

Microsoft

Exam Questions AB-731

AI Transformation Leader (beta)

NEW QUESTION 1

What is considered a best practice when forming an AI adoption team in an enterprise environment?

- A. Include representatives from legal, leadership, and business units to align AI initiatives with organizational priorities.
- B. Include primarily IT and project management staff initially to streamline deployment, adding governance and compliance roles later.
- C. Include only data scientists and engineers at first to validate technical feasibility, then add other stakeholders later.
- D. Include procurement and vendor management specialists early to evaluate AI tools, involving business teams once a platform is selected.

Answer: A

Explanation:

Enterprise AI adoption succeeds when it is cross-functional from the start. Option A is best practice because AI impacts legal risk, privacy, security, compliance, workforce processes, and business strategy—not just technology. Including leadership ensures alignment to priorities and funding; including business units ensures use cases and success metrics are real; including legal/compliance ensures responsible AI and regulatory obligations are addressed early. This prevents rework and reduces the chance of deploying solutions that are misaligned with policy or unacceptable risk. Options B and C delay governance and business alignment, which often leads to “build first, govern later” failure modes—solutions that work technically but cannot be approved or scaled due to privacy/security gaps or unclear accountability. Option D over-optimizes for vendor selection without ensuring the organization has defined responsible AI requirements, target use cases, and operating model. Procurement is important, but it is not the primary driver of a successful adoption team. The most sustainable approach is a representative adoption team that integrates business, technical, and governance stakeholders from day one.

NEW QUESTION 2

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot enables users to search across emails, files, chats, meetings, and connected apps, by using natural language queries.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot provides data protection, and helps ensure that user prompts and chat data are secure.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot is included in all Microsoft 365 subscriptions.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot enables users to search across emails, files, chats, meetings, and connected apps, by using natural language queries.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot provides data protection, and helps ensure that user prompts and chat data are secure.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot is included in all Microsoft 365 subscriptions.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 3

You need to recommend a service that supports indexing information and knowledge mining by extracting insights from documents. What should you recommend?

- A. Microsoft Foundry
- B. Azure Vision in Foundry Tools
- C. Azure Document Intelligence in Foundry Tools
- D. Azure AI Search

Answer: D

NEW QUESTION 4

HOTSPOT

HOTSPOT - Select the answer that correctly completes the sentence. Microsoft 365 Copilot can be used to .

Answer Area

Microsoft 365 Copilot can be used to

monitor network traffic and alerts in real time.

create a Microsoft Word document.

create a list in Microsoft SharePoint.

modify administrative permissions for Microsoft SharePoint files.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Microsoft 365 Copilot can be used to

monitor network traffic and alerts in real time.

create a Microsoft Word document.

create a list in Microsoft SharePoint.

modify administrative permissions for Microsoft SharePoint files.

NEW QUESTION 5

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft Foundry helps organizations securely build and manage generative AI solutions in a governed environment.	<input type="radio"/>	<input type="radio"/>
Microsoft Foundry provides built-in scalability to enable organizations to expand AI workloads as usage increases.	<input type="radio"/>	<input type="radio"/>
Microsoft Foundry can be used for image recognition and computer vision tasks.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Foundry helps organizations securely build and manage generative AI solutions in a governed environment.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Foundry provides built-in scalability to enable organizations to expand AI workloads as usage increases.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Foundry can be used for image recognition and computer vision tasks.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 6

You plan to meet with stakeholders to discuss how generative AI can benefit your company. You need to provide a relevant description of generative AI. Which description should you use?

- A. Generative AI is designed to generate responses based on a user's natural language prompts.
- B. Generative AI is designed to translate documents into other languages.
- C. Generative AI is designed to predict future trends based on historical data.
- D. Generative AI is designed to recommend products based on user behavior.

Answer: A

NEW QUESTION 7

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft Foundry provides a unified platform for developers and data professionals to create custom end-to-end AI solutions.	<input type="radio"/>	<input type="radio"/>
Microsoft Foundry provides a unified platform for low-code developers and business users to create custom end-to-end AI solutions.	<input type="radio"/>	<input type="radio"/>
You need a Microsoft 365 Copilot license to access Microsoft Foundry services.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Foundry provides a unified platform for developers and data professionals to create custom end-to-end AI solutions.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Foundry provides a unified platform for low-code developers and business users to create custom end-to-end AI solutions.	<input type="radio"/>	<input checked="" type="radio"/>
You need a Microsoft 365 Copilot license to access Microsoft Foundry services.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 8

You plan to meet with a group of stakeholders to discuss how generative AI can benefit your company. You need to provide the stakeholders with a relevant description of generative AI during the meeting. Which description should you use?

- A. Generative AI is designed to translate documents into other languages.
- B. Generative AI is designed to predict future trends based on historical data.
- C. Generative AI is designed to generate responses based on a user's natural language prompts.
- D. Generative AI is designed to recommend products based on user behavior.

Answer: C

Explanation:

Generative AI's defining characteristic is that it creates new content (text, images, code, summaries, drafts) in response to instructions—most commonly natural language prompts. Option C captures that general-purpose description in a stakeholder-friendly way: users provide prompts and the system generates responses or content. This framing is broad enough to cover common business value scenarios such as summarizing documents, drafting communications, creating marketing copy, generating reports, building assistants, and producing structured outputs from unstructured requests.

Option A is a single use case (translation), not the defining description. Option B describes predictive analytics/forecasting, which is a different AI category focused on outcomes and probabilities rather than content creation. Option D describes recommendation systems, typically driven by ranking/behavioral signals; while AI can enhance recommendations, that is not the core definition of generative AI. Therefore, the most accurate and relevant description for stakeholders is C.

NEW QUESTION 9

Your company manages an online catalog of office supplies. You plan to use a generative AI solution to create product descriptions for your company's website. The solution must ensure descriptions can be posted immediately after creation, enable selection/inclusion of product details, and be fast and simple for non-technical staff. What is the best type of solution to use? Select the BEST answer.

- A. custom Azure Machine Learning model
- B. the Researcher agent in Microsoft 365 Copilot
- C. an interactive AI agent
- D. a fine-tuned large language model LLM

Answer: D

NEW QUESTION 10

HOTSPOT

- Select the answer that correctly completes the sentence.

Adopting Microsoft responsible AI principles is important for your organization because the principles .

Adopting Microsoft responsible AI principles is important for your organization

because the principles

- ensure that AI models deliver consistent and equitable results.
- help organizations increase trust in fully autonomous AI systems.
- promote the ethical and accountable use of AI.
- standardize model development practices across AI teams.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Adopting Microsoft responsible AI principles is important for your organization

because the principles

- ensure that AI models deliver consistent and equitable results.
- help organizations increase trust in fully autonomous AI systems.
- promote the ethical and accountable use of AI.
- standardize model development practices across AI teams.

NEW QUESTION 10

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot connectors enable you to index data from multiple sources to make the data available in Copilot.	<input type="radio"/>	<input type="radio"/>
You can build a custom Microsoft 365 Copilot connector when the available connectors do NOT meet your data integration requirements.	<input type="radio"/>	<input type="radio"/>
To use Microsoft 365 Copilot connectors, you need a Microsoft Copilot Studio license.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To use Microsoft 365 Copilot connectors, you need a Microsoft Copilot Studio license.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 12

HOTSPOT

- Select the answer that correctly completes the sentence. The primary goal of generative AI is _____ .

Answer Area

The primary goal of generative AI is

▼

to analyze trends and classify data sources.

to create new content, such as text, images, or code.

to make predictions based on historical data.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

to create new content, such as text, images, or code.

Generative AI is defined by its ability to produce new outputs—content that did not previously exist in exactly that form—based on patterns learned from large datasets. That content can be text (emails, summaries, policies), images (design mockups, marketing visuals), code (snippets, scripts), audio, and more.

Therefore, the correct completion is ??to create new content, such as text, images, or code.??

The other options describe different AI categories. ??Analyze trends and classify data sources?? is primarily analytical/classification work, typically associated with traditional machine learning models (for example, clustering, categorization, fraud classification). ??Make predictions based on historical data?? is predictive AI (forecasting demand, predicting churn, estimating failure probability). While generative AI can assist those workflows by explaining results or drafting narratives, its primary purpose is not classification or forecasting—it is content synthesis.

In practical business value terms, this is why generative AI is commonly deployed for productivity tasks like drafting and rewriting content, summarizing long documents, generating customer communications, creating knowledge assistants, and producing structured outputs (tables, bullet lists, JSON) from unstructured prompts. The model??s differentiator is its ability to transform instructions and context into coherent, human-like content.

NEW QUESTION 16

Your company uses a non-reasoning generative AI model to create textual content. You discover that the model??s responses are inconsistent and do NOT meet expectations. You need to improve the prompts. What should you do? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Provide the prompts with extensive examples of the expected output.
- B. Add the context, sources, and expectations to the prompts.
- C. Use technical terms in the prompts to enhance AI comprehension.
- D. Add only a single concise requirement to the prompts.

Answer: AB

NEW QUESTION 21

Which business requirement most closely relates to grounding a generative AI model?

- A. supporting multiple languages
- B. measuring the number of user interactions per day
- C. enabling users to interact by using natural language queries
- D. ensuring that verified company data sources are used for response generation

Answer: D

NEW QUESTION 26

Your company is developing an AI-powered customer support agent. You need to ensure that the solution follows Microsoft responsible AI principles. Which two actions should you perform? Select the two BEST answers. Each correct answer presents part of the solution.

- A. Retain all customer conversations.
- B. Test the agent to ensure that responses are inclusive and culturally sensitive.
- C. Enable the agent to operate independently.
- D. Ensure that the agent can be used for multiple purposes.
- E. Provide a clear disclaimer that users are interacting with an AI solution.

Answer: BE

NEW QUESTION 28

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Allowing AI models to make autonomous decisions supports the Microsoft responsible AI principle of accountability.	<input type="radio"/>	<input type="radio"/>
Regularly testing AI models for fairness and inclusiveness helps ensure they align with Microsoft's Responsible AI principles.	<input type="radio"/>	<input type="radio"/>
Protecting user data and limiting access to personal information supports the Microsoft responsible AI principles of privacy and security.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Allowing AI models to make autonomous decisions supports the Microsoft responsible AI principle of accountability.	<input type="radio"/>	<input checked="" type="radio"/>
Regularly testing AI models for fairness and inclusiveness helps ensure they align with Microsoft's Responsible AI principles.	<input checked="" type="radio"/>	<input type="radio"/>
Protecting user data and limiting access to personal information supports the Microsoft responsible AI principles of privacy and security.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 32

HOTSPOT

- Select the answer that correctly completes the sentence.
 Using high-quality grounding data in a generative AI solution .

Answer Area

Using high-quality grounding data in a generative AI solution

ensures that all responses are factually accurate.

increases performance of an AI model.

improves the accuracy and reliability of the predictions and outputs of AI.

increases the amount of storage required to host an AI model.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Using high-quality grounding data in a generative AI solution

ensures that all responses are factually accurate.

increases performance of an AI model.

improves the accuracy and reliability of the predictions and outputs of AI.

increases the amount of storage required to host an AI model.

NEW QUESTION 35

Your company is evaluating the use of Microsoft Copilot Studio to support business process automation and employee self-service. Which two capabilities are directly supported in Copilot Studio? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Using agents to identify and respond to security incidents
- B. configuring document security
- C. drafting and summarizing files in Microsoft Word and PowerPoint
- D. building agents that connect to business data and automate user interactions
- E. customizing agent behavior and responses

Answer: DE

NEW QUESTION 36

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot can amplify existing data governance challenges.	<input type="radio"/>	<input type="radio"/>
Implementing Microsoft 365 Copilot reduces data management costs.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot can help IT teams manage data risks.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot can amplify existing data governance challenges.	<input checked="" type="radio"/>	<input type="radio"/>
Implementing Microsoft 365 Copilot reduces data management costs.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot can help IT teams manage data risks.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 37

Your company purchases Microsoft 365 Copilot for its sales department. The sales department needs to find and summarize information across internal documents quickly. From which two data sources can the sales department obtain results by default? (Select TWO.)

- A. an on-premises file share
- B. a custom customer relationship management (CRM) system
- C. Microsoft SharePoint
- D. Microsoft OneDrive
- E. Microsoft Sway

Answer: CD

Explanation:

By default, Microsoft 365 Copilot is grounded in your organization's Microsoft 365 data through Microsoft Graph, and it respects the user's existing permissions. For finding and summarizing information across internal documents, the most direct default document repositories in Microsoft 365 are SharePoint (team sites and shared libraries) and OneDrive (a user's work files). That is why C (Microsoft SharePoint) and D (Microsoft OneDrive) are the correct selections. Microsoft explicitly describes Copilot as accessing organizational content via Microsoft Graph, including user documents and related work content. The other options are not by default sources. A (on-premises file share) is not automatically part of Microsoft Graph unless you integrate/migrate content or use connectors to make it discoverable in Microsoft 365 experiences. B (custom CRM) similarly requires an integration approach (for example, Microsoft 365 Copilot connectors / Graph connectors) to index and expose that data for Copilot to use. E (Microsoft Sway) is not a primary default content source for Copilot's document grounding and is not typically referenced as a core internal document repository compared to SharePoint/OneDrive. So, for immediate, out-of-the-box internal document discovery and summarization within Microsoft 365, SharePoint + OneDrive are the default answer.

NEW QUESTION 41

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft Copilot in Outlook can automatically send follow-up replies to emails.	<input type="radio"/>	<input type="radio"/>
Microsoft Copilot in Outlook can identify and surface tasks mentioned in your emails.	<input type="radio"/>	<input type="radio"/>
Microsoft Copilot in Outlook can summarize long email threads and highlight action items and deadlines.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Copilot in Outlook can automatically send follow-up replies to emails.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft Copilot in Outlook can identify and surface tasks mentioned in your emails.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Copilot in Outlook can summarize long email threads and highlight action items and deadlines.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 44

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
A text-to-image generator can be used to translate content into other languages.	<input type="radio"/>	<input type="radio"/>
A predictive analytics model can generate new marketing content for a company's online ads.	<input type="radio"/>	<input type="radio"/>
A generative AI chatbot can engage customers in personalized conversations and recommend products.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A text-to-image generator can be used to translate content into other languages.	<input type="radio"/>	<input checked="" type="radio"/>
A predictive analytics model can generate new marketing content for a company's online ads.	<input type="radio"/>	<input checked="" type="radio"/>
A generative AI chatbot can engage customers in personalized conversations and recommend products.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 46

Your company plans to use generative AI to help summarize and analyze internal business documents. You need to recommend a solution to prevent generative AI from accessing confidential or classified information. What should you include in the recommendation?

- A. an information barrier (IB) policy
- B. data governance

- C. a data retention policy
- D. communication monitoring

Answer: B
