AI Transformation Leader (beta)

<https://www.certleader.com/AB-731-dumps.html>

NEW QUESTION 1

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
A generative AI solution is well-suited to predict next-quarter sales trends.	<input type="radio"/>	<input type="radio"/>
A generative AI solution can summarize lengthy policy documents.	<input type="radio"/>	<input type="radio"/>
A generative AI solution can create product descriptions from product specifications.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A generative AI solution is well-suited to predict next-quarter sales trends.	<input type="radio"/>	<input checked="" type="radio"/>
A generative AI solution can summarize lengthy policy documents.	<input checked="" type="radio"/>	<input type="radio"/>
A generative AI solution can create product descriptions from product specifications.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 2

HOTSPOT

HOTSPOT - Select the answer that correctly completes the sentence. Microsoft 365 Copilot can be used to .

Answer Area

Microsoft 365 Copilot can be used to

- monitor network traffic and alerts in real time.
- create a Microsoft Word document.
- create a list in Microsoft SharePoint.
- modify administrative permissions for Microsoft SharePoint files.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Microsoft 365 Copilot can be used to

- monitor network traffic and alerts in real time.
- create a Microsoft Word document.
- create a list in Microsoft SharePoint.
- modify administrative permissions for Microsoft SharePoint files.

NEW QUESTION 3

HOTSPOT

- Select the answer that correctly completes the sentence.

To ensure that your organization follows trustworthy AI principles, the organization should establish an AI governance council to .

Answer Area

To ensure that your organization follows trustworthy AI principles, the organization should establish an AI governance council to

- configure and deploy AI models in the organization's Azure environment.
- guide AI strategy, ensure responsible AI oversight, and promote alignment across business units.
- manage day-to-day model training and labeling tasks for AI development teams.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

To ensure that your organization follows trustworthy AI principles, the organization should establish an AI governance council to

- configure and deploy AI models in the organization's Azure environment.
- guide AI strategy, ensure responsible AI oversight, and promote alignment across business units.
- manage day-to-day model training and labeling tasks for AI development teams.

NEW QUESTION 4

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
For a user to access organizational data from a mobile device, the user needs a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To reason over your organizational data by using Microsoft Graph, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>
To use the Analyst agent, you need a Microsoft 365 Copilot license.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
For a user to access organizational data from a mobile device, the user needs a Microsoft 365 Copilot license.	<input type="radio"/>	<input checked="" type="radio"/>
To reason over your organizational data by using Microsoft Graph, you need a Microsoft 365 Copilot license.	<input checked="" type="radio"/>	<input type="radio"/>
To use the Analyst agent, you need a Microsoft 365 Copilot license.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 5

HOTSPOT

- Select the answer that correctly completes the sentence.

A AI solution recognizes patterns in large and complex datasets to create new and original content.

Answer Area

A AI solution recognizes patterns in large and complex datasets to create new and original content.

- prescriptive
- predictive
- generative

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

A AI solution recognizes patterns in large and complex datasets to create new and original content.

- prescriptive
- predictive
- generative

NEW QUESTION 6

You have a historical dataset that contains 1,000 records. You need an AI solution that can analyze the data to identify patterns and predict future outcomes. What should you include in the solution?

- A. Microsoft Foundry
- B. Azure Document Intelligence in Foundry Tools
- C. Azure Machine Learning
- D. Azure Content Understanding in Foundry Tools

Answer: C

NEW QUESTION 7

You plan to meet with stakeholders to discuss how generative AI can benefit your company. You need to provide a relevant description of generative AI. Which description should you use?

- A. Generative AI is designed to generate responses based on a user's natural language prompts.
- B. Generative AI is designed to translate documents into other languages.
- C. Generative AI is designed to predict future trends based on historical data.
- D. Generative AI is designed to recommend products based on user behavior.

Answer: A

NEW QUESTION 8

Your company sells hiking and camping gear online. You need a generative AI solution that can interact with customers and ask questions about their needs. What should you include in the solution?

- A. a chatbot
- B. predictive AI
- C. computer vision
- D. a recommendation engine

Answer: A

NEW QUESTION 9

You plan to meet with a group of stakeholders to discuss how generative AI can benefit your company. You need to provide the stakeholders with a relevant description of generative AI during the meeting. Which description should you use?

- A. Generative AI is designed to translate documents into other languages.
- B. Generative AI is designed to predict future trends based on historical data.
- C. Generative AI is designed to generate responses based on a user's natural language prompts.
- D. Generative AI is designed to recommend products based on user behavior.

Answer: C

Explanation:

Generative AI's defining characteristic is that it creates new content (text, images, code, summaries, drafts) in response to instructions—most commonly natural language prompts. Option C captures that general-purpose description in a stakeholder-friendly way: users provide prompts and the system generates responses or content. This framing is broad enough to cover common business value scenarios such as summarizing documents, drafting communications, creating marketing

copy, generating reports, building assistants, and producing structured outputs from unstructured requests. OptionA is a single use case (translation), not the defining description. OptionB describes predictive analytics/forecasting, which is a different AI category focused on outcomes and probabilities rather than content creation. OptionD describes recommendation systems, typically driven by ranking/behavioral signals; while AI can enhance recommendations, that is not the core definition of generative AI. Therefore, the most accurate and relevant description for stakeholders is C.

NEW QUESTION 10

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
A manufacturer can use Azure Vision in Foundry Tools to identify product defects on an assembly line.	<input type="radio"/>	<input type="radio"/>
A logistics company can use Azure Vision in Foundry Tools to recognize package shipping labels.	<input type="radio"/>	<input type="radio"/>
The HR department at your company can only use Azure Vision in Foundry Tools to extract written content from Microsoft Word files.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A manufacturer can use Azure Vision in Foundry Tools to identify product defects on an assembly line.	<input checked="" type="radio"/>	<input type="radio"/>
A logistics company can use Azure Vision in Foundry Tools to recognize package shipping labels.	<input checked="" type="radio"/>	<input type="radio"/>
The HR department at your company can only use Azure Vision in Foundry Tools to extract written content from Microsoft Word files.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 10

HOTSPOT

HOTSPOT - Select the answer that correctly completes the sentence.

You use _____ to train a model that will forecast product demand based on historical sales data.

You use to train a model that will forecast product demand based on historical sales data.

- Azure Machine Learning
- Azure AI Search
- Azure OpenAI
- Microsoft Foundry

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You use to train a model that will forecast product demand based on historical sales data.

- Azure Machine Learning
- Azure AI Search
- Azure OpenAI
- Microsoft Foundry

NEW QUESTION 11

Your company is preparing to adopt Microsoft 365 Copilot and wants to follow Microsoft responsible AI principles. As a business leader, you propose establishing an AI governance council to ensure alignment with the responsible AI principles. What is the primary purpose of the council? More than one answer choice may achieve the goal. Select the BEST answer.

- A. to monitor user behavior and enforce compliance with internal IT policies
- B. to train employees on how to use Copilot features effectively
- C. to oversee implementation, manage technical performance, and ensure successful AI deployment
- D. to guide strategy, provide oversight, and ensure cross-functional alignment for responsible AI adoption

Answer: D

Explanation:

An AI governance council (often called an "AI Council") exists primarily to set direction and provide cross-functional oversight so AI adoption stays aligned to the organization's values, risk posture, and Responsible AI commitments. That maps most directly to D. Microsoft's guidance on creating an AI Council describes leadership responsibilities such as defining and communicating the organization's AI vision, values, and policies, reviewing and approving AI use cases/projects, and coordinating with enablement and technical readiness teams to understand risks, issues, and opportunities. It also emphasizes representation across distinct functions (for example: senior leadership, legal, compliance, risk, ethics, data, technology, business, HR) to ensure governance decisions reflect a broad, accountable perspective.

The other options describe activities that may be supporting outcomes of governance, but they are not the council's primary purpose. A is narrow (IT policy enforcement/user monitoring) and is typically handled by security/compliance operations rather than the top-level governance body. B is user enablement/training (commonly owned by adoption/change management teams). C focuses on technical delivery and performance management (often owned by engineering/MLOps/service owners). The governance council's central value is strategic guidance + oversight + cross-functional alignment to ensure Responsible AI adoption is consistent, accountable, and sustainable across the business.

NEW QUESTION 16

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Content filtering controls can prevent AI-generated responses from exposing confidential and sensitive information.	<input type="radio"/>	<input type="radio"/>
AI-generated content can unintentionally reveal sensitive information if the generative AI model has access to unsecured data sources.	<input type="radio"/>	<input type="radio"/>
To prevent data exposure, only the prompts used by users must be protected by using policies.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Content filtering controls can prevent AI-generated responses from exposing confidential and sensitive information.	<input checked="" type="radio"/>	<input type="radio"/>
AI-generated content can unintentionally reveal sensitive information if the generative AI model has access to unsecured data sources.	<input checked="" type="radio"/>	<input type="radio"/>
To prevent data exposure, only the prompts used by users must be protected by using policies.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 20

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Vision in Foundry Tools can extract and analyze key phrases from PDF files.	<input type="radio"/>	<input type="radio"/>
Azure Vision in Foundry Tools can generate images based on natural language descriptions.	<input type="radio"/>	<input type="radio"/>
Azure Document Intelligence in Foundry Tools can be used to automate the processing of invoices and credit notes.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Azure Vision in Foundry Tools can extract and analyze key phrases from PDF files. Answer: No

Azure Vision in Foundry Tools can generate images based on natural language descriptions. Answer: No

Azure Document Intelligence in Foundry Tools can be used to automate the processing of invoices and credit notes. Answer: Yes

No— Azure Vision in Foundry Tools focuses on computer vision tasks such as image analysis and OCR (reading text from images and documents). While it can extract text from scanned PDFs via OCR, key phrase extraction is a natural language processing capability provided by Azure Language in Foundry Tools, not Azure Vision. Key phrase extraction analyzes text to identify main concepts, which is a different service family than vision.

No— Azure Vision can analyze existing images (for example, generate captions/descriptions of an image), but generating new images from a text prompt is a generative model capability (for example, DALL·E through Azure OpenAI/Azure AI Foundry model endpoints), not an Azure Vision feature. Vision describes what it sees; it doesn't synthesize new images from natural language.

Yes— Azure Document Intelligence in Foundry Tools is designed for intelligent document processing, including automating extraction of structured fields from financial documents. Microsoft provides prebuilt models for invoices and supports custom extraction for similar document types, which makes it suitable for automating workflows involving invoices and credit-note style documents (field extraction, validation, routing).

NEW QUESTION 22

You are exploring how Microsoft 365 Copilot uses Microsoft Graph to deliver AI-powered experiences. Which information in Microsoft Graph can Copilot use by default?

- A. emails, files, meetings, and chats in Microsoft 365
- B. data stored in a file share
- C. social media activity
- D. content from public websites

Answer: A

NEW QUESTION 23

Your company plans to implement a proof of concept PoC agent that uses Azure OpenAI. The solution must start small and provide flexibility to scale usage as demand grows. Which pricing model should you use?

- A. Microsoft 365 Copilot
- B. Batch API
- C. Provisioned PTUs
- D. Standard On-Demand

Answer: D

Explanation:

For a proof of concept, the key requirements are low commitment, quick start, and the ability to scale up or down as you learn what real usage looks like. Azure OpenAI Standard On-Demand pricing is designed for exactly that: you pay per token consumed (input and output) on a pay-as-you-go basis, which makes it ideal when demand is uncertain or variable—typical in early pilots and PoCs.

By contrast, Provisioned (PTUs) is best when you have well-defined, predictable throughput and latency requirements—usually a more mature, production workload. PTUs involve reserving model processing capacity to achieve consistent performance and more predictable costs, which is usually premature for a PoC where actual traffic patterns are not yet known.

Batch API is optimized for asynchronous high-volume jobs with a target turnaround (for example, up to 24 hours) and discounted pricing. That's great for offline processing, but it does not match an interactive agent PoC that typically needs near-real-time responses and iterative testing.

Microsoft 365 Copilot is a separate SaaS licensing model and is not the Azure OpenAI pricing model for building your own agent solution.

NEW QUESTION 24

You have a business unit that uses an AI solution to process loan applications. You discover that the solution rejects the application of all applicants that are older than 60 years of age. Which Microsoft responsible AI principle is this violating?

- A. accountability
- B. transparency
- C. fairness
- D. reliability and safety

Answer: C

NEW QUESTION 28

HOTSPOT

Select the answer that correctly completes the sentence. The Researcher agent in Microsoft 365 Copilot .

Answer Area

The Researcher agent in Microsoft 365 Copilot

- creates visual dashboards from structured data in Microsoft Excel and Power BI.
- generates a pivot table and performs time series forecasting.
- performs complex, multi-step, data analysis and code execution tasks over arbitrary datasets.
- uses reasoning capabilities to generate deep insights based on organizational data and the web.

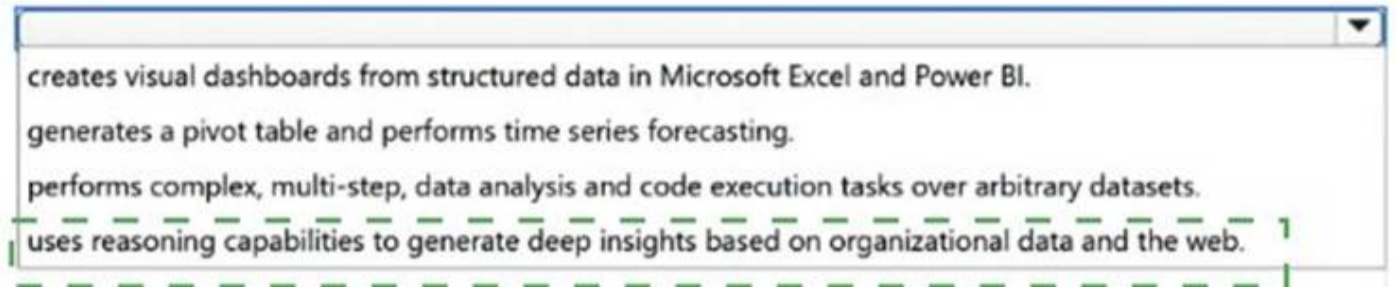

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

The Researcher agent in Microsoft 365 Copilot

NEW QUESTION 33

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements

- Microsoft 365 Copilot connectors enable you to index data from multiple sources to make the data available in Copilot.
- You can build a custom Microsoft 365 Copilot connector when the available connectors do **NOT** meet your data integration requirements.
- To use Microsoft 365 Copilot connectors, you need a Microsoft Copilot Studio license.

Yes

No

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

- Microsoft 365 Copilot connectors enable you to index data from multiple sources to make the data available in Copilot.
- You can build a custom Microsoft 365 Copilot connector when the available connectors do **NOT** meet your data integration requirements.
- To use Microsoft 365 Copilot connectors, you need a Microsoft Copilot Studio license.

Yes

No

NEW QUESTION 34

Your company plans to use generative AI to help build a website that will showcase various existing products. Which capability best describes a benefit of using generative AI for this project? Select the BEST answer.

- A. translating product descriptions into a different language
- B. analyzing product sales to identify patterns and trends
- C. designing a new product based on customer requirements
- D. creating product descriptions based on product specifications

Answer: D

NEW QUESTION 38

Your company uses a non-reasoning generative AI model to create textual content. You discover that the model's responses are inconsistent and do NOT meet expectations. You need to improve the prompts. What should you do? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Provide the prompts with extensive examples of the expected output.
- B. Add the context, sources, and expectations to the prompts.
- C. Use technical terms in the prompts to enhance AI comprehension.
- D. Add only a single concise requirement to the prompts.

Answer: AB

NEW QUESTION 41

Which business requirement most closely relates to grounding a generative AI model?

- A. supporting multiple languages
- B. measuring the number of user interactions per day
- C. enabling users to interact by using natural language queries
- D. ensuring that verified company data sources are used for response generation

Answer: D

NEW QUESTION 45

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) architectures require that a large language model (LLM) be retrained on proprietary data.	<input type="radio"/>	<input type="radio"/>
Retrieval-Augmented Generation (RAG) grounds a language model to produce more factual and context-relevant responses.	<input type="radio"/>	<input type="radio"/>
Retrieval Augmented Generation (RAG) retrieves information from external knowledge sources at runtime instead of relying solely on the knowledge of a generative AI model.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) architectures require that a large language model (LLM) be retrained on proprietary data.	<input type="radio"/>	<input checked="" type="radio"/>
Retrieval-Augmented Generation (RAG) grounds a language model to produce more factual and context-relevant responses.	<input checked="" type="radio"/>	<input type="radio"/>
Retrieval Augmented Generation (RAG) retrieves information from external knowledge sources at runtime instead of relying solely on the knowledge of a generative AI model.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 48

Your company is developing an AI-powered customer support agent. You need to ensure that the solution follows Microsoft responsible AI principles. Which two actions should you perform? Select the two BEST answers. Each correct answer presents part of the solution.

- A. Retain all customer conversations.
- B. Test the agent to ensure that responses are inclusive and culturally sensitive.
- C. Enable the agent to operate independently.
- D. Ensure that the agent can be used for multiple purposes.
- E. Provide a clear disclaimer that users are interacting with an AI solution.

Answer: BE

NEW QUESTION 52

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Allowing AI models to make autonomous decisions supports the Microsoft responsible AI principle of accountability.	<input type="radio"/>	<input type="radio"/>
Regularly testing AI models for fairness and inclusiveness helps ensure they align with Microsoft's Responsible AI principles.	<input type="radio"/>	<input type="radio"/>
Protecting user data and limiting access to personal information supports the Microsoft responsible AI principles of privacy and security.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Allowing AI models to make autonomous decisions supports the Microsoft responsible AI principle of accountability.	<input type="radio"/>	<input checked="" type="radio"/>
Regularly testing AI models for fairness and inclusiveness helps ensure they align with Microsoft's Responsible AI principles.	<input checked="" type="radio"/>	<input type="radio"/>
Protecting user data and limiting access to personal information supports the Microsoft responsible AI principles of privacy and security.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 55

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft Copilot provides a single AI app that has identical features and experiences across all Microsoft products.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot delivers AI capabilities for business users that use Microsoft 365 apps.	<input type="radio"/>	<input type="radio"/>
Microsoft Security Copilot helps companies understand risks and the organizational security posture.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Copilot provides a single AI app that has identical features and experiences across all Microsoft products.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot delivers AI capabilities for business users that use Microsoft 365 apps.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Security Copilot helps companies understand risks and the organizational security posture.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 56

HOTSPOT

- Select the answer that correctly completes the sentence.
Using high-quality grounding data in a generative AI solution .

Answer Area

Using high-quality grounding data in a generative AI solution

ensures that all responses are factually accurate.

increases performance of an AI model.

improves the accuracy and reliability of the predictions and outputs of AI.

increases the amount of storage required to host an AI model.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Using high-quality grounding data in a generative AI solution

ensures that all responses are factually accurate.

increases performance of an AI model.

improves the accuracy and reliability of the predictions and outputs of AI.

increases the amount of storage required to host an AI model.

NEW QUESTION 58

HOTSPOT

- Select the answer that correctly completes the sentence.

An organization that runs continuous, large-scale workloads with Azure OpenAI models should choose the pricing model.

Answer Area

An organization that runs continuous, large-scale workloads with Azure OpenAI models should choose the

Batch API

Provisioned (PTUs)

Standard (On-Demand)

pricing model.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

An organization that runs continuous, large-scale workloads with Azure OpenAI models should choose the

Batch API

Provisioned (PTUs)

Standard (On-Demand)

pricing model.

NEW QUESTION 63

You need to create a custom Azure Machine Learning model. The data used to train the model is consistent and uniform. What should you do first?

- A. Prepare the training data.
- B. Evaluate the model.
- C. Train the model.
- D. Tune hyperparameters.
- E. Deploy the model.

Answer: A

Explanation:

Even when training data is already consistent and uniform, the first step in building a custom Azure Machine Learning model is still to prepare the training data. Consistent data reduces the amount of cleaning you may need, but preparation is broader than cleaning: you still must confirm the schema, validate data types, handle missing values (if any), ensure label quality (for supervised learning), select/engineer features, and split data into training/validation/test sets. Those actions determine whether training will be stable and whether evaluation metrics will be meaningful.

If you skip preparation and go directly to training (C), the model might learn from the wrong columns, inconsistent labels, or poorly partitioned data, producing misleading results. Evaluation (B) comes after training because you need a trained model to score and measure. Hyperparameter tuning (D) is an optimization activity that presupposes you already have a working training pipeline and a baseline model to improve. Deployment (E) is last, after you have validated performance and selected the model candidate.

Azure Machine Learning commonly operationalizes these steps through pipelines, where data preparation is a foundational stage that precedes training and evaluation (and can also be iterated as you refine features and quality).

NEW QUESTION 64

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot can amplify existing data governance challenges.	<input type="radio"/>	<input type="radio"/>
Implementing Microsoft 365 Copilot reduces data management costs.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot can help IT teams manage data risks.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot can amplify existing data governance challenges.	<input checked="" type="radio"/>	<input type="radio"/>
Implementing Microsoft 365 Copilot reduces data management costs.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft 365 Copilot can help IT teams manage data risks.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 68

Your company has a Microsoft 365 subscription and uses Microsoft 365 Copilot Chat. Some users need to build and use declarative agents that can access work data. Which type of license should you recommend for the users?

- A. a Microsoft 365 Copilot add-on license
- B. Microsoft Copilot Studio user license
- C. a Copilot Chat pay-as-you-go plan

Answer: A

NEW QUESTION 70

Your company purchases Microsoft 365 Copilot for its sales department. The sales department needs to find and summarize information across internal documents quickly. From which two data sources can the sales department obtain results by default? (Select TWO.)

- A. an on-premises file share
- B. a custom customer relationship management (CRM) system
- C. Microsoft SharePoint
- D. Microsoft OneDrive
- E. Microsoft Sway

Answer: CD

Explanation:

By default, Microsoft 365 Copilot is grounded in your organization's Microsoft 365 data through Microsoft Graph, and it respects the user's existing permissions. For find and summarize information across internal documents, the most direct default document repositories in Microsoft 365 are SharePoint (team sites and shared libraries) and OneDrive (a user's work files). That is why C (Microsoft SharePoint) and D (Microsoft OneDrive) are the correct selections. Microsoft explicitly describes Copilot as accessing organizational content via Microsoft Graph, including user documents and related work content. The other options are not by default sources. A (on-premises file share) is not automatically part of Microsoft Graph unless you integrate/migrate content or use connectors to make it discoverable in Microsoft 365 experiences. B (custom CRM) similarly requires an integration approach (for example, Microsoft 365 Copilot connectors / Graph connectors) to index and expose that data for Copilot to use. E (Microsoft Sway) is not a primary default content source for Copilot's document grounding and is not typically referenced as a core internal document repository compared to SharePoint/OneDrive. So, for immediate, out-of-the-box internal document discovery and summarization within Microsoft 365, SharePoint + OneDrive are the default answer.

NEW QUESTION 71

Your company is deploying Microsoft 365 Copilot. The deployment must provide users with access to the Researcher agent to search across data in Microsoft SharePoint. You need to recommend a licensing plan for the solution. What should you recommend?

- A. pay-as-you-go

- B. a Microsoft 365 subscription entitlement
- C. a Microsoft 365 Copilot per-user add-on license
- D. a usage-based consumption license in Azure

Answer: C

NEW QUESTION 72

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft Copilot in Outlook can automatically send follow-up replies to emails.	<input type="radio"/>	<input type="radio"/>
Microsoft Copilot in Outlook can identify and surface tasks mentioned in your emails.	<input type="radio"/>	<input type="radio"/>
Microsoft Copilot in Outlook can summarize long email threads and highlight action items and deadlines.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Copilot in Outlook can automatically send follow-up replies to emails.	<input type="radio"/>	<input checked="" type="radio"/>
Microsoft Copilot in Outlook can identify and surface tasks mentioned in your emails.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Copilot in Outlook can summarize long email threads and highlight action items and deadlines.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 74

HOTSPOT

- Select the answer that correctly completes the sentence. The Analyst agent in Microsoft 365 Copilot .

Answer Area

The Analyst agent in Microsoft 365 Copilot

- compiles background research for a new market or initiative.
- enables you to generate audio summaries of select references.
- uses a conversational agent to answer employee FAQs.
- uses structured data and provides insights by using text, charts, tables, and other visuals.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

The Analyst agent in Microsoft 365 Copilot

- compiles background research for a new market or initiative.
- enables you to generate audio summaries of select references.
- uses a conversational agent to answer employee FAQs.
- uses structured data and provides insights by using text, charts, tables, and other visuals.

NEW QUESTION 76

Your company plans to use generative AI to help project managers and engineers work with construction blueprints stored as PDF files. You need to recommend a generative AI solution that processes both images and text, summarizes building design, answers questions, and extracts information such as locations of electrical, heating, and plumbing systems. What should you recommend?

- A. a multi-modal solution
- B. an optical character recognition OCR solution
- C. a text completion solution
- D. a document summarization solution

Answer: A

Explanation:

Construction blueprints in PDFs often contain a mix of text, symbols, linework, and diagrams. The requirements include understanding both visual layout (where systems are located) and textual annotations, producing summaries, and answering Q & A. That combination requires a multimodal generative AI approach—models that can reason over images and text together. Therefore, A is best.

OCR alone (B) can extract printed text, but it won't reliably interpret diagram geometry, symbols, or spatial relationships (e.g., "electrical riser is on the east core near gridline B-4"). Text completion (C) is too generic and doesn't address image understanding. Document summarization (D) is only one requirement (summary) and still depends on first extracting/understanding both visual and textual elements.

A multimodal solution can ingest the PDF pages as images (or rendered page images) plus extracted text, then answer questions grounded in both modalities. In practice, you may combine OCR and layout extraction with a multimodal LLM so the model can reference drawing regions, legends, callouts, and system diagrams to produce accurate explanations and field extractions.

NEW QUESTION 81

Your company is building a portfolio of AI-powered business solutions. Company executives want to understand how Microsoft responsible AI principles can support the company's long-term goals. Which benefit best demonstrates the importance of responsible AI? Select the BEST answer.

- A. guarantees that AI models provide accurate and relevant responses
- B. reduces the need for data protection policies and governance
- C. enhances stakeholder trust and fosters sustainable AI adoption throughout the organization
- D. reduces the need for executive oversight in AI decision-making

Answer: C

NEW QUESTION 83
