You create a role named OtherEmployees.
You need to configure the MarketingTeam and OtherEmployees security roles.
Which three actions should you perform? Each correct selection presents a part of the
NOTE: Each correct selection is worth one point.

A. Set the access level for the OtherEmployees security role to Organization for the Read permission.
B. Set the access level for the MarketingTeam security role to Organization for the Read permission.
C. Set the access level for the OtherEmployees security role to None Selected for the Read permission.
D. Set the access level for the MarketingTeam security role to None Selected for the Read permission.
E. Set the access level for the MarketingTeam security role to None Selected for the Create and White permission.
F. Set the access level for the OtherEmployees security role to None Selected for the Create and Write permission.

Answer: ABE

NEW QUESTION 170
- (Topic 4)
You create a Microsoft Power BI report with multiple visualizations displayed together. The report must be available to users in all security roles. You need to display the report in a model-driven app. What should you embed?

A. Power BI dashboard on a model-driven form.
B. Power BI tile on a model-driven form.
C. Power BI dashboard on a model-driven dashboard.
D. Power BI tile on a model-driven dashboard.

Answer: D

NEW QUESTION 173
DRAG DROP - (Topic 4)
DRAG DROP
You are creating a Power Automate cloud flow to update a column on each Item in a list of Microsoft Dataverse records. Records are sorted in order of priority. You must use a complex expression to determine the column value. The column value must be stored in a variable to make future maintenance easier. Records must be processed based on the sorted order.
You need to add flow steps to process the list of records.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 176
- (Topic 4)
You create an automated flow by using Power Automate. The flow appears under My Flows and is connected to the development environment. The development environment has a solution to move components into a production environment.
You need to ensure that you can transfer the flow to another environment. What should you do?

A. Add the flow to the default solution of the development environment and export as a managed solution.
B. Change the environment for the flow.
C. Add the flow to the existing solution.
D. Add the flow to the default solution of the production environment.

Answer: A

Explanation:
It is very normal for a developer to build the power automate in one environment and then export that automate & import it to another destination environment.
Exporting our Solution
After validating our flows work in our test environment, we now want to promote it to our production environment. We can export our solution by finding it in our Solutions experience, clicking on the …, selecting Export.

NEW QUESTION 184
DRAG DROP - (Topic 4)
You are designing a canvas app that will be used by all users including users who have
Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions. Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Outcomes	Answer Area		
Not visible to any users		Action	Outcome
Visible to sighted users only		Set the values for the X and Y properties of a control to move the control off-screen.	Outcome
Visible to screen-reader users only		Set the Color and other related properties of a control to transparent.	Outcome
Visible to both sighted and screen-reader users		Set the Height and Width properties of a control to **1**.	Outcome

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Outcomes	Answer Area		
Not visible to any users		Action	Outcome
Visible to sighted users only		Set the values for the X and Y properties of a control to move the control off-screen.	Visible to sighted users only
Visible to screen-reader users only		Set the Color and other related properties of a control to transparent.	Visible to screen-reader users only
Visible to both sighted and screen-reader users		Set the Height and Width properties of a control to **1**.	Not visible to any users

NEW QUESTION 187
- (Topic 4)
DRAG DROP
A company uses Power Apps and Microsoft Dataverse.
The company has three solutions that you must move to a target environment:
• One solution is created for security roles. You must be able to add roles to the solution in the target environment
• One solution is created for table additions and modifications. Table structures must be updated in the solution in the target environment.
• One solution is for customizations. The custom actions must not be modified in the solution in the target environment
You need to create the solutions.
Which type of solutions should you create? To answer, drag the appropriate solutions to the correct requirements- Each solution may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Solutions	Answer Area		
Unmanaged		Requirement	Solution
Managed		Security roles	
		Tables	
		Customizations	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Solutions	Answer Area		
Unmanaged		Requirement	Solution
Managed		Security roles	Unmanaged
		Tables	Unmanaged
		Customizations	Managed

NEW QUESTION 188
- (Topic 4)
A company uses Power Apps. You embed a canvas app in a model-driven app form. You need to bind the app to a form component. Which form component should you use?

A. Section
B. View
C. Column
D. Tab

Answer: C

NEW QUESTION 190
DRAG DROP - (Topic 4)
A company uses Power Apps. You design the interface for a new model-driven app.
Users must interact with data from records related to the primary record form in the following ways:
• Use related business process flows.
• Display primary and related form columns.
You need to configure the forms without using additional customizations.
Which form types should you use? To answer, drag the appropriate form types to the correct requirements. Each form type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct answer is worth one point.

Form types

| Quick view form |
| Main form dialog |
| Quick create form |
| Main form component control |

Answer Area

Requirement	Form type
Use related business process flows.	
Display related columns along with other primary form columns.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Form types

| Quick view form |
| Main form dialog |
| Quick create form |
| Main form component control |

Answer Area

Requirement	Form type
Use related business process flows.	Main form component control
Display related columns along with other primary form columns.	Quick view form
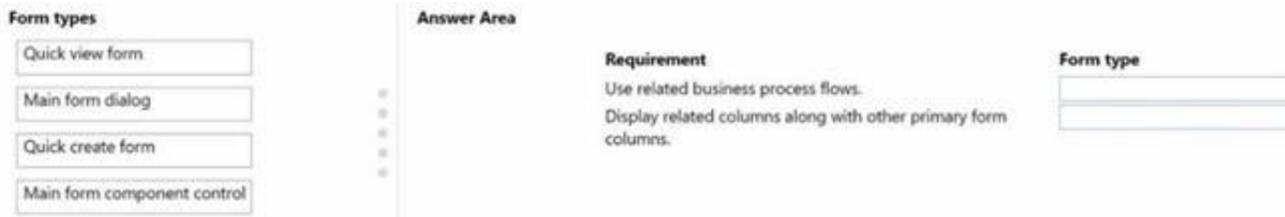

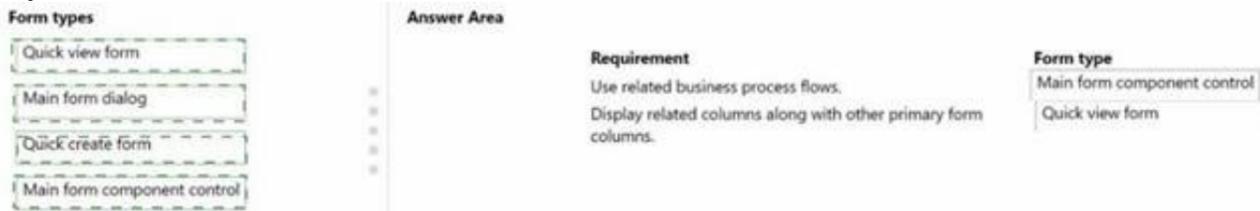

NEW QUESTION 191
- (Topic 4)
You significantly modify a canvas app. You need to generate a new app version. What should you do?

A. Publish the app.
B. Update the major version number.
C. Update the version notes.
D. Update the minor version number.
E. Save the app.

Answer: A

**NEW QUESTION 194**
HOTSPOT - (Topic 4)
You are developing an app for a package delivery company. Delivery team members will use the app on their phones. Distribution center team members will use a web-based version of the app that runs on tablet devices.
When a delivery person arrives at a location and the package recipient is present, the app must capture the recipient's signature. If the recipient is not available, the app must capture a picture of the drop-off location or the person receiving the package.
You need to design phone-based and web-based versions of the app.
Which app type and media control should you use? To answer, configure the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
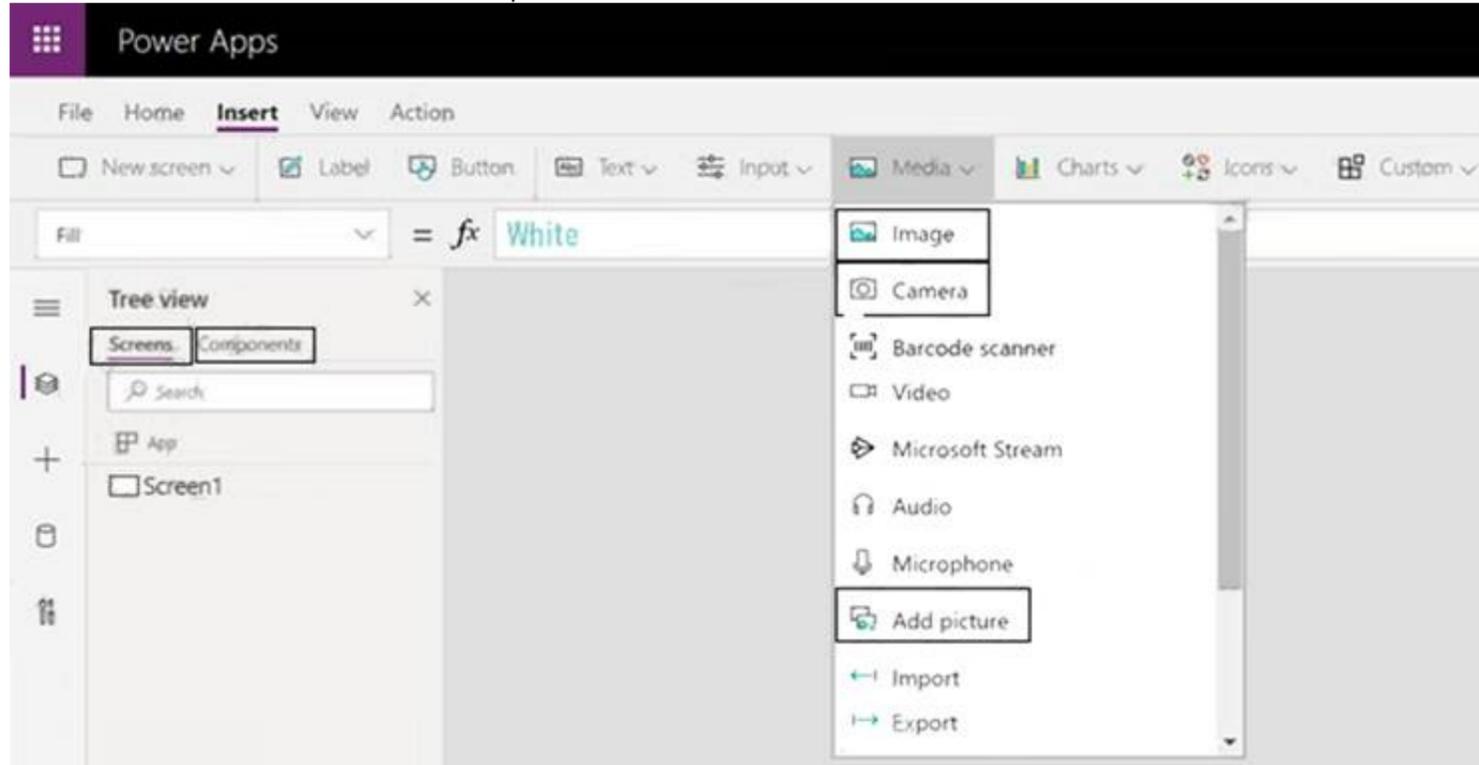

A. Mastered
B. Not Mastered

Answer: A

Explanation:
App Type: Screens
To insert the Camera control in your PowerApps program you can use the blank screen, and select Insert->Media->Camera.
Media Type: Camera
Use the Camera control to capture pictures with a device's camera. The device must have a camera and the user must authorize the app to use the camera.
Tap or select the camera control to capture a picture from the camera.

The most recently captured picture is available through the Photo property. With this property, the images can be:
? Viewed with the Image control. Use the Image control to view the captured image.
? Temporarily put in a variable or a collection.
? Stored in a database.
? Transmitted as a base64 encoded text string.

NEW QUESTION 196
HOTSPOT - (Topic 4)
A user named Bill Jones creates a canvas app and shares it with other users in his company as shown in SharePowerUsers and ShareJimSmith exhibits. (Click the SharePowerUsers tab and the ShareJimSmith tab.)

Share Company App

Enter a name, email address, or Everyone

Shared with   Sort by Name ∨

BJ Bill Jones
    Owner

JS Jim Smith   ✕
    Co-owner

PU Power Users   ✕
    User

Power Users
This User can use this app

☐ Co-owner
   Can use, edit, share app but not delete or change owner.

Data permissions ⓘ
Make sure your users have access to the data used in your app, including gateways, APIs, connectors, and entities.

Share Company App

Enter a name, email address, or Everyone

Shared with   Sort by Name ∨

BJ Bill Jones
    Owner

JS Jim Smith   ✕
    Co-owner

PU Power Users   ✕
    User

Jim Smith
This User can use this app

☑ Co-owner
   Can use, edit, share app but not delete or change owner.

Data permissions ⓘ
Make sure your users have access to the data used in your app, including gateways, APIs, connectors, and entities.

There are multiple versions of the app. Users must only be able to run the most recently published version of the app as shown in the table below:

Version	Modified	Modified by	Power Apps release	Published	Version note
Version 4	09/05/2020 17:32	Bill Jones	3.20023.8		Changed fonts
Version 3	09/05/2020 17:30	Bill Jones	3.20023.8	Live	Changed business logic
Version 2	09/05/2020 17:22	Bill Jones	3.20023.8		Updated background color
Version 1	09/05/2020 17:20	Bill Jones	3.20023.8		

You need to ensure that sharing is configured correctly.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

	Yes	No
Member of the Power Users group are able to publish version 4 of the canvas app.	○	○
When using the canvas app, a member of the Power Users group can see version 4.	○	○
If version 2 of the canvas app is restored, it will be labelled as the Live version.	○	○
If Jim Smith edits the canvas app he will be editing version 4.	○	○

A. Mastered
B. Not Mastered

**Answer:** A

Explanation:
Box 1: No
They can only use the app.
Box 2: Yes
Box 3: No
You would need to publish Version 2 to make it live.
Note: If you want to publish the restored version, select Publish this version, and then select Publish this version when prompted to confirm.
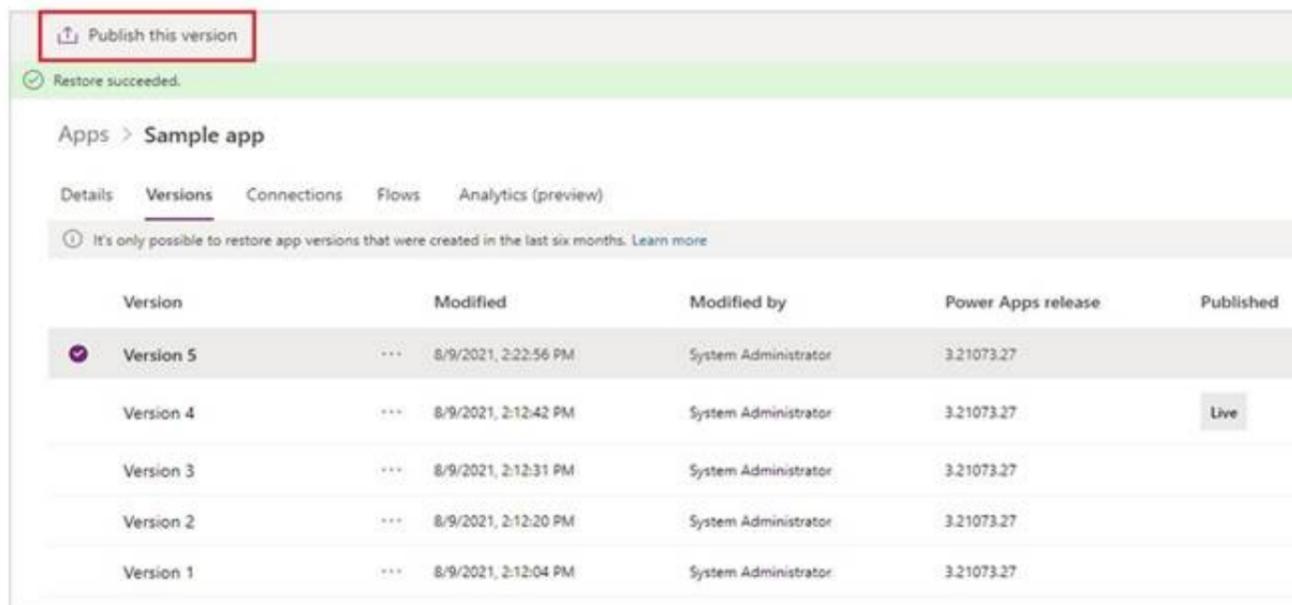

Notice the published restore version that shows up as Live.
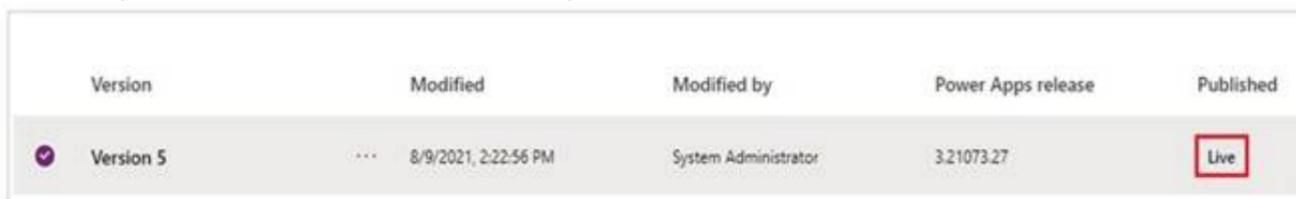

Box 4: Yes
The most recent version of any app is available only to those who have edit permissions for it.

NEW QUESTION 200
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.
The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based immediately.
The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.
You need to create a Power Apps app solution to automatically mark the candidate for follow up.
Proposed solution: Create a custom action that has defined dataflows.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Instead use Common Data Service workflow with a PowerQuery on the data entity.
Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows

NEW QUESTION 203
- (Topic 4)
A company uses a canvas app to encourage employees to take reading breaks during their work schedule. The reading breaks are created automatically as Outlook tasks in the employees Outlook app. The app must trigger a Power Automate cloud flow when specific data is captured in the canvas app. You need to create and configure the flow. Which flow step should you configure first?

A. Flow button for mobile
B. Power Apps step with trigger conditions
C. New Microsoft Outlook task
D. Condition step

Answer: A

NEW QUESTION 205
DRAG DROP - (Topic 4)
You are designing an app for a bank. You plan to use the following entities in the app:

Entity	Comments
Clients	Clients are assigned to a branch office
Bank accounts	A client may have multiple bank accounts. A bank account may have multiple clients as bank account owners
Branch offices	Clients are assigned to a branch office
Employees	Each employee works at only one branch office

You need to configure the relationships between the entities.
Which relationship types should you use? To answer, drag the appropriate relationship types to the correct relationships. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Relationship types

One-to-one

One-to-many

Many-to-one

Many-to-many

Answer Area

Relationship

Source entity	Target entity	Relationship type
Clients	Bank accounts	Relationship type
Clients	Branch offices	Relationship type
Branch offices	Employees	Relationship type

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Many-to-many
Box 2: Many-to-one
A client have a single branch office.
A branch office can have many clients.
Box 3: One-to-many
A branch office can have many employees. An employee only works at one branch office.

NEW QUESTION 209
HOTSPOT - (Topic 4)
: 189 HOTSPOT
A company is building several Power Apps apps to help with sales operations collaboration. You need to identify the right solution for data storage.
Which solution should you use? To answer select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Characteristic	Solution
Limits the number of records that can be added.	Microsoft Dataverse for Teams ▾ Microsoft Dataverse Microsoft Dataverse for Teams
Allows for advanced development tasks for apps specific to Microsoft Teams.	Microsoft Dataverse ▾ Microsoft Dataverse Microsoft Dataverse for Teams
Has the most granular level of security to account for column-level security in Microsoft Teams.	Microsoft Dataverse ▾ Microsoft Dataverse Microsoft Dataverse for Teams

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 211
- (Topic 4)
You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.
When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.
Solution: Uninstall the most recent version of the solution from the production environment. Does the solution meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 212
DRAG DROP - (Topic 4)
You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.
You need to create apps for the following groups of users. Apps must not require

Groups	Comments	Requirements
Reception area staff	Users will access the app only from desktop devices in the office.	Users must be able to access contacts and display activities as a doughnut chart.
Medical staff	Users will access the app from tablet devices.	Users must be able to access activities and business process flows.
Cleaning staff	Users will access the app only from mobile phone devices.	Users must be able to interact with a checklist to mark cleaning tasks as completed.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

App types
- Canvas app
- Model-driven app
- Embedded canvas app

Answer Area

Group	App type
Reception area staff	App type
Medical staff	App type
Cleaning staff	App type

A. Mastered
B. Not Mastered

Answer: A

Explanation:

App types
- Canvas app
- Model-driven app
- Embedded canvas app

Answer Area

Group	App type
Reception area staff	Canvas app
Medical staff	Embedded canvas app
Cleaning staff	Model-driven app

NEW QUESTION 214
DRAG DROP - (Topic 4)
DRAG DROP
A company uses Power Apps and Microsoft Dataverse.
The company has model driven apps across multiple Microsoft Dataverse environments in the same tenant. You must grant privileges to Power Apps makers to

achieve the following:
• Share model-driven apps in multiple Microsoft Dataverse environments.
• Share model-driven apps in only one of the Microsoft Dataverse environments and view only table records that they create themselves.
You need to share the model-driven app with users by using the principle of least privilege. Which security role privilege should you grant for each requirement? To answer, drag the
appropriate security roles to the correct requirements. Each security the may be used once,
more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct answer is worth one point.

Security roles		Answer Area	
System Customizer		**Requirement**	**Security role**
Microsoft Power Platform Administrator		Share in all Microsoft Dataverse environments.	
Environment Maker		Share in one environment and view only table records they create.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Security roles		Answer Area	
System Customizer		**Requirement**	**Security role**
Microsoft Power Platform Administrator		Share in all Microsoft Dataverse environments.	Environment Maker
Environment Maker		Share in one environment and view only table records they create.	System Customizer

NEW QUESTION 219
- (Topic 4)
A company creates an app that uses Microsoft Dataverse tables.
The app creator wants to verify that the app is operating as expected by using a sample set of real-world data.
You need to import the sample data into Dataverse tables.
Which two technologies can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Power BI
B. SharePoint
C. Power Query
D. Dataflows

Answer: CD

Explanation:
C: You can create a table in Dataverse and fill that table with data from an OData feed by using Power Query. You can use the same techniques to integrate data from these online and on-premises sources, among others:
SQL Server Salesforce IBM DB2
Access
Excel Web APIs
OData feeds Text files
D: You can create a new Dataverse table that stores all the metadata from the dataflow run. For every refresh of a dataflow, a record is added to this table. You can also store metadata for multiple dataflow runs in the same table.
Reference:
https://docs.microsoft.com/en-us/power-query/dataflows/load-dataflow-metadata-into- dataverse-table
https://docs.microsoft.com/en-us/power-query/dataflows/add-data-power-query

NEW QUESTION 223
HOTSPOT - (Topic 4)
You need to store a list of products and their colors. You have a Power Apps app that includes the following elements:
? a text box for the product name
? a drop-down list for the product color
? a button to add a product to the list
? a status message that shows whether the addition of a product to the list was successful
The button uses the following formula:

```
Collect(
colProductList,
{
  Product: txtProductName.Text, Color: drpColors.Selected.Value
}
);
Set(
  vStatusMessage, "Added '" & txtProductName.Text & "'"
);
timStatusMessage.Start;
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You must explicitly declare the collection before you can add product names and colors to the collection.	○	○
The formula stores the product name and the color in a collection.	○	○
`vStatusMessage` is a context variable that is used to store the status message.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
The Collect function adds records to a data source. If the data source doesn't already exist, a collection is created.
Box 2: Yes
Box 3: No
Use the Set function to set the value of a global variable, which temporarily holds a piece of information, such as the number of times the user has selected a button or the result of a data operation.

NEW QUESTION 225
DRAG DROP - (Topic 4)
A company uses Power Automate and Power Apps to streamline business processes. You need to use AI Builder to analyze customer reviews of the company's products.
In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

| Action	Answer Area
Publish the model.	
Connect data to the model.	
Train the model.	
Use the model in a Power Automate flow.	

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Step 1: Connect data to the model.
First create an AI Builder form processing model for the customer reviews you want to process.
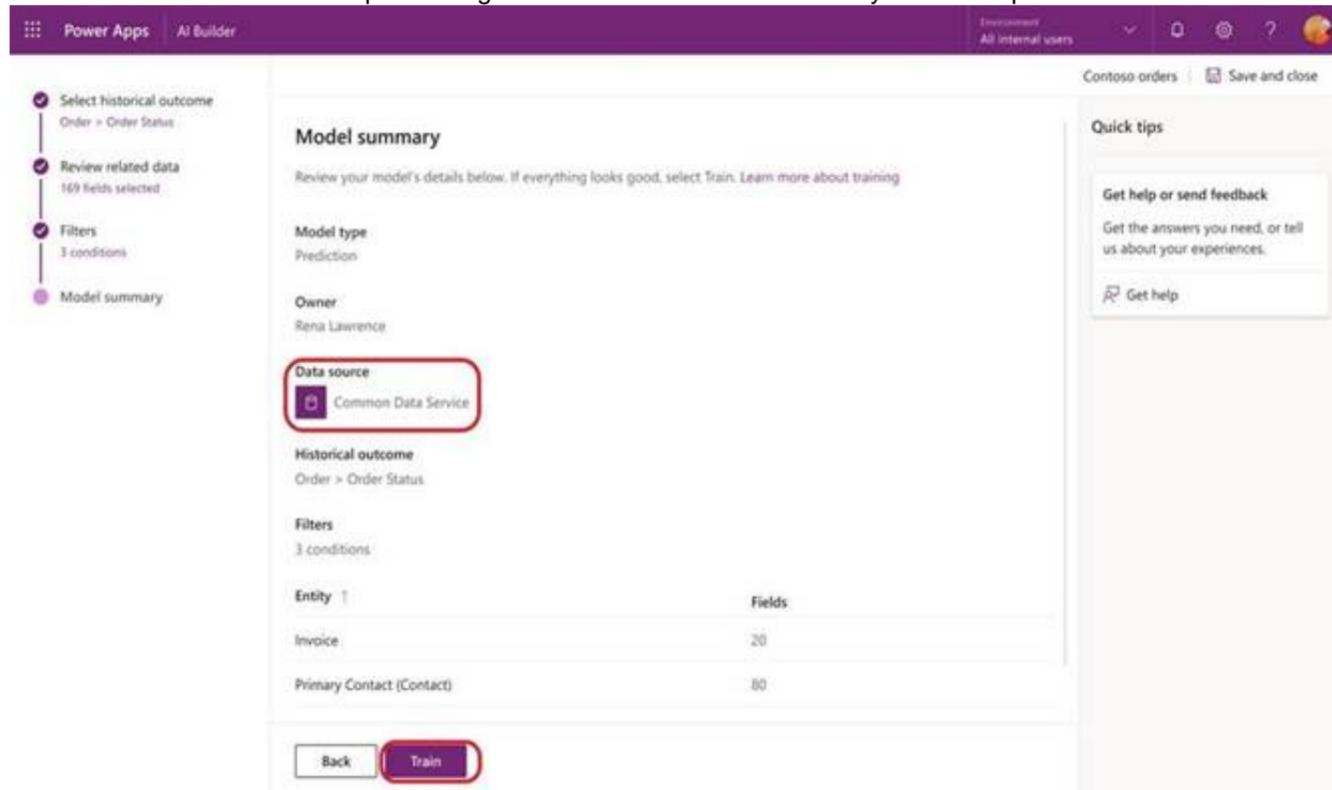

Step 2: Train the model. Step 3: Publish the model.
Step 4: Use the model in a Power Automate flow.

Once you train and publish the model, create a solution-aware flow in Power Automate.

NEW QUESTION 229
- (Topic 4)
You are creating a canvas app.
You need to display a limited list of choices to the end user. You must standardize the values and appearance of the list across all forms.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Add a drop-down field in the app
B. Create a Global Option Set
C. Add a new business rule
D. Add a component to the component library

Answer: AB

Explanation:
A global Option Set can be shared across entities. Reference:
https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/

NEW QUESTION 232
- (Topic 4)
A company has 500 vendor records stored in a SQL table. Each record contains the
team wants to view the vendor records by using Power Apps. The team must be able to change the list results by applying filters. You need to display the vendor records in a canvas app. Which control should you use?

A. Text
B. Form
C. Chart
D. Gallery

Answer: D

NEW QUESTION 237
HOTSPOT - (Topic 4)
HOTSPOT
A bicycle shop uses Microsoft Dataverse to track bicycle rentals and renter information. The bicycle shop has a standalone tablet with a canvas app. Renters use the app to check out bicycles. Only one renter at a time can check out bicycles.
Multiple renters can rent as a team. You must expand the app to allow team rentals in one step. All team members must be registered under a single phone number.
You need to modify the canvas app to display team and team member information, along with bicycle information
Which UI elements should you use for each requirement? To answer, select the appropriate options m the answer area
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 241
- (Topic 4)
You are creating an app for an organization's human resources (HR) department. You create an Employee entity in an unmanaged Common Data Service solution.
Another user creates the following Power Automate flows separately from the solution:

Flow	Description
FlowA	Send email to the HR manager when a new document is uploaded to Microsoft SharePoint.
FlowB	Send email to the HR manager after a user selects a document in Microsoft OneDrive for Business and runs the flow.
FlowC	Send email to the HR manager at 8 AM daily if new documents are uploaded in Microsoft OneDrive for Business since the previous day.
FlowD	Send email to the HR manager when a new employee record is added.

You need to incorporate the flows that can be added to the solution.
Which two flows can you include? Each correct selection presents a complete solution.
NOTE: Each correct selection is worth one point.

A. FlowA
B. FlowB
C. FlowC
D. FlowD

Answer: AD

Explanation:
You can add any of these conditions to determine precisely when your flow is triggered.
